1 The World of Finance	1
1.1 Introduction	3
1.2 Financial centres	4
1.3 The role of a financial centre	4
1.4 Money markets, capital markets and the banking system	6
1.5 Services of a financial centre	8
1.6 The growth of the financial services industry	11
1.7 The globalization of financial markets	11
1.8 Technology	12
1.9 Deregulation	13
1.10 Financial innovation	15
1.11 Types of financial innovations	17
1.12 Emerging markets	17
1.13 Problems concerning investment in emerging markets	20
1.14 The future	21
1.15 Conclusions	23
2 Financial Intermediation and Financial Markets	25
2.1 Introduction	27
2.2 Surplus and deficit agents	27
2.3 What is a financial security?	28
2.4 Types of financial claims: debt and equity	28
2.5 The role of financial intermediaries	30
2.6 Provision of a payments mechanism	30
2.7 Maturity transformation	30
2.8 Risk transformation	31
2.9 Liquidity provision	32

2.10	Reduction of contracting, search and information costs	32
2.11	Types of financial markets	33
2.12	The classification of financial markets	35
2.13	The role played by financial markets	36
2.14	Participants in financial markets	37
2.15	Conclusions	38
3	Financial Institutions	41
3.1	Introduction	43
3.2	The central bank	43
3.3	The implementation of monetary policy	44
3.4	Management of the national debt	44
3.5	Supervisory function	44
3.6	Types of financial intermediaries	46
3.7	Deposit institutions	46
3.8	The banking sector	47
3.9	Savings institutions	47
3.10	Insurance companies	50
3.11	The phenomenon of Bancassurance	51
3.12	Mutual funds or unit trusts	52
3.13	Investment companies and investment trusts	53
3.14	Exchange traded funds	54
3.15	Pension funds	56
3.16	Hedge funds	57
3.17	Private equity	59
3.18	Specialist financial institutions	61
3.19	Venture capital companies	61
3.20	Finance companies or finance houses	62
3.21	Factoring agencies	63
3.22	The role of financial institutions	63
3.23	Conclusions	66
4	Monetary Policy and Interest Rate Determination	69
4.1	Introduction	71
4.2	The functions of money	71
4.3	Bills and bonds	72
4.4	The operation of monetary policy	73
4.5	Monetary policy in practice and the announcement effect	76
4.6	The commercial banking system and the narrow and broad money supply	78
4.7	Formula for the money multiplier	80
4.8	Controlling the money supply	82
4.9	The determination of interest rates	82
4.10	The loanable funds approach to interest rate determination	84
4.11	Money market or loanable funds theory?	86
4.12	Inflation and interest rates	87

4.13	Fiscal policy and interest rates	89
4.14	Other factors influencing the interest rate	90
4.15	Theories of the yield curve	90
4.16	Expectations theory	91
4.17	Liquidity preference theory	93
4.18	Preferred habitat theory	94
4.19	Market segmentation theory	94
4.20	The importance of alternative views of the term structure	95
4.21	Problems with monetary policy	96
4.22	Conclusions	96
5	Domestic and International Money Markets	99
5.1	Introduction	101
5.2	Types of domestic money market instruments	101
5.3	Treasury bills	101
5.4	Commercial paper	103
5.5	The interbank market	103
5.6	Banker's acceptances	104
5.7	Repurchase agreements	105
5.8	Certificates of deposit	105
5.9	The international money market	105
5.10	Euromarkets	106
5.11	The origins and development of the Euromarkets	106
5.12	The characteristics of the Eurodollar market	108
5.13	The competitive advantage of Eurobanks	110
5.14	The coexistence of domestic and Eurobanking	111
5.15	The creation of Eurodeposits	111
5.16	The pros and cons of the Eurocurrency markets	112
5.17	Syndicated loans	113
5.18	Euronotes	113
5.19	Conclusions	114
6	The Domestic and International Bond Market	117
6.1	Introduction	119
6.2	Trading in government bonds	119
6.3	Determining the price of government bonds	119
6.4	Clean and dirty bond prices	121
6.5	The current yield	121
6.6	The simple yield to maturity	122
6.7	Yield to maturity	122
6.8	The par-value relation	124
6.9	Bond price volatility	124
6.10	Duration	125
6.11	Modified duration	126
6.12	The duration for a portfolio of bonds	128
6.13	A formula to calculate duration	129

6.14	Duration and the problem of curvature of the bond–price relationship	129
6.15	The usefulness of the duration measure	130
6.16	Yield curves	131
6.17	Corporate bonds	131
6.18	Credit ratings	132
6.19	Risks associated with corporate bonds	136
6.20	Financial innovation and corporate bonds	137
6.21	Junk bonds	138
6.22	Medium-term notes	139
6.23	The international capital market	140
6.24	Motivations behind international capital flows	140
6.25	The origins and development of the Eurobond market	141
6.26	Typical features of a Eurobond	141
6.27	Control and regulation of the Eurobond market	144
6.28	The management of a Eurobond issue	145
6.29	Innovations in the Eurobond market	146
6.30	Conclusions	147
7	Portfolio Analysis: Risk and Return in Financial Markets	151
7.1	Introduction	153
7.2	Determining the price of a financial asset	153
7.3	The rate of return on a security	154
7.4	The variance and standard deviation of the rate of return	155
7.5	Risk on a security	156
7.6	Covariance and correlation of rates of return	157
7.7	Different types of investors	158
7.8	The indifference curves of risk-averse investors	159
7.9	Portfolio theory	160
7.10	Reducing risk through diversification	160
7.11	Measuring risk on a portfolio	161
7.12	The two-asset efficiency frontier	163
7.13	The minimum variance portfolio in the two risky asset case	165
7.14	The portfolio efficiency frontier	166
7.15	Market risk and specific risk	168
7.16	The efficient set with a riskless security	170
7.17	The market portfolio	172
7.18	The market price of risk	173
7.19	Measuring the market index	174
7.20	Conclusions	174
8	The Capital Asset Pricing Model	177
8.1	Introduction	179
8.2	The market model	179
8.3	Portfolio risk and return using the market model	181
8.4	The capital asset pricing model	182

8.5	Assumptions of the CAPM	182
8.6	The theory behind the CAPM	183
8.7	Expressing the CAPM in risk premium form	186
8.8	The securities market line	186
8.9	The CAPM in action: measuring the beta coefficient	189
8.10	Empirical testing of the CAPM	191
8.11	The empirical evidence on the CAPM	195
8.12	The multifactor CAPM	196
8.13	The arbitrage pricing theory (APT) critique of the CAPM	197
8.14	Conclusions	198
9	Stockmarkets and Equities	203
9.1	Introduction	205
9.2	The major international stockmarkets	205
9.3	Stockmarket participants	207
9.4	The primary and secondary market	207
9.5	Different types of equity	208
9.6	The buying and selling of shares	211
9.7	A rights issue	211
9.8	A simple model of the pricing of a rights issue	214
9.9	Does the performance of the stockmarket matter?	214
9.10	The pricing of equities	215
9.11	The dividend pricing approach	216
9.12	The Gordon growth model	216
9.13	A non-constant growth version of the dividend discount model	218
9.14	The dividend irrelevance theorem	219
9.15	Measurement of the required rate of return	220
9.16	The subjectivity of share pricing	221
9.17	Forecasting future dividends: business risk and the effects of gearing	221
9.18	Debt or equity finance?	227
9.19	Other approaches to equity valuation: financial ratio analysis	228
9.20	The usefulness of financial ratios	232
9.21	Conclusions	232
10	The Efficiency of Financial Markets	235
10.1	Introduction	237
10.2	Three levels of efficiency	238
10.3	The efficient market hypothesis and a random walk	238
10.4	Implications of various forms of efficiency tests	240
10.5	Active versus passive fund management	241
10.6	Testing for weak market efficiency	241
10.7	Tests of the random-walk hypothesis	241
10.8	Filter-rule tests	242
10.9	Other statistical tests	243
10.10	The day-of-the-week effect	243

10.11	The January effect	243
10.12	The winner–loser problem	244
10.13	Testing for semi-strong market efficiency	245
10.14	The results of event studies	250
10.15	The size effect	250
10.16	The price–earnings effect	250
10.17	The earnings-announcement effect	251
10.18	Stockmarket crashes	252
10.19	Testing the strong-form of market efficiency	252
10.20	Directors'/managers' share purchases	253
10.21	Information content of analysts' forecasts	253
10.22	Conclusions	254
11	The Foreign Exchange Market	257
11.1	Introduction	259
11.2	Exchange rate definitions	260
11.3	Characteristics of and participants in the foreign exchange market	260
11.4	Arbitrage in the foreign exchange market	264
11.5	The spot and forward exchange rates	265
11.6	A simple model for determining the spot exchange rate	265
11.7	Alternative exchange-rate regimes	268
11.8	Determination of the forward exchange rate	272
11.9	Nominal, real and effective exchange rates	279
11.10	Conclusions	285
12	Theories of Exchange Rate Determination	287
12.1	Introduction	289
12.2	Purchasing power parity theory	289
12.3	Absolute PPP	290
12.4	Relative PPP	290
12.5	Measurement problems in testing for PPP	291
12.6	Empirical evidence on PPP	294
12.7	Summary of the empirical evidence on PPP	297
12.8	Explaining the poor performance of purchasing power parity	298
12.9	Modern theories of exchange rate determination	299
12.10	Uncovered interest rate parity	299
12.11	Monetary models of exchange rate determination	300
12.12	The flexible-price monetary model	301
12.13	The Dornbusch sticky-price monetarist model	305
12.14	A simple explanation of the Dornbusch model	306
12.15	A formal explanation of the Dornbusch model	307
12.16	A money supply expansion and exchange rate overshooting	311
12.17	Importance of the Dornbusch overshooting model	313
12.18	The Frankel real interest rate differential model	313
12.19	Conclusions	315

13	Financial Futures	319
13.1	Introduction	321
13.2	The growth of futures exchanges	321
13.3	Comparison between futures and forward contracts	322
13.4	Exchange-traded derivative contracts versus the over-the-counter market	324
13.5	Trading in exchange futures contracts	324
13.6	The role of the clearing house	325
13.7	Open interest and reversing trades	325
13.8	Stock index futures	326
13.9	The symmetry of profits/losses on futures/forward positions	332
13.10	The pricing of stock index futures	334
13.11	Short-term interest rate futures	335
13.12	The pricing of a Euribor interest rate futures contract	337
13.13	Using interest rate futures	338
13.14	Bond futures contracts	339
13.15	Currency futures	340
13.16	The pricing of currency futures	342
13.17	Conclusions	343
14	Options	347
14.1	Introduction	349
14.2	The growth of options markets	349
14.3	Options contracts	350
14.4	A call option contract	351
14.5	A put option contract	353
14.6	Stock index options	354
14.7	Interest rate options	357
14.8	Currency options	358
14.9	The uses of option contracts	359
14.10	Differences between options and futures contracts	360
14.11	A currency option versus a forward contract for hedging	361
14.12	A currency option versus a forward contract for speculating	361
14.13	Option strategies	364
14.14	Exotic options	367
14.15	Conclusions	368
15	Option Pricing	371
15.1	Introduction	373
15.2	Principles of option pricing	373
15.3	Intrinsic value and time value	374
15.4	The distribution of the option premium between time and intrinsic value	375
15.5	The Black–Scholes option pricing formula	379
15.6	Different measures of volatility	383
15.7	The calculation of historical volatility	383

15.8	Problems with the Black–Scholes option pricing formula	386
15.9	The sensitivity of options prices	386
15.10	Put–call parity	387
15.11	Conclusions	389
16	Swap Markets	393
16.1	Introduction	395
16.2	Potential swap scenarios	395
16.3	An interest rate swap	398
16.4	A currency swap agreement	402
16.5	The role of the intermediary in the swap	405
16.6	The secondary market in swaps	407
16.7	Distinguishing characteristics of the swap market from the forward and futures markets	408
16.8	Reasons for the existence of the swap market	408
16.9	Innovations in the swap market	409
16.10	Conclusions	410
17	Financial Innovation and the Credit Crunch	411
17.1	Introduction	412
17.2	Financial innovation: collateralized debt obligations and credit default swaps	413
17.3	Special purpose vehicle/special purpose entity	416
17.4	A structured investment vehicle	417
17.5	Credit derivatives and credit default swaps	418
17.6	The pricing of credit derivatives	424
17.7	The credit crunch	427
17.8	Causes of the credit crunch	429
17.9	Legislative changes and deregulation	429
17.10	Deterioration in bank lending standards and adverse selection	432
17.11	Increase in household indebtedness	433
17.12	Financial innovation and the credit rating agencies	434
17.13	Increased leverage in the financial system	434
17.14	Mispricing of risk	435
17.15	Incentive structures and risk management practices in the banks	436
17.16	The response to the credit crunch	437
17.17	Cuts in official short-term interest rates	440
17.18	Liquidity provision	441
17.19	Quantitative easing	442
17.20	Fiscal stimulus	443
17.21	Bailouts of financial institutions	444
17.22	Conclusions	450

18	Regulation of the Financial Sector	457
18.1	Introduction	459
18.2	The rationale for government intervention	459
18.3	The objectives of government regulation	461
18.4	Types of government regulation	461
18.5	Regulation of the banking sector	463
18.6	Statutory versus self-regulation	465
18.7	Regulation in the UK	465
18.8	Big bang, 1986	466
18.9	The Financial Services Act 1986	467
18.10	The Banking Act 1987	468
18.11	The Bank of England Act 1998	469
18.12	Financial Services and Markets Act 2000	469
18.13	Banking Act 2009	469
18.14	European regulation	472
18.15	The First Banking Directive 1977	472
18.16	The Second Banking Directive 1989	473
18.17	International regulation: the Basel I Accord 1988	474
18.18	The Basel II Accord 2004	476
18.19	Issues for regulatory reform raised by the credit crunch	478
18.20	Conclusions	480
	<i>Glossary</i>	483
