### PART ONE  
**The Aging Population: Issues for Retirement**  

#### CHAPTER 1  
**Issues in Retirement**  

1.1 Longevity and Changing Demographics across the World  
1.2 The Evolution of Retirement  
1.2.1 Older Workers as a Growing Share of the Work Force  
1.3 Provision for Retirement  
1.3.1 The Earliest Pensions  
1.3.2 Early Corporate Pensions  
1.3.3 Total Assets on Retirement  
1.3.4 The Contribution of Various Assets at Retirement  
References  

#### CHAPTER 2  
**The Various Costs of Pensions: Macro and Micro**  

2.1 Governmental Cost of Retirement  
2.2 Pensions and Capital Formation  
2.3 Regulating Corporate Pensions  
2.3.1 US Regulations  
2.3.2 Corporate Bankruptcies Leave a Trail of Broken Promises  
2.3.3 Comparing Regulation of Occupational Pension Schemes in the EU and the United States  
2.4 DC vs. DB: Shifting the Risks  
2.4.1 Pensions, Corporate Earnings, and Tax Deferral  

References  

vii
CHAPTER 3
The Various Pillars of Retirement: Social Security, Company Pensions, Supplementary Pensions, and Private Savings

3.1 Pillars of Retirement
3.2 Reforming OECD Pensions
3.3 Changing Role of Private Pensions
3.3.1 Summarizing Pension Reforms in the OECD
3.4 Plans for Reforming Social Pensions
3.4.1 Increase Contributions, Cut Benefits, Extend Working Life
3.4.2 Use the Contributions to Buy Stocks instead of Government Bonds
3.5 Rethinking Pension Promises: Breaking the Fixed Link to a Monetary Value
3.5.1 Feldstein's PRA with Guarantees
3.5.2 NDC: Notational or Nonfinancial Defined Contributions
3.5.3 The PAAW (Personal Annuitized Average Wage Security), a Variant of the NDC
3.6 Intergenerational Risk-Sharing
3.7 Conclusions
3.8 Case Study: Public Sector vs. Private Pensions
3.8.1 Government Plans Are Different: US
3.8.2 Government Plans Are Different: Canada
3.8.3 What Do We Learn from These Comparisons?
References

CHAPTER 4
Asset Classes: Historical Performance and Risk

4.1 Equities
4.2 ETFs: Exchange-Traded Funds
4.2.1 Levered ETFs
4.3 Bonds and Fixed Income
4.3.1 TIPS
4.4 The Bond-Stock Measure for Medium-Term Large Crash Prediction
4.4.1 The 2000–2003 Crash in the S&P 500
References
4.5 Hedge Funds 112
4.6 Real Assets 121
4.6.1 REITs 121
4.7 Housing as an Asset Class 121
4.8 Gold and Other Commodities 125
4.9 Private Equity and Related Assets 126
4.10 Currencies 126
4.11 Evaluation of Great Investors 129
4.12 Fundamental and Seasonal Anomalies of Asset Returns 135

References 141

CHAPTER 5
The Current Economic Crisis and Its Impact on Retirement Decisions 145
5.1 Household and Government Debt 145
5.2 Were the Crash Models Helpful in Signaling the US and Worldwide 2007–2009 Crash? 146
5.3 The Subprime Crisis and How It Evolved 148
5.3.1 Favoring the Financial Sector: Evaluating the Policy Responses 150
5.4 Impact on Retirement Expectations 153
5.4.1 Plan Sponsors in Trouble 156
5.5 Pensions in Trouble 160
5.6 State Pensions 161
5.7 Future ERP 162
5.7.1 Companies Freezing Pension Plans 165
5.7.2 The Ultimate Strategy: Bankruptcy 165
5.8 Future Inflation and Pensions 165

References 166

PART TWO
Special Issues and Models 169

CHAPTER 6
The Impact of Population Aging on Household Portfolios and Asset Returns 171
6.1 Introduction 171
6.2 The Empirical Evidence 172
6.2.1 The Empirical Evidence in a Micro-Perspective 173
6.2.2 The Empirical Evidence in a Macro-Perspective 181
6.3 Models for Portfolio Choices and Life-Cycle Asset Allocations
   6.3.1 The Seminal Models
   6.3.2 More Realistic Portfolio Models
   6.3.3 Life-Cycle Asset Allocation Models with Uninsurable Labor Risk
   6.3.4 Life-Cycle Asset Allocation Models in the Presence of Annuities

6.4 Conclusions
References

CHAPTER 7
A Continuous Time Approach to Asset-Liability Surplus Management
7.2 A Case Study Application of the Rudolf-Ziemba Model
References

CHAPTER 8
Should Defined Benefit Pension Schemes Be Career Average or Final Salary?
8.1 Introduction
8.2 Career Average Defined Benefit Schemes
8.3 Cost Neutrality
8.4 Choosing the Revaluation Rate
8.5 The Adoption of Career Average Pension Schemes
8.6 Advantages of a Switch to a Career Average Scheme
   8.6.1 Employer
   8.6.2 Members
8.7 Disadvantages of a Switch to a Career Average Scheme
   8.7.1 Employer
   8.7.2 Members
8.8 Redistribution Effects of a Switch to Career Average Pensions
   8.8.1 Compensatory Salary Changes, Pension Contributions, NIC, and Income Tax
   8.8.2 Model of the Redistributive Effects of a Switch to Career Average
   8.8.3 Numerical Example of the Redistributive Effects of a Switch to Career Average
8.9 Conclusions

CHAPTER 12
Issues In Individual Asset-Liability Management for Retirement 315
12.1 Own Company Stock 315
12.2 The Role of Annuities 319
12.3 The Role of Insurance 321
12.4 The Role of Managed Withdrawal Plans 322
    12.4.1 Mandatory Withdrawals 322
12.5 Where and How to Retire? 322
    12.5.1 New Type Retirement Communities 323
    12.5.2 Assisted Living 323
    12.5.3 Reverse Mortgages 323
    12.5.4 Does It Pay to Have Multiple Residences? 324
    12.5.5 Interest-Free Loan 326
    References 326

PART THREE
Modeling the Issues 329

CHAPTER 13
Learning from Other Models 331
13.1 Preserving Endowment Spending 331
    13.1.1 Cloning the Yale Approach 335
    13.1.2 Dealing with Liquidity the Yale Way 336
    13.1.3 Swensen’s Rule and Others 336
13.2 Devising a Rule So That Spending Never Falls 337
    13.2.1 A Protective Spending Model 341
