International Handbook of Maritime Economics

Edited by

Kevin Cullinane

Director, Transport Research Institute (TRI), Edinburgh Napier University, UK, and Visiting Professor of International Logistics, University of Gothenburg, Sweden

Edward Elgar
Cheltenham, UK • Northampton, MA, USA
Contents

List of contributors vii

1 Editor's introduction: we never know the worth of water till the well is dry
   Kevin Cullinane 1

2 The maritime industry: key developments in seaborne trade, maritime business and markets
   Hassiba Benamara, Jan Hoffmann and Vincent Valentine 13

3 The option to change the flag of a vessel
   Manolis G. Kavussanos and Andrianos E. Tsekrekos 47

4 Fixtures-based freight rate indices, and their impact on freight rate modelling in the shipping industry
   Albert Veenstra and Jan van Dalen 63

5 Fundamental analysis and relative efficiency of maritime firms: dry bulk vs tanker firms
   Photis Panayides and Neophytos Lambertides 85

6 Modelling the impact of double hull technology on oil spill numbers
   David Glen 107

7 An investigation into the effect of risk management on the profitability of shipping investment and operations
   Amir H. Alizadeh and Nikos Nomikos 121

8 Structural factors underlying mergers and acquisitions in liner shipping
   Mike Fusillo 144

9 Liner shipping networks and market concentration
   Ricardo J. Sanchez and Gordon Wilmsmeier 162

10 One-hundred percent scanning of port containers: the impact on maritime transport chains
    Wayne Talley 207

11 Are Bunker Adjustment Factors aimed at revenue-making or cost recovery? Empirical evidence on the pricing strategies of shipping lines
    Theo Notteboom and Pierre Cariou 223
12 The value of direct call services by container shipping
lines in Northern Europe: support model for strategic scenario
development and case study
Arne Jensen and Rickard Bergqvist

13 An analysis of short sea shipping as an alternative for
freight transport
Lourdes Trujillo, Francesca Medda and María M. González

14 Optimal inventory control for empty containers in a port
with random demands and repositioning delays
Dong-Ping Song and Qing Zhang

15 Measuring competition between ports
Simme Veldman and Eric van Drunen

16 Captive and contestable port hinterlands: modelling and
visualization using GIS
Jacob Kronbak and Kevin Cullinane

17 Seaport efficiency and productivity growth
Carlos Barros, Hercules Haralambides, Mohamed Hussain
and Nicolas Peypoch

18 A multi-step approach to model the relative efficiency of
European ports: the role of regulation and other
non-discretionary factors
Angela Stefania Bergantino and Enrico Musso

19 Is Puerto Limon a real lemon? Port inefficiency and its impact
Paul Kent and Alan Fox

20 Port performance in changing logistics environments:
measurement development and model testing
Su-Han Woo and Stephen Pettit
