CLIMATE CHANGE AND CANADA’S FORESTS
FROM IMPACTS TO ADAPTATION

T. B. Williamson, Natural Resources Canada, Canadian Forest Service
S. J. Colombo, Ontario Ministry of Natural Resources
P. N. Duinker, School for Resource and Environmental Studies, Dalhousie University
P. A. Gray, Ontario Ministry of Natural Resources
R. J. Hennessey, School for Resource and Environmental Studies, Dalhousie University
D. Houle, Ministère des Ressources Naturelles et de la Faune du Québec / Ouranos
M. H. Johnston, Saskatchewan Research Council
A. E. Ogden, Yukon Forest Management Branch
D. L. Spittlehouse, British Columbia Ministry of Forests and Range
Chapter 2
Current Impacts on Canada's Forests

Observed changes in growing season, phenology, and tree lines
The 2001–2003 drought
Increased forest fire activity
Mountain pine beetle
Spruce bark beetle
Dothistroma needle blight
Implications

Chapter 3
Future Impacts on Canada's Forests

Extreme weather and climatic variability
Forest fire
Insect and disease disturbance
Effects on physiological processes
Productivity
Composition, distribution, and structure of Canada's forested ecosystems
Climate-sensitive zones
The boreal forest
Uncertainty
Summary

Chapter 4
Regional Forest Vulnerabilities

The North
British Columbia
Prairie provinces
Ontario
Quebec
Atlantic Canada

Chapter 5
Impacts on the Forest Sector

Forest management
Forest operations
Forest industry
Forest-based communities
Forest-based public and common-property goods and services
CHAPTER 6

CONCLUSION AND RECOMMENDATIONS

Growing awareness 53
Characterizing the impacts of climate change on Canada’s forests and forest sector 54
Adaptation 55
Conclusion 57
Recommendations 59
