List of Contributors ix
Preface xv

1 Dynamic Traffic Assignment: Recent Advances and New Theories Towards Real Time Applications and Realistic Travel Behaviour (Editorial) 1
Francesco Viti and Chris M.J. Tampère

PART I EXISTENCE, UNIQUENESS, CONVERGENCE, STABILITY

2 Signal Setting with Dynamic Process Assignment 29
Giulio E. Cantarella

3 Intelligent Network Control: Using an Assignment-Control Model to Design Fixed Time Signal Timings 57
Mike J. Smith

4 On the Existence of Pure Nash Equilibrium in Dynamic Traffic Assignments 73
Takamasa Iryo

5 Computing Dual Time-scale Dynamic User Equilibria 89
Terry L. Friesz, Tae Il Kim, Changhyun Kwon and Matthew A. Rigdon

6 Route Swap Processes and Convergence Measures in Dynamic Traffic Assignment 107
Richard Mounce and Malachy Carey

7 Continuous Correction Functions for Dynamic Route Choice Algorithms 131
Shmuel Rahamim, Michal Blumberg Nitzani and Hillel Bar-Gera

PART II DYNAMIC NETWORK LOADING MODELS

8 The General Link Transmission Model for Dynamic Network Loading and a Comparison with the DUE Algorithm 153
Guido Gentile
New Developments in Transport Planning

9 Stochastic Dynamic Network Loading for Travel Time Variability Due to Incidents
Ruben Corthout, Chris M.J. Tampère and Lambertus H. (Ben) Immers

10 The Effect of Dynamic Network Loading Models on DTA-based OD Estimation
Rodric Frederix, Chris M.J. Tampère, Francesco Viti and Lambertus H. (Ben) Immers

11 A Graph-based Formulation for the Multiple Destinations Dynamic Traffic Assignment Problem
Georgios Kalafatas and Srinivas Peeta

12 Study on Dynamic System Optimum Assignment to Establish Marginal Time Equilibrium
Takahiro Tsubota and Masao Kuwahara

PART III INCORPORATING TRAVEL CHOICE BEHAVIOUR

13 Linking Macro-level Dynamic Network Loading Models with Scheduling of Individual’s Daily Activity–Travel Pattern
Muhammad Adnan

14 Macroscopic Network Loading of Microscopic Travel Demand
Gunnar Flötteröd

15 Pre-trip and En-route Route Choice in a Dynamic Traffic Assignment Model
Adam J. Pel, Michiel C.J. Bliemer and Serge P. Hoogendoorn

16 Investigating Boundary Issues Arising from Congestion Charging in a Bottleneck Scenario
Ethan Y. Ge and Kathryn Stewart

PART IV FROM THEORY TO PRACTICAL APPLICATIONS

17 A Large-scale Urban Traffic Decision Support System with Dynamic Traffic Assignment
Yusen Chen, Henk J. van Zuylen and Wim van der Hoeven

18 Investigating the Efficiency of a Gradient Approximation Approach for the Solution of Dynamic Demand Estimation Problems
Ernesto Cipriani, Michael Florian, Michael Mahut and Marialisa Nigro
19 Comparing Performance and Quality of Traffic Assignments for Microscopic Simulation

Michael Behrisch, Daniel Krajzewicz, Peter Wagner and Yun-Pang Wang

Index
