Foreword by William F. Shughart II ............................................................................................... xv
The Setting ......................................................................................................................................... xix

Chapter 1: Introduction .................................................................................................................. 1

Chapter 2: The Great Depression and Its Aftershocks, 1929 – 1939: An Analytical History .... 7

2.1. Monetary policy: first easy money, then deflation ................................................................. 9
2.2. Ben Bernanke and the “financial accelerator” ....................................................................... 12
2.3. Taxes and spending: was fiscal responsibility a vice? ............................................................ 13
2.4. Microeconomic policies .......................................................................................................... 15
2.5. FDR’s assault on the Constitution and the rule of law .......................................................... 16
2.6. Pessimistic expectations: a case of self-fulfilling prophecy .................................................. 18
2.7. Conclusion: a failure of government ......................................................................................... 19

Chapter 3: George W. Keynes and Franklin Delano Obama: The 2007-8 Financial Crisis and Economic Collapse: Causes and Consequences ......................................................... 23

3.1. The great 1990s boom and its aftermath ................................................................................. 24
3.2. Fiscal and monetary policy in the Bush era were highly expansionary (Keynesian) .......... 26
Economic Contractions in the United States

3.3. Consumer price inflation remained subdued due to rising productivity, globalization, and capital inflows 31
3.4. Easy money fueled a house price bubble, low real interest rates, and a surge in personal indebtedness 33
3.5. The return of debt-deflation 37
3.6. The financial collapse 38
3.7. Public debt and business investment: a Virginia political economy perspective 40
3.8. An explosion of intervention: stimuli, bank bailouts, Fannie Mae and Freddie Mac, TARP and TALF 44
3.9. The Obama “stimulus” bill, and the new fiscal outlook 46
3.10. The Federal Reserve resorts to unorthodox methods 49
3.11. President Obama’s initiatives threaten the rule of law 49

Chapter 4: Laissez-Faire Capitalism has not failed in the United States 55

4.1. Laissez-faire capitalism versus state capitalism 55
4.2. Has the efficient capital market hypothesis been falsified by the financial crisis? 56
4.3. The nature of the principal-agent problem in financial institutions 58
4.4. The sources of moral failure 60

Chapter 5: Public-Choice-Compatible Policy Recommendations .... 63

5.1. Monetary policy: quantitative easing 65
5.2. Re-inflate housing prices through immigration reform 67
5.3. Unilateral free trade: suspend all tariffs and trade barriers 68
5.4. Labor markets: extend the right to work 69
5.5. Just say no to (conventional) fiscal stimulus 70
5.6. Social Security reform 73
5.7. Establish a plan for long-term budget balance 74
5.8. Use the bankruptcy code to deal with failing automobile corporations 75
## Contents

5.9. How best to deal with failing banks: no bail-outs, no nationalization 77
5.10. No bail-outs for private debtors 83

**CHAPTER 6: The Regulatory Framework** ......................................................... 87

6.1. The path to regulatory failure 87
6.2. A public-choice-consistent framework for regulating the financial sector 89

**CHAPTER 7: Conclusions** ........................................................................... 95
