

Paul J.J. Welfens

Innovations in Macroeconomics

Third Edition

 Springer

Contents

A. Globalization, Specialization and Innovation Dynamics	1
A.1 Introduction	1
A.2 Approaches in Modern Macroeconomics	3
A.3 Human Capital, Physical Capital and Innovations in Open Economies	7
A.4 A Critique of the Heckscher–Ohlin–Samuelson Approach	11
A.5 Solving the Leontief Paradox?	14
A.6 Variations on the Solow Model: Some New Insights for a Monetary Economy	20
A.6.1 A Generalization of the Solow Growth Model	20
A.6.2 Aspects of Empirical Analysis of Economic Development	28
A.7 Technological Progress and the Long-run Price Level	35
A.7.1 Process Innovations	35
A.7.2 The Model	36
A.7.3 Conclusions for Analysis of Process Innovations in a Monetary Economy	43
A.7.4 Solow Model and Role of Money for Growth	43
A.7.5 Monetary Growth Model and Tobin Paradox	53
A.7.6 Technological Progress Cycles	56
A.7.7 Equilibrium and Terms of Trade Aspects in a Simple Open-economy Growth Model	58
A.7.8 International Macroeconomics, FDI and Fiscal and Monetary Policy	59
A.7.9 Long-run Phillips Curve in a Growing Economy	63
A.7.10 Variable Output Elasticity of Capital	65
A.8 Foreign Direct Investment and Innovation	66
A.8.1 Innovation Dynamics and Multinational Companies	66
A.8.2 Modified Multiplier in Macro Model with FDI Outflows ..	78
A.9 Output Dynamics: Interaction of the Demand Side and the Supply Side	82

A.10 Growth Accounting Under Unemployment and Okun's Law	84
A.11 Innovation, Trade and Foreign Investment	86
A.12 Conclusions	92
Appendix A.1: Aggregation in a Two-Sector Growth Model: A Modified Solow Approach with Cobb–Douglas Production Functions	94
Appendix A.2: Two-Sector Model (KHAN/BILGINSOY 1994)	98
Appendix A.3: Labor Markets with Tradables and Nontradables	100
Appendix A.4: Product Innovations with Schumpeterian Intermediate Products: A Simple Formula	102
Appendix A.5: Medium-term Output and Wage Policies in an Open Economy	103
B. Savings, Investment and Growth: New Approaches for Macroeconomic Modeling	109
B.1 Introduction	109
B.2 A Medium-term Keynes–Solow Model	111
B.2.1 Capital Accumulation Dynamics and Profit Maximization	112
B.2.2 Choosing a Consistent Investment Function and a New Consumption Function	115
B.2.3 Multiplier Analysis	117
B.3 Conclusions and Possible Extensions	125
C. Economic Integration, Technological Progress and Growth	129
C.1 Rich Countries vs. Poor Countries and Economic Integration	129
C.2 Setup of the Model	132
C.2.1 Convergence in a Hybrid Growth Model with Trade and R&D	134
C.2.2 Profit Maximization in the Hybrid Growth Model	137
C.3 Asymmetric Foreign Direct Investment in a Two-Country Growth Model	138
C.4 Policy Conclusions	141
Appendix C.1: Basic Neoclassical Model	141
Appendix C.2: General Approach and Simulations	142
D. Impact of the Real Exchange Rate on Trade, Structural Change and Growth	145
D.1 Introduction	145
D.2 Reputation, Market Size and Relative Price Effects: A Quasi–Balassa–Samuelson Effect	147
D.3 Real Exchange Rate Dynamics and Economic Effects	149
D.3.1 Real Exchange Rate and Trade	149
D.3.2 Real Exchange Rate and Structural Change	150
D.3.3 Real Exchange Rate and Growth	151

D.4	Real Effective Exchange Rate (p/ep^*) Dynamics in Selected EU Countries	157
D.5	Wages, Prices and the Real Exchange Rate	157
D.6	Towards an Integrated Macroeconomic Approach	158
D.7	Medium-Term Approach to Product Innovations, Output and the Exchange Rate	164
D.8	Economic Catching-up and Long-Term Real Exchange Rate Dynamics	169
D.9	Policy Implications	174
E.	Macroeconomic Aspects of Opening up, Unemployment, Growth and Transition	177
E.1	Introduction	177
E.2	Growth, Trade and Innovation	180
E.2.1	New Production Function for Open Economies	180
E.2.2	Foreign Direct Investment	183
E.3	Growth, Resource Dynamics, Balassa–Samuelson Effects and Unemployment	188
E.3.1	Growth, Natural Resources and Economic Welfare	188
E.3.2	The Balassa–Samuelson Effect, Unemployment and Exports	190
E.3.3	Wage Bargaining as Inherent Source of Unemployment?	193
E.4	Product Innovation and Macroeconomic Developments: Schumpeter and the Mundell–Fleming Model	198
E.4.1	The Role of Risk and Innovation	198
E.4.2	Endogenous Product Innovations in Countries with Similar Development Levels	199
E.5	Conclusions and Policy Implications	200
	Appendix E.1: Maximization of Total Quasi-Income of Workers through Trade Unions (labor supply L_0 is exogenous, parameter $0 \leq \alpha \leq 1$)	201
	Appendix E.2: Mathematical Appendix	204
	Appendix E.3: Reflections on EU Eastern Enlargement	206
	Appendix E.4: Fiscal Multiplier in a Hybrid Approach	212
	Appendix E.5: Reconsidering Aggregate Output in a Two-Sector Approach	213
F.	Productivity Shocks, Innovations, Stock Market Dynamics and Growth	215
F.1	Introduction	215
F.2	Traditional and New Approaches to the Exchange Rate and Stock Market Dynamics	221

F.2.1	Stylized Facts of Exchange Rates and Stock Market Prices	221
F.2.1	Short-Term Analysis of Financial Market Dynamics and Technology Shocks	228
F.3	Hybrid Model: Combining Interest Parity and Augmented Money Market Equilibrium	232
F.4	Capital Asset Pricing Model and Product Innovations	234
F.5	Consumption, Volatility and Growth	238
F.6	Policy Issues and Conclusions	240
	Appendix F.1: Slope of Equilibrium Lines	242
	Appendix F.2: International Bonds Market Integration, Interest Rates and Stock Market Volatility	243
G.	Innovation Dynamics and Optimum Growth	247
G.1	Introduction	247
G.2	Endogenous Growth, Innovation and Maximum Consumption per Capita	250
G.2.1	Optimum Endogenous Growth	250
G.2.2	Optimum Growth and Endogenous Growth Modeling in Open and Closed Economies	256
G.2.3	Biased Technological Progress and Optimum Growth ...	261
G.2.4	Efficient vs. Optimal International Specialization	262
G.3	Policy Implications	264
	Appendix G.1: Optimum Quantity of Money	266
	Appendix G.2: Specialization, Technological Progress and Factor Price Ratios	267
	Appendix G.3: Endogenous Progress in the Capital Goods Sector	268
	Appendix G.4: Simple Differential Equation and Bernoulli Differential Equation	270
	Appendix G.5: The Macroeconomic Foundation of Microeconomics ...	271
H.	Trade, Structural Change and Growth in an Open Monetary Economy	273
H.1	Introduction	273
H.2	Exchange Rate Dynamics, Relative Prices, Employment and Growth	275
H.2.1	Nominal Exchange Rate, Real Exchange Rate and True Long-Run Money Market Equilibrium	275
H.2.2	Real Exchange Rate, Growth Path and Steady State	280
H.2.3	Investment, Real Exchange Rate and Employment	284
H.2.4	Technology, Exchange Rate Changes and the Relative Tradable Price	286
H.3	Real Exchange Rate Dynamics and Economic Effects	290
	Appendix H.1: Statistical Measures of Structural Change	292
	Appendix H.2: Indicators Measuring Structural Change	294

I.	Innovations in the Digital Economy: Promotion of R&D and Growth in Open Economies	295
I.1	Introduction	295
I.2	Innovations and New Economic Structures in the Digital Economy	298
I.2.1	Selected Innovation Traits in OECD Countries	298
I.2.2	Innovation System and Innovation Record	302
I.2.3	High Technology, ICT Growth and Modernization of the Economic System	311
I.3	Theory of Innovation Policy	320
I.3.1	The Standard Case	320
I.4	Policy Conclusions	329
I.4.1	General Policy Conclusions for Innovation Policy in Open Economies	329
I.4.2	Specific Policy Conclusions for Germany	330
	Appendix I.1: Optimum Product Innovation under Uncertainty	334
	Appendix I.2: Product Innovations and Network Effects in a Simple Model	336
	Appendix I.3: NACE (EU classification) rev. 1.1 Classification at the 2-Digit Level (in Parts)	339
	Appendix I.4: Market Entry of Digital Good Producers in a General Equilibrium Model	340
J.	EU Innovation Policy: Analysis and Critique	347
J.1	Introduction	347
J.2	Innovation Policy in the EU	349
J.3	Innovation Dynamics in OECD Countries	350
J.3.1	Innovation, Specialization and Growth: Empirical Analysis for EU-15 and USA	350
J.3.2	Comparative Innovation Dynamics	350
J.3.3	Acceleration of Innovation Dynamics	355
J.3.4	Specialization in Innovation and ICT Network Perspectives	358
J.4	Recommendations for Future EU Innovation Policy	363
K.	Financial Market Integration, Interest Rates and Economic Development	367
K.1	Introduction	367
K.2	Financial Market Integration in the EU	373
K.2.1	From Basic Theory to Endogenous Growth Approaches ..	373
K.2.2	Current Account Dynamics: A New Approach	377
K.2.3	Monetary Integration, Financial Market Integration and Welfare Effects	380
K.3	Integration of Financial Markets in the Euro Zone and Global Dynamics	384

K.4	Policy Conclusions	386
K.5	FDI and Information and Communication Technology in the Dornbusch Model	388
K.5.1	Basics of the Dornbusch Model	388
K.5.2	The Modified Dornbusch Model	389
K.5.3	Conclusions	398
Appendix K.1:	Aspects of Transition and Trend Growth in a Setup with Technology Shifts	400
Appendix K.2:	Uncertainty, Savings and Product Innovations	400
Appendix K.3:	A Macro-Model with Unemployment and Endogenous Taxation	402
L.	Natural Resources, Oil Prices and Innovation Dynamics	405
L.1	Introduction	405
L.2	Theory of Natural Resource Pricing	409
L.2.1	Technological Progress in the Oil Industry	410
L.2.2	Non-Stationarity of Oil Prices?	413
L.2.3	Which Interest Rate Is Relevant?	415
L.2.4	Long-term Macroeconomic Aspects of Oil Price Dynamics	417
L.3	Oil Price Regression Analysis	419
L.4	Policy Implications	423
L.5	Sustainability Issues	425
Appendix L.1:	Data Sources	430
M.	Portfolio Modeling and Growth in Open Economies	431
M.1	Introduction	431
M.2	Combining the Portfolio Model and Growth Analysis	433
M.3	Oil Price Dynamics in a Double Perspective	436
M.4	Stock Market Analysis and Hybrid Portfolio Growth Model	439
M.5	Conclusions	445
N.	Transatlantic Banking Crisis: Analysis, Rating, Policy Issues	447
N.1	Introduction	447
N.2	The Dynamics of the Banking Crisis	452
N.3	Banking Crisis and Critical Reform Proposals	459
N.4	Theoretical Aspects of Sustainable Financial Market Globalization	467
N.5	Macroeconomic Modeling Aspects	474
N.5.1	A Macro Model with Foreign Direct Investment and Rating	475
N.5.2	Multiplier Analysis and Key Conclusions on Ratings	478
N.6	The Effects of a Banking Crisis in a Hybrid Macroeconomic Model	481
N.7	Policy Conclusions	491

O. International Banking Crisis and Innovation	495
O.1 The Effects of a Banking Crisis in a Hybrid Macroeconomic Model	495
O.2 Financial Innovations, Banking Crises, and Schumpeterian Growth Dynamics	504
O.2.1 Introduction: Financial Innovations Dynamics versus Industrial Innovations	504
O.2.2 Financial Innovations and Growth	506
O.2.3 Policy Issues: Financial Innovations and Government R&D Support?	510
P. New MARSHALL–LERNER Condition and Economic Globalization	515
P.1 Introduction	515
P.2 FDI, the External Balance and the Real Exchange Rate	518
P.3 Policy Conclusions	523
Appendix P.1: Macro Model with FDI	525
Q. Trade, Innovation and Output Dynamics	531
Q.1 Introduction	531
Q.2 Trade and the Production Function: Growth in Open Economies	535
Q.2.1 Alternative Asymmetric Model for Trade and Growth ...	543
Q.2.2 Quasi Economies of Scale in a Simple Two-Country Model	546
Q.2.3 Open Economies Growth Model: The Role of Technological Progress	547
Q.2.4 Growth Modeling of Open Economies: Technology Spillovers and the Role of Trade	549
Q.3 The Gravity Equation in a Long-Term Analytical Perspective ...	552
Q.3.1 Towards a Consistent Long-Run Gravity Trade Model ...	554
Q.3.2 Combining the Gravity Equation and Growth Modeling	555
Q.3.3 Implications	559
Q.4 Growth, Optimum Taxation, and Innovation Policy	560
Q.4.1 A New Optimum Taxation Approach	560
Q.4.2 Optimum FDI Policy in an Open Economy with Subsidiaries from Abroad	562
Q.5 Conclusions	563
R. New Open Economy Policy Perspectives: Modified Golden Rule and Hybrid Welfare	565
R.1 Introduction	565
R.2 From the Traditional Model Toward a New Approach	569
R.3 Endogenous Population Growth	572

R.4	Economic Welfare, Golden Rule and CO ₂ Emissions in the Context of a Modified Growth Model	573
R.5	Open Economy and Economic Growth	577
R.6	A Broader View on the Golden Rule and Innovation in Open Economies	582
S.	Employment in the R&D Sector, Economic Policy and the Golden Rule	587
S.1	Introduction	587
S.2	Towards a New Model	589
S.3	Policy Conclusions	595
T.	Some Remarks on Growth Analysis on the Basis of CES	607
T.1	Introduction	607
T.2	Neoclassical Growth Model with CES: Ambiguous Role of the Savings Rate	607
T.3	Two-country Macro Model with CES Functions	611
T.4	Conclusions	614
	Appendix T.1: Further Considerations on CES	615
	Appendix T.2: The Role of Domestic and Foreign Sovereign Debt in a Simple Medium-term Macro Model with Flexible Exchange Rates	615
