**Part I  Knowledge Management within Business Communities**

1 The Business Environment .......................... 3
   1 Introduction ...................................... 3
      1.1 Business and strategy ....................... 5
   2 Processes as a way of doing business ........... 6
      2.1 Business process innovation ............... 6
   3 The emerging nature of business ............... 6
      3.1 Business activities ........................ 7
      3.2 Processes in business networking .......... 7
      3.3 Greater emphasis on knowledge .......... 8
   4 The emerging nature of knowledge-based processes 9
      4.1 Providing services to customers .......... 10
      4.2 Collaboration and knowledge management ... 10
   5 Dynamic environments and complex adaptive processes 11
      5.1 Businesses as collections of processes ... 12
   6 Summary .......................................... 12
   7 Questions and exercises ........................ 13
      Some further readings ........................ 13

2 Business Processes and Activities .............. 14
   1 Introduction ...................................... 14
   2 Describing a process as a set of connected business activities 14
      2.1 Business activities and processes ........ 17
      2.2 Process emergence .......................... 18
      2.3 Terminology for describing processes .... 19
      2.4 Processes in business networks .......... 20
   3 Introduction to knowledge management and process 23
      3.1 Combining knowledge management and business activities 23
| 4 Technologies to support knowledge-based processes | 24 |
| 5 Collaboration and team work | 25 |
| 5.1 Teams and communities | 26 |
| 6 Communities and knowledge management | 27 |
| 6.1 Developing social capital | 28 |
| 6.2 Linking technologies and social communities | 30 |
| 6.3 Linking technology and process | 32 |
| 7 Building communities on the internet | 33 |
| 7.1 Community networks and networked communities | 34 |
| 7.2 Communities sharing knowledge and information | 34 |
| 7.3 Building personal communities | 35 |
| 7.4 Extending to specialized communities of practice | 36 |
| 7.5 Agricultural developments | 37 |
| 7.6 Collaborative knowledge networks | 37 |
| 7.7 Trends in business application | 38 |
| 8 Summary | 38 |
| 9 Discussion questions | 39 |
| Case study I – Data collection | 40 |
| Some further readings | 41 |

### 3 Connecting People Within Business Activities

#### 1 Introduction

1. Connectivity – Keeping track of everything
   - 2.1 Improving connectivity – Context and awareness
   - 2.2 Context
   - 2.3 Awareness
   - 2.4 The common options for keeping track of contexts

#### 3 Connectivity and interactivity

- 3.1 The role of technology in improving productivity

#### 4 Social networking and social network diagrams

- 4.1 Extending social networks to create enterprise social networks

#### 5 Types of business activities

- 5.1 Kind of work carried out by people

#### 6 Combining social networks and business activities

- 6.1 Leadership roles for transactive work
- 6.2 Coordination role
- 6.3 Facilitator role in collaboration
- 6.4 Advisory or expert roles
- 6.5 Dual roles

#### 7 Choosing collaboration structures

#### 8 Using the enterprise social network in process design

- 8.1 Simplifying connectivity
- 8.2 Decomposing activities
4 Collaboration, Knowledge and Innovation

1 Introduction

2 The role of collaboration in leveraging knowledge management and innovation
   2.1 What to change to encourage innovation?

3 What is knowledge and knowledge management?
   3.1 Tacit and explicit knowledge
   3.2 Describing knowledge
   3.3 Knowledge metaphors
   3.4 Knowledge assimilation

4 Activities in developing knowledge
   4.1 Finding knowledge
   4.2 Retaining knowledge
   4.3 Transferring and sharing knowledge

5 Directions for knowledge management
   5.1 Nonaka’s knowledge creation process
   5.2 Davenport and Prusak
   5.3 Forming perspectives
   5.4 Enabling knowledge sharing and creation
   5.5 Nonaka’s enablers

6 Implementing strategies for knowledge management
   6.1 Codification and personalization
   6.2 Steps in managing knowledge
   6.3 Knowledge officers

7 The innovation process
   7.1 Innovation metaphors
   7.2 Innovation processes
   7.3 Adoption of innovation
   7.4 Strategic communities in planning
   7.5 Strategies for innovation through open networks
   7.6 Proactively innovating new strategy
   7.7 A generic model for responding to situations

8 Some guidelines for matching collaboration to business activities
   8.1 Awareness - The simplest form of collaboration

9 Guidelines for collaboration in business activities
   9.1 Example - Integrative task focused activity - Developing reports
10 Combining activities into larger networks 93
   10.1 Emergent large-scale activities – Combining planning, coordination and task execution 93
   10.2 Example – Assessing emergency situation 95
11 Summary 96
12 Questions and exercises 97
   Case study III – Installing and managing back-up power installations 97
   Some further readings 99

5 Culture and Knowledge Sharing 100
1 Introduction 100
   1.1 Globalization 102
2 What is culture? 102
   2.1 Describing culture 103
   2.2 Context and time as part of culture 104
   2.3 The relationship of community and individual culture 105
3 Institutional cultures 105
   3.1 Professional cultures 106
4 Communication and culture 107
   4.1 The importance of language in communication 108
   4.2 Language and the Internet 108
   4.3 The influence of the Internet 108
   4.4 Implication for website design 109
5 Culture and knowledge sharing 109
   5.1 The influence of social factors 110
   5.2 The influence of intercommunity factors 110
   5.3 The importance of trust in knowledge sharing 111
   5.4 The influence of technology 111
6 Reducing resistance to knowledge sharing 111
7 Changing organizational culture 112
   7.1 The role of human relations (HR) policies 112
   7.2 Building trust 112
   7.3 Organizing communication across the enterprise 113
   7.4 Sharing knowledge across global organizations 113
8 Facilitating intercommunity knowledge sharing 114
   8.1 Project coordination 115
   8.2 Cross-functional teams 116
9 Organizational problem solving 117
10 Summary 118
11 Discussion questions 118
   Case study IV – Global marketing of ‘Green’ cosmetics 119
   Some further readings 121
CONTENTS

6 Social Software

1 Introduction 122
2 Recreational use – The social networking sites 124
  2.1 Early blogsites 124
  2.2 Facebook and MySpace 124
  2.3 The economies of personal sites 125
  2.4 Use of blog hosts 125
  2.5 Professional use 127
  2.6 Extending to business applications 127
3 Organizing social software for business applications 128
  3.1 Maintaining awareness 129
  3.2 Communities of practice and social software 129
  3.3 Knowledge hubs 130
  3.4 The issue of governance 130
  3.5 Capturing best practices 131
  3.6 Guidelines for implementation 132
4 Discussion boards 133
5 Blogs 134
  5.1 Applications of blogs to business 135
  5.2 Sharing knowledge through blogs 136
  5.3 What are the standard terms? 136
  5.4 Who does the tagging – A governance issue? 137
  5.5 Who does the searching? 137
6 Wikis 137
7 Using social software to capture knowledge 139
8 Ultimate goal – Integration of services to support knowledge communities 140
  8.1 Sharing knowledge across business activities 140
9 What of the future? 142
10 Summary 142
11 Exercises 143

Some further readings 144

Part II Current Business Systems

7 Today’s Business Applications 147

1 Introduction 147
2 Traditional business models 148
  2.1 Business units in material flow 149
  2.2 Achieving competitive advantage 151
  2.3 Adding value 151
3 Enterprise resource planning 152
  3.1 The impact of ERP systems 153
  3.2 ERP systems and knowledge management 154

5 Outsourcing 189
  5.1 Deciding what and whether to outsource 190
  5.2 Choosing a vendor or provider 191
  5.3 Reducing risk 191
  5.4 Arranging the contract 191
  5.5 Maintaining the relationship 191
  5.6 Outsourcing business processes 192
  5.7 Managing outsourcing 193
  5.8 Collaboration in outsourcing 194
6 Product development 196
  6.1 The apparel industry — An example of dynamic capability 196
  6.2 Product development activities and processes 197
  6.3 ERP systems — Manufacturing resource planning 198
  6.4 Collaboration in product development 200
7 Extending product development to services 201
  7.1 Services to clients 201
  7.2 Delivering dynamic capability to business services 201
  7.3 Finding experts or people to work with 202
  7.4 Services for fault tracing 202
  7.5 Technical services 204
8 Summary 205
9 Discussion Questions 205
  Case study VI — Responding to trouble reports in supply chains 206
  Some further readings 207

Part III Organizing for Knowledge Management 211

9 Modeling Business Activities 211
  1 Introduction 211
  2 Revision of business activity model 212
    2.1 The importance of roles 213
    2.2 Some examples of BAMs 214
    2.3 Going into more detail 215
  3 Modeling the process perspective 216
    3.1 Modeling methods for predefined processes 218
    3.2 Methods for non-predefined processes 219
    3.3 Informal methods 220
  4 Modeling the organizational perspective 222
  5 Modeling the knowledge perspective 223
  6 Modeling as part of system development 224
    6.1 System development methods 225
    6.2 System development methods for predefined processes 226
    6.3 Open methods 227
6.4 Notification schemes
6.5 Implications for managing system development

7 Summary
8 Exercises
Some further readings

10 The First Design Step: Defining Requirements
1 Introduction
2 The evolving business architecture
3 Methods for defining requirements
   3.1 Choosing your own design process
   3.2 Design choices – Who is the driver
   3.3 Cross organizational issues
4 Some techniques being proposed for open design processes
   4.1 Metaphors
   4.2 Design knowledge and patterns
   4.3 The importance of having a vision
   4.4 The importance of alternatives
5 Option 1 – A totally open and bottom-up approach
6 Option 2 – A systematic (Up and Down) approach
   6.1 The systematic approach – What are the design steps
   6.2 Integrating socio-technical analysis into the systematic approach
7 Developing intention (Phase 1)
   7.1 Phase 1 Design steps
8 Example – A global marketing services (GMS) organization
   8.1 Business activities
   8.2 Information
   8.3 Social networking
   8.4 Alternative 1 – Outsourcing selected non-core processes
   8.5 Alternative 2 – Specializing internal operations
   8.6 Alternative 3 – A strategic change – Opening branches or franchises
   8.7 Making the decision
9 Summary
10 Questions and Exercises
    Case study VII – Organizing experts
    Some further readings

11 Creating the Business Architecture: Combining Activities, Knowledge and People
1 Introduction
2 A Blueprint to describe the business architecture
3 The Design process to specify new business architecture
CONTENTS

4 Starting with business activity design 270
  4.1 Developing the top-level activity diagram 270
  4.2 Refining the activities 271
  4.3 Look at alternatives 272
  4.4 Including the social perspective 272
5 Designing individual business activities 273
  5.1 Questions to ask during activity design 275
  5.2 A simple example – Part ordering 276
  5.3 Another example – Consulting services 277
6 Designing the top-level structure – GMS example 279
  6.1 Identifying and organizing business activities 279
  6.2 Defining the enterprise social network 281
  6.3 Designing the database and collaborative knowledge base 282
7 Defining scenarios 284
  7.1 Scenarios 284
  7.2 Scenario for activity in contract development 285
8 Summary 286
9 Continuation of case studies 286
Some further reading 286

Part IV Supporting Technologies

12 Specifying Electronic Workspaces for the Business Architecture 289
  1 Introduction 289
  2 Networks of electronic workspaces 290
  3 Specifying workspace requirements 292
    3.1 Specifying workspace components 293
    3.2 Workspace dynamics 293
    3.3 Managing workspaces 295
    3.4 Workspace governance 295
  4 Using business architecture models to specify electronic workspaces 297
    4.1 Example – GMS – Marketing organization 297
    4.2 Creating the workspace 299
  5 Summary 299
  6 Questions and Exercises 300
    Some further readings 302

13 Technologies for Business Processes 303
  1 Introduction 303
  2 Defining Technology Requirements 304
    2.1 Technology trade-offs 306
  3 The ERP component 307
    3.1 Document management systems 307
3.2 Workflow management systems 307
3.3 Setting up a process workflow 308
3.4 Setting up ERP systems 309
3.5 Extending ERP 309
4 Middleware technologies for knowledge support 309
5 Trends to fully customizable technologies 310
  5.1 Web 2.0 310
  5.2 Service oriented architectures 311
6 Lightweight platforms for constructing workspaces 312
  6.1 Lightweight exchange 313
  6.2 Lightweight collaboration 314
  6.3 Lightweight workflow 315
  6.4 Technologies for lightweight workspaces 316
7 Choosing technologies to support business activities 317
  7.1 Example – Marketing organization example 318
  7.2 A more detailed specification of the services required for work processes 319
8 Summary 319
9 Continuation of case studies 320
Some further readings 320

14 Connecting Enterprises 321
  1 Introduction 321
  2 Typical industry wide networks 322
  3 Creating the business connections 324
    3.1 Virtual organizations 326
    3.2 Emerging objectives 326
  4 Growing cross-organizational relationships 326
    4.1 Strategic engagements 327
  5 Business networks planning 328
    5.1 The organizational perspective – Develop a joint vision 329
    5.2 Set objectives and priorities by defining projects 330
    5.3 Define organizational arrangements 330
  6 The social perspective – Developing a connection plan 330
  7 Technical architecture to support enterprise integration 331
  8 Summary 332
  9 Projects 333
Some further readings 333

Glossary of Some Often Used Terms in Modeling and Design 335
Bibliography 336
Index 343
