Business Intelligence in Economic Forecasting: Technologies and Techniques

Jue Wang
Chinese Academy of Sciences, China

Shouyang Wang
Chinese Academy of Sciences, China
Table of Contents

Foreword .................................................................................................................................xiii

Preface .................................................................................................................................xiv

Section 1
BI in Macro-Economic Analysis and Forecasting

Chapter 1
Macroeconomic Forecasting Using Genetic Programming Based Vector Error Correction Model .........................................................................................................................1

Xi Chen, Deloitte Financial Advisory Services, China
Ye Pang, The People’s Insurance Company (Group) of China Limited, China
Guihuan Zheng, The People’s Bank of China, China

Chapter 2
Economic Forecasting Techniques and Their Applications .................................................................................................................................16

Cengiz Kahraman, Istanbul Technical University, Turkey
Ihsan Kaya, Istanbul Technical University, Turkey
H. Ziya Ulukan, Galatasaray University, Turkey
Irem Uçal, Istanbul Technical University, Turkey

Chapter 3
Logistic Analysis of Business Cycles, Economic Bubbles and Crises ...............................................................................................................45

Stasys Girdzijauskas, Vilnius University, Lithuania
Dalia Streimikiene, Vilnius University, Lithuania

Chapter 4
A Visualization and Clustering Approach to Analyzing the Early Warning Signals of Currency Crises .........................................................................................65

Shuhua Liu, Standford University, USA
Tomas Eklund, Abo Akademi University, Finland
Mikael Collan, Abo Akademi University, Finland
Peter Sarlin, Abo Akademi University, Finland
Chapter 5
Economic Analysis of Systems Under a Monopoly Based on a Reliability-Quality Index

Takeshi Koide, Konan University, Japan
Hiroaki Sandoh, Osaka University, Japan
Wuyi Yue, Konan University, Japan

Section 2
BI in Financial Markets Analysis and Forecasting

Chapter 6
A Confidence-Based RBF Neural Network Ensemble Learning Paradigm with Application
to Delinquent Prediction for Credit Risk Management

Lean Yu, Chinese Academy of Sciences, China
Shouyang Wang, Chinese Academy of Sciences, China

Chapter 7
Empirical Evaluation of Ensemble Learning for Credit Scoring

Gang Wang, Fudan University, PR China & City University of Hong Kong, Hong Kong
Jin-xing Hao, City University of Hong Kong, Hong Kong
Jian Ma, City University of Hong Kong, Hong Kong
Li-hua Huang, Fudan University, PR China

Chapter 8
Bankruptcy Prediction Using Principal Component Analysis Based Neural Network Models

G. A. Rekha Pai, Nirmala College for Women, India
G. A. Vijayalakshmi Pai, PSG College of Technology, India

Chapter 9
A Mixture Price Trend Model for Long-Term Risk Management

Eric S. Fung, Hong Kong Baptist University, Hong Kong, China
Wai-Ki Ching, The University of Hong Kong, Hong Kong, China
Tak-Kuen Siu, Macquarie University, Australia

Chapter 10
Increasing Translation Invariant Morphological Forecasting Models for
Stock Market Prediction

Ricardo de A. Araújo, [gm]² Intelligent Systems, Brazil

Chapter 11
On the Efficient Dynamical Financial Analysis Computation Supported by UML(VR)

Leszek Kotulski, AGH University of Science and Technology, Poland
Marcin Tusiewicz, AGH University of Science and Technology, Poland
Dariusz Dymek, Cracow University of Economics, Poland
Chapter 12
Forecasting Crude Oil Demand Using a Hybrid SVR and Markov Approach ........................................ 235
Wei Xu, Chinese Academy of Sciences, China
Jue Wang, Chinese Academy of Sciences, China
Jian Ma, City University of Hong Kong, Hong Kong

Chapter 13
Analysis and Forecasting of Port Logistics Using TEI@I Methodology .................................................. 248
Xin Tian, Graduate University of Chinese Academy of Sciences, China & Polytechnic University of Hong Kong, Hong Kong
Lizhi Xu, BeiHang University, China
Liming Liu, Polytechnic University of Hong Kong, Hong Kong
Shouyang Wang, Chinese Academy of Sciences, China

Chapter 14
Time Series Based House Sale Value Market Forecasting Using Genetically Evolved Neural Networks .......................................................... 265
George S. Atsalakis, Technical University of Crete, Greece
Kimon P. Valavanis, University of Denver, USA
Constantinos D. Zopounidis, Technical University of Crete, Greece
Dimitris Nezis, Technical University of Crete, Greece

Chapter 15
Implementing Business Intelligence in Electricity Markets ................................................................. 283
José Ramón Cancelo, Universidade da Coruña, Spain
Antoni Espasa, Universidad Carlos III de Madrid, Spain

Chapter 16
Electricity Demand Forecasting ........................................................................................................... 296
Fawwaz Elakrmi, Amman University, Jordan
Nazih Abu Shikhah, Amman University, Jordan

Chapter 17
Electricity Load Forecasting Using Machine Learning Techniques ................................................... 318
Manuel Martin-Merino Acera, University Pontificia of Salamanca, Spain

Compilation of References ......................................................................................................................... 337

About the Contributors ............................................................................................................................. 368

Index ......................................................................................................................................................... 377
