

# **LONG-TERM PRICE UNCERTAINTIES OF FOSSIL PRIMARY FUELS AND IMPLICATIONS FOR THE ELECTRICITY INDUSTRY**

**Dissertation**

zur Erlangung des akademischen Grades eines

Doktors der Wirtschaftswissenschaften

(Dr. rer. pol.)

durch die Fakultät für Wirtschaftswissenschaften der

Universität Duisburg-Essen

Campus Essen

vorgelegt von

Dipl.-Wi.-Ing. Wolfgang Walther

geb. in Reinbek

Essen 2009

**CONTENTS**

Preface .....	I
Contents .....	III
List of Figures .....	VII
List of Tables .....	IX
List of Abbreviations .....	X
1 Introduction.....	1
2 Capacity investments in the German electricity industry .....	5
2.1 Status quo .....	5
2.2 Impact of market liberalization and fuel price uncertainties on investment decisions .....	9
3 Decision making under risk and uncertainty .....	13
3.1 Definitions and review of state of research .....	13
3.2 Approaches for decision making under risk and uncertainty .....	15
3.2.1 Normative decision theory.....	15
3.2.2 Practical approaches for decision support.....	18
3.2.2.1 Deterministic equivalent .....	19
3.2.2.2 Scenario technique.....	19
3.2.2.3 Real options approach .....	22
3.3 Implications for the own modeling approach.....	23
4 Availability of fossil fuels: Review of concepts and schools of thought.....	25
4.1 Definitions.....	26
4.1.1 Reserves .....	26
4.1.2 Resources .....	27
4.1.3 Original Oil in Place (OOIP) and Original Gas in Place (OGIP).....	29
4.1.4 Ultimate Recoverable Resources (URR) .....	30
4.1.5 Reserve-to-production ratio.....	30
4.1.6 Supply and demand .....	31
4.2 The two main schools of thoughts.....	32
4.2.1 Neo-Malthusians: Industry experts fearing depletion.....	33
4.2.1.1 Hubbert's production curve .....	33
4.2.1.2 The Report to the Club of Rome .....	37
4.2.1.3 The Association for the Study of Peak Oil and Gas (ASPO).....	37
4.2.2 Cornucopians: The economists' view .....	40
4.2.2.1 Morris A. Adelman: Volume flows instead of fixed stocks.....	40
4.2.2.2 Julian L. Simon: Founding father of the Cornucopians .....	42
4.2.2.3 Peter R. Odell: Ongoing dominance of fossil fuels.....	43
4.2.3 Summary and implications for this thesis.....	44
5 Long-term price formation of fossil fuels .....	47
5.1 Fuel prices and related uncertainties from a supply perspective .....	48

5.1.1 Scarcity.....	49
5.1.1.1 Scarcity as cornerstone of the Hotelling rule.....	50
5.1.1.2 Adelman's objections to scarcity as limiting constraint .....	60
5.1.2 Marginal production costs.....	61
5.1.2.1 Higher production costs from increasing depletion .....	63
5.1.2.2 The opposite view: Continually decreasing production costs.....	75
5.1.3 Cartel rent .....	76
5.1.4 Transportation costs.....	82
5.2 Demand-side factors and uncertainties.....	84
5.2.1 General overview on energy demand .....	84
5.2.2 Technological progress.....	88
5.2.3 Elasticities of demand and substitution effects .....	90
5.2.3.1 Changes in total demand: Price and income elasticities.....	91
5.2.3.2 Substitution through capital .....	95
5.2.3.3 Substitution through other fossil fuels .....	98
5.2.4 Costs and opportunity costs of greenhouse gas emissions.....	99
5.2.5 Guaranteed satisfaction of demand and diversification of fuels .....	105
5.3 Other relevant factors and uncertainties .....	109
5.3.1 Expectation formation and speculation .....	110
5.3.2 Geopolitical, social and natural factors .....	112
5.3.3 Interest and exchange rates.....	115
5.4 Implications for this thesis .....	117
6 Modeling approaches .....	121
6.1 General model categorizations .....	121
6.1.1 Analytical and numerical approach.....	121
6.1.2 Static and dynamic models .....	122
6.1.3 Deterministic and stochastic models.....	122
6.1.4 General and partial equilibrium models .....	122
6.1.5 Simulation and optimization .....	124
6.1.6 Theoretical and empirical approaches .....	125
6.1.7 Conclusions for the own approach.....	126
6.2 Fundamental modeling.....	127
6.3 Key characteristics of stochastic time series .....	128
6.3.1 Continuity in price and time.....	128
6.3.2 Stationarity of time series of prices .....	129
6.3.3 Autocovariance and autocorrelation .....	130
6.3.4 Probability distribution .....	130
6.3.5 Random-walk process and the Markov property .....	132
6.3.6 Mean-reversion .....	133
6.4 Linear optimization .....	134
6.4.1 Formulation of a deterministic optimization problem .....	135

6.4.2	Solving deterministic optimization problems .....	137
6.4.3	Stochastic optimization .....	141
6.4.4	Approximate solutions to stochastic optimization .....	143
6.4.5	Repeated deterministic optimization as representation of stochastic shocks .....	144
6.5	Model risks and validation .....	144
6.6	Fossil fuel prices: Review of existing models .....	148
6.6.1	Cost minimization model by Nordhaus, Houthakker et. al. ....	148
6.6.2	Long-term Price and Extraction (LOPEX) model .....	150
6.6.3	Prospective Outlook on Long-term Energy Strategy (POLES) model, .....	151
6.6.4	Comparison of model results .....	153
7	Development of a model for derivation of long-term price series for fossil fuels .....	157
7.1	Model structure .....	160
7.1.1	Basic settings .....	160
7.1.2	Production cost curves .....	161
7.1.3	Capital investments .....	163
7.1.4	Locked demand .....	163
7.1.5	Deterministic model framework .....	165
7.1.6	Stochastic enhancement .....	179
7.2	Model input .....	185
7.2.1	Fuel availability .....	185
7.2.2	Production costs and markups .....	188
7.2.3	Final energy demand .....	189
7.2.4	CO <sub>2</sub> emission costs .....	190
7.2.5	Energy efficiency and technology advancement .....	191
7.2.6	Production and liquefaction capacities .....	191
7.2.7	Transportation costs .....	192
7.2.8	Interest rate, exchange rate and currency .....	193
7.3	Results for Western Europe .....	194
7.3.1	Deterministic optimization results .....	194
7.3.2	Stochastic modeling results .....	197
7.4	Analysis and verification of results .....	200
7.4.1	Distribution of results .....	201
7.4.2	Correlation of oil and gas prices .....	206
7.4.3	Comparison with results from other fuel price models .....	207
7.5	Summary and implications for decision makers .....	209
8	Application of model results: Investments in power generation .....	213
8.1	Forecasting capacity developments in the German electricity market .....	213
8.1.1	Description of the LOTELMAS model .....	213
8.1.2	Application of fossil fuel price series in LOTELMAS .....	215
8.2	Analysis and discussion of results .....	217

---

9 Summary and outlook .....	221
References .....	225
