Introduction	1
The Townsend Thai Data: Development, Extent, and Research Engendered	5
The Larger Context: Literature in Review	9
Embracing Multiple Approaches: Methodology and a Way Forward	14
1. Growth, Inequality, Poverty, and Financial Deepening	16
1.1. Growth: Demographic, GDP, and the 1997 Crisis	17
1.2. Inequality	22
1.3. Poverty and Well-being	24
1.4. Financial Deepening, Crisis, and Policy Change	29
2. Conceptual Frameworks for Measurement	36
2.1. The Standard Accounting Model: National Income Accounts	37
2.2. Standard Decompositions in the Standard Model: Unincorporated Enterprise, Private Investment	41
2.3. Refining the Standard Accounting Model: The Construction of Households as Firms	47
2.4. Discrepancies between Household and National Income	55
2.5. Aggregates: Elaboration of the Refined Model	57
3. Disparities among Regional Economies: Spatial (Dis)Aggregation	63
3.1. Provincial Economies	65
3.2. County/Tambon Economies	76
3.3. Village Economies: Within Provinces	97

Contents

3.4. Households in the National Economy: Temporal and Geospatial Variations	102
3.5. Individuals in the Household	116
3.6. Mekong Economies: International Comparisons	116
4. Micro Kuznets and Macro TFP Decompositions	123
4.1. A Macro TFP Decomposition	124
4.2. A Micro, Kuznets Decomposition	127
5. Driving Forces: Occupation, Financial Access, Education	137
5.1. Occupation/Industrialization	139
5.2. Drivers: Financial Situation (Contemporary Picture)	155
5.3. Education	188
6. Integrated Micro-Macro Models with Dual Financial Sectors	195
6.1. Occupation Choice: Financial Sector Exogenous	197
6.2. Access Choice: Financial Sector Endogenous	218
6.3. Occupation Choice and Financial Access at the Provincial/Village Levels	232
6.4. Disaggregated to the Household Levels: Successes and Anomalies	244
7. Neoclassical Benchmarks and Anomalies for Those with Access	257
7.1. Finance	257
7.2. Risk-sharing	268
7.3. Disaggregation and Risk-sharing Groups	275
7.4. By Shock: Rain and Rubber Prices	279
8. Impacts: Experimental and Econometric Program Evaluations	285
8.1. Million-baht Village Funds	286
8.2. BAAC Debt Moratorium	295
8.3. Crises, Wealth Loss, and Commercial Banks	297
8.4. Village Funds	298
8.5. Evaluation with Panel	305
8.6. A Structural Model of Credit Constraints and Impact of Village Funds	308
8.7. Measuring the Impact of Financial Intermediation: Linking Theory to Econometric Policy Evaluation	311

9. Obstacles to Trade, Enhanced Models of Selection, and the Impact of Policy Variation	312
9.1. Distinguishing Obstacles to Trade from Occupation Choice	316
9.2. Exogenous Incomplete Markets	329
9.3. Life-cycle and Occupation Choice with Limited Credit	337
9.4. Projects and Choice among a Combination of Lenders	344
9.5. Distinguishing Obstacles from Repayment Data	352
9.6. Selection into and across Credit Contracts	369
9.7. Endogenous Industrial Organization	388
9.8. Dynamic Village Networks	395
10. Summary and Conclusions	404
<i>Bibliography</i>	423
<i>Index</i>	435
