Sustainable Growth and Resource Productivity

ECONOMIC AND GLOBAL POLICY ISSUES

EDITED BY RAIMUND BLEISCHWITZ, PAUL J.J. WELFENS AND ZHONGXIANG ZHANG
Contents

Introduction 1

Raimund Bleischwitz, Paul J.J. Welfens and ZhongXiang Zhang

Part I: Raw materials supply and resource use from a global perspective 13

1 Will the mining industry meet the global need for metals? 14
   Magnus Ericsson

2 Global resource use in a business-as-usual world up to 2030: updated results from the GINFORS model 30
   Christian Lutz and Stefan Giljum

3 Development and growth in mineral-rich countries 42
   Thorvaldur Gylfason

4 The physical dimension of international trade, 1962–2005: empirical findings and tentative conclusions 85
   Monika Dittrich

5 Defining critical materials 99
   Thomas E. Graedel

Part II: The economics of resources and sustainable growth 109

6 Explaining oil price dynamics 110
   Paul J.J. Welfens

7 Technological catch-up or resource rents?
   A production frontier approach to growth accounting 118
   Natalia Merkina
### Part III: Empirical analysis of resource productivity: trends and drivers
