**Part I: China’s Exchange Rate System Reform**  
1  
**Chapter 1** Macroeconomic Conditions and Debates Before the Reform  
3  
1.1 Macroeconomic Conditions Before the Reform  
3  
1.1.1 The Beginning of China’s Persistent Trade Surplus 3  
1.1.2 The Asian Financial Crisis: The Beginning  
of the Peg to US Dollar 6  
1.1.3 The Weakening US Dollar Since Early 2002:  
Reasons and Impact 8  
1.1.4 Other Macroeconomic Performance Before  
the Reform 11  
1.2 Debate Before the Reform: Risk of Various Proposals 13  
**Chapter 2** Transitional and Medium-Term Designs of the Reform  
17  
2.1 The Proposed Transitional Reform  
17  
2.1.1 Gradual Appreciation, No Major or Medium Jump  
in Exchange Rate and No Widening of Band 17  
2.1.2 A Basket of Currencies with Special Care to the  
Exchange Rate Against the US Dollar at the  
Early Stage 19  
2.1.3 A Narrow Exchange Rate Band at the Early Stage 20
2.2 The Proposed Medium-Term Arrangements 20

2.2.1 The Debating Process Before the Medium-Term Recommendation 20

2.2.2 The Medium-Term Recommendation 26

Chapter 3 Supplementary Measures 31

3.1 Prolonged Asset Inflation and Then Economic Crisis: A Major Potential Threat to China's Economic Development 31

3.2 Supplementary Measures 32

3.2.1 Banking Reform 33

3.2.2 Control of Asset Inflation 34

3.2.3 Variable Wage Component 36

3.2.4 Capital Control 38

Chapter 4 The Transitional Reform in 2005 39

4.1 The Reform Announced in July 2005 39

4.2 Market Response at the Early Stage 41

4.3 Two Important Characteristics That Contribute to the Initial Success 43

4.4 Proposed Measures to Deal with the Speculative Inflows 44

4.4.1 Measures That Discourage Speculative Inflows 45

4.4.2 Measures That Offset the Impacts of Speculative Inflows 46

4.5 Further Discussions on the Offsetting Measures 48

4.5.1 Importance of Maintaining Capital Control at That Time 48

4.5.2 The Moderate Speculative Inflows Was Still within the Central Bank's Sterilization Capacity 49

4.5.3 Two Other Important Sources of Inflows 49

4.5.4 Some Basic Principles to Guide the Direction of the Offsetting Measures 50

4.5.5 Ways to Build in More Controllability and Adjustability on Potential Outflows 54

4.6 More Following-Up Comments on the Offsetting Measures 60

4.6.1 Need to Scale Up the Offsetting Measures and Maintain a Trade Surplus 60
4.6.2  An Accounting Hurdle on the Recommended Sterilization

4.7  Actions Taken by the Chinese Government

4.8  The Moderate Mistake Committed by China’s Central Bank Between Mid-2006 and Early 2008

Chapter 5  Further Proposals on Supplementary Measures After the Transitional Reform

5.1  The Potential Disaster of Developing the Renminbi Forward or Futures Market at That Time
  5.1.1  The Chinese Central Bank’s Initial Proposal to Develop the Renminbi Forward Market
  5.1.2  The Potential Damage
  5.1.3  The Central Bank’s Decision to Freeze the Development of the Renminbi Futures Market
  5.1.4  Hong Kong’s Intention to Establish the Renminbi Futures Market

5.2  Further Proposals to Increase China’s Immunity and Resilience Against Financial Crisis
  5.2.1  Law to Increase Speculators’ Non-Economic Risk
  5.2.2  Development of the Renminbi Forward or Futures Market Should Be the Last Step of the Reform

5.3  Further Proposals on the Banking Reform
  5.3.1  Non-Performing Loans in Chinese Banks Were Huge
  5.3.2  The Three-Step Injections Had Strengthened the Capital Adequacy Ratio of the Chinese Banks
  5.3.3  The Keys Would Still Be Proper Internal Control, Proper Lending Criteria and Proper Lending Behaviors
  5.3.4  The Strategy of Inviting Foreign Strategic Participation Had Helped Avoid an Immediate Crisis
  5.3.5  Not All the Products or Services in Foreign Banks Are Worth Importing
  5.3.6  Why Foreign Strategic Partners Have Strong Incentives to Help Establish Internal Control within the Banks
  5.3.7  Starting the Anti-Corruption from the Banking Industry
Chapter 8  China’s Stock Market Bubble and Lessons from the Bubble Squeezing Strategy

8.1 Excessive Asset Inflation: The More Likely Cause of a Failed Reform

8.2 The Formation of a Stock Market Bubble in 2006–2007
   8.2.1 The Sharp Rise of Share Prices in 2006
   8.2.2 The Moderate Corrections in Early 2007
   8.2.3 The Sharp Rise in March–May 2007
   8.2.4 The Correction in May–June 2007
   8.2.5 The Surge Since July 2007

8.3 The Economic and Political Risks of a Bursting of Asset Bubble: China’s Last Chance to Gradually Squeeze the Bubble?
   8.3.1 The Risk of Being Kidnapped by the High Share Price
   8.3.2 Two Types of Bubble Bursting
   8.3.3 The Curbing Measures Engineered by the Party Leader

8.4 The Gradual Bubble Squeezing Strategy
   8.4.1 Early 2008: Low Risk of Second Type of Bubble Bursting, But Still High Risk of First Type of Bursting
   8.4.2 The Strategy: Squeeze Only Part of the Bubble
   8.4.3 Stock Price in Early 2008 Was Still Substantially Over-Valued
   8.4.4 The Danger of Selective Listening and Unrealistic Trusting-To-Luck
   8.4.5 The Need to Squeeze Another Part of the Bubble

8.5 The Correction in 2008: From Bubble Squeezing to Avoidance of Over-Correction
   8.5.1 Further Corrections in 2008Q1 to a Less Vulnerable Level
   8.5.2 The Shift from Bubble Squeezing to Avoidance of Over-Correction
   8.5.3 The Global Recession and Further Plunges in Share Price in 2008H2
Chapter 9  China’s Property Inflation I: Root Causes and Consequences

9.1 Movements of Property Price in Recent Years: The Rapid Rise Since 2004 204
   9.2.1 High Income Inequality 207
   9.2.2 Huge Barriers of Entry 208
   9.2.3 High Fixed Development Cost and Hoarding of Lands 211
   9.2.4 The Market Structure Problem: Asymmetries Between Buyers and Sellers, No Supply Curve in China’s Property Market 212
   9.2.5 Speculative and Panic Demand 214
   9.2.6 Other Undesirable Effects 218
   9.2.7 Implications of the Above Analysis 223
9.3 Macroeconomic Costs and Systemic Risk 225
   9.3.1 Excessive Rise in Property Price 226
   9.3.2 Macroeconomic Consequences of the Excessive Property Inflation 231
9.4 Lessons From Hong Kong 232
9.5 Summary on the Costs and Risk of Letting “Free” Market Force to Guide China’s Property Market Under the Imperfect Settings 237

Chapter 10 China’s Property Inflation II: Recommended Solution

10.1 The Recommended Solution 239
   10.1.1 The Basic Structure of the Proposal 239
   10.1.2 How “Substantial” Is Sufficient? 242
   10.1.3 What Price Should the Government Choose? 243
   10.1.4 Why It Has to Be Profitable to the Government? 245
10.1.5 Use the Substantial Public Housing Construction to Offset the Soon Arriving Recession

10.1.6 Impacts of the Proposal

10.2 The Proposal in September 2008

10.3 The Warning and More Detailed Proposals in March 2010

10.3.1 A Summary on the Undesirable Consequences of Just Relying on Market Force to Do the Allocation Job in China's Property Market

10.3.2 Adding the Necessary Competition into China's Property Market

10.3.3 Containing the Potential Correction of Private Property Price: More Classes of Public Flats With Price as the Hard Target

10.3.4 Risk of Just Relying on Standard Tightening Measures

10.4 The Tightening Measures Since April 2010 and the Subsequent Developments

10.4.1 The Tightening Measures in April 2010

10.4.2 The Dangerous Counter-Proposal in July 2010

10.4.3 The Proper Policy Mix

10.4.4 Other Dimensions of the Proposal

10.4.5 Further Comments in August 2010

10.4.6 The Administrative Restriction on Flat Purchase

10.4.7 Remarks on the Administrative Restrictions

10.5 Continuing the Anti-Corruption Strategy From the Housing Sector

10.5.1 The Strategy of Cleaning Corruption Sector-by-Sector

10.5.2 The Strategy of Cleaning-and-Consolidation Followed by Another Cleaning-and-Consolidation

10.5.3 Why the Banking Sector and Then the Housing Sector

10.5.4 Importance of Proper Implementation and Counter-Checking
Chapter 11  Fiscal and Monetary Policies During the Global Financial Tsunami

11.1 Signs of an Economic Slowdown in 2007H2 and Early 2008  277
11.2 Potential Consequences of the Anticipated Plunge in US Property Prices
   11.2.1 Somebody Had to Absorb the Loss  286
   11.2.2 No Painless Solution to the Bursting of Property Bubble  288
   11.2.3 The Global Economy Was Still at the Beginning and Deepening Stage of the Great Recession  291
11.3 The Debate With the Central Bank in 2008Q2-Q3  295
11.4 The Ultra Expansionary Fiscal Policies
   11.4.1 Tax Rebate Instead of Tax Reduction  303
   11.4.2 Substantial Public Housing Constructions  305
   11.4.3 Huge Infrastructural Constructions  309
   11.4.4 The Four-Trillion-Yuan Fiscal Expansion  309
11.5 The Interest Rate Policy
   11.5.1 Better to Start the Interest Rate Cuts Before the Slowdown  314
   11.5.2 China’s Failure to Cut the Interest Rate Before the Slowdown  316
   11.5.3 First Interest Rate Cuts and Fiscal Expansion, Then Quantity Easing  316
11.6 The Substantial Quantity Easing in Credit and Money Supply
   11.6.1 Time for Substantial Quantity Easing  319
   11.6.2 Some Preliminary Points Before the Discussion  319
   11.6.3 Why Necessary to Use Ultra Expansionary Fiscal and Monetary Policies?
Chapter 12  Macroeconomic Outlook: Risk of Severe Asset and CPI Inflation, Exchange Rate Cycle and Then a Crisis Outside the US After the Recovery

12.1 US’s QE1 Helped Avoid a Great Depression, But Raised the Risk of Subsequent Global Asset Inflation and Exchange Rate Cycle

12.1.1 The US’s QE1 Had Helped the Global Economy Avoid a Great Depression Similar to That in the 1930s

12.1.2 The Risk of a Severe Global Asset Inflation and Then CPI Inflation

12.1.3 The Possibility of a Huge Exchange Rate Cycle

12.2 The Global Stock Market During and After the Financial Tsunami

12.2.1 The Plunge and Then the Rebound: Some Lessons for Share Investments

12.2.2 Why It Could be Judged in March–April 2009 That the Global Financial Market Had Probably Passed Its Worst Time

12.2.3 Recession but No Great Depression in the Global Economy

12.2.4 The US Dollar Carry Trade and Early Signs of Asset Inflation in Some Asian Economies

12.3 The US’s QE2 and Its Potential Impacts

12.3.1 The Debate on the Effect of QE2 on US’s Output and Inflation

12.3.2 Misconceptions Related to the Liquidity Trap

12.3.3 Monetary Policy Has Many Other Transmission Channels

12.3.4 Potential Impacts of QE2 on US Inflation

12.4 The Risk of a Bubble and Then a Crisis in Economies Outside the US During the Overheated Phase of the Recovery

12.5 The Likelihood of a Huge Property Bubble and Then a Crisis in Singapore, Hong Kong and China
