Contents

<i>Acknowledgments</i>	xi
<i>Foreword: NYU Abu Dhabi and the Sustainable Environment</i>	xiii
<i>Mariët Westermann and Philip Kennedy</i>	
<i>Summary of Key Findings and Recommendations</i>	xv
<i>About the Contributors</i>	xvii

PART I Climate Change and Mitigation: Overview and Key Themes

1	Climate Finance for Limiting Emissions and Promoting Green Development: Mechanisms, Regulation, and Governance	3
	<i>Richard B. Stewart, Benedict Kingsbury, and Bryce Rudyk</i>	
2	Understanding the Causes and Implications of Climate Change	35
	<i>Michael Oppenheimer</i>	
3	The Climate Financing Problem: Funds Needed for Global Climate Change Mitigation Vastly Exceed Funds Currently Available	42
	<i>Bert Metz</i>	
4	The Future of Climate Governance: Creating a More Flexible Architecture	48
	<i>Daniel Bodansky</i>	

PART II		Proposals for Climate Finance: Regulatory and Market Mechanisms and Incentives	
A. Trading or Taxes?			
5	Cap-and-Trade Is Preferable to a Carbon Tax		57
	<i>Nathaniel O. Keohane</i>		
B. Reforming the Clean Development Mechanism (CDM)			
6	Expectations and Reality of the Clean Development Mechanism: A Climate Finance Instrument between Accusation and Aspirations		67
	<i>Charlotte Streck</i>		
C. Sectoral Programs for Emissions Control and Crediting			
7	Why a Successful Climate Change Agreement Needs Sectoral Elements		79
	<i>Murray Ward</i>		
8	Sectoral Crediting: Getting the Incentives Right for Private Investors		85
	<i>Rubén Kraiem</i>		
9	Forest and Land Use Programs Must Be Given Financial Credit in Any Climate Change Agreement		90
	<i>Eric C. Bettelheim</i>		
10	Stock-and-Flow Mechanisms to Reduce Land Use, Land Use Change, and Forestry Emissions: A Proposal from Brazil		96
	<i>Israel Klabin</i>		
D. Leveraging Trading to Maximize Climate Benefits			
11	Mitigating Climate Change at Manageable Cost: The Catalyst Proposal		105
	<i>Bert Metz</i>		
12	Engaging Developing Countries by Incentivizing Early Action		111
	<i>Annie Petsonk, with Dan Dudek, Alexander Golub, Nathaniel O. Keohane, James Wang, Gernot Wagner, and Luke Winston</i>		

E. Linking Trading Systems

- 13 Carbon Market Design: Beyond the EU Emissions Trading Scheme 125
Henry Derwent

F. Investor Perspectives

- 14 Incentivizing Private Investment in Climate Change Mitigation 135
Marcel Brinkman
- 15 Investment Opportunities and Catalysts: Analysis and Proposals from the Climate Finance Industry on Funding Climate Mitigation 143
Nick Robins and Mark Fulton

PART III Bringing Developed and Developing Countries Together in Climate Finance Bargains: Trust, Governance, and Mutual Conditionality

A. Meeting Developing Country Climate Finance Priorities

- 16 Developing Country Concerns about Climate Finance Proposals: Priorities, Trust, and the Credible Donor Problem 157
Arunabha Ghosh and Ngaire Woods
- 17 Developing Countries and a Proposal for Architecture and Governance of a Reformed UNFCCC Financial Mechanism 165
Luis Gomez-Echeverri
- 18 Climate Change and Development: A Bottom-Up Approach to Mitigation for Developing Countries? 172
Navroz K. Dubash
- 19 Operationalizing a Bottom-Up Regime: Registering and Crediting NAMAs 179
Rae Kwon Chung

B. Conditionality and Its Governance

- 20 From Coercive Conditionality to Agreed Conditions:
The Only Future for Future Climate Finance 189
Jacob Werksman
- 21 Getting Climate-Related Conditionality Right 197
Kevin E. Davis and Sarah Dadush
- 22 Making Climate Financing Work: What Might
Climate Change Experts Learn from the
Experience of Development Assistance? 206
Ngairé Woods
- PART IV National Policies: Implications for the Future
Global Climate Finance Regime
- 23 Climate Legislation in the United States: Potential
Framework and Prospects for International
Carbon Finance 213
Nathaniel O. Keohane
- 24 The EU ETS: Experience to Date and Lessons for
the Future 221
James Chapman
- 25 Greenhouse Gas Emissions and Mitigation Measures
in China 228
Jie Yu
- 26 Cities and GHG Emissions Reductions: An Opportunity
We Cannot Afford to Miss 234
Partha Mukhopadhyay
- 27 A Prototype for Strategy Change in Oil-Exporting
MENA States? The Masdar Initiative in Abu Dhabi 241
Sam Nader
- PART V Climate Finance and World Trade Organization
(WTO) Law and Policy
- 28 The WTO and Climate Finance: Overview of the Key Issues 247
Gabrielle Marceau

29	Carbon Trading and the CDM in WTO Law <i>Robert Howse and Antonia Eliason</i>	254
30	Countervailing Duties and Subsidies for Climate Mitigation: What Is, and What Is Not, WTO-Compatible? <i>Robert Howse and Antonia Eliason</i>	259
31	Border Climate Adjustment as Climate Policy <i>Alexandra Khrebtukova</i>	266
32	Enforcing Climate Rules with Trade Measures: Five Recommendations for Trade Policy Monitoring <i>Arunabha Ghosh</i>	272
33	Carbon Footprint Labeling in Climate Finance: Governance and Trade Challenges of Calculating Products' Carbon Content <i>Sandra G. Mayson</i>	281
PART VI Taxation of Carbon Markets		
34	Fiscal Considerations in Curbing Climate Change <i>Lily Batchelder</i>	291
35	Tax and Efficiency under Global Cap-and-Trade <i>Mitchell A. Kane</i>	300
36	Tax Consequences of Carbon Cap-and-Trade Schemes: Free Permits and Auctioned Permits <i>Yoram Margalioth</i>	305
	Afterword: Reflections on a Path to Effective Climate Change Mitigation <i>Thomas Heller</i>	311
	<i>Abbreviations</i>	317
	<i>Index</i>	321
