1 Introduction 1
Emma McIntosh

2 Methods for evaluating health and health care: Underlying theory and implications for practical application 19
Philip M. Clarke

3 Shadow pricing in health care cost–benefit analyses 39
Emma McIntosh

4 Costing methodology for applied cost–benefit analysis in health care 55
Emma McIntosh

5 Valuation and cost–benefit analysis in health and environmental economics 79
F. Reed Johnson and W.L. (Vic) Adamowicz

6 Benefit assessment for cost–benefit analysis studies in health care using contingent valuation methods 97
Emma J. Frew

7 Benefit assessment for cost–benefit analysis studies in health care: A guide to carrying out a stated preference willingness to pay survey in health care 119
Emma J. Frew

8 Applied cost–benefit analysis in health care: An empirical application in spinal surgery 139
Emma McIntosh, Alastair Gray, Mathias Haefeli, Achim Elfering, Atul Sukthankar, and Norbert Boos

9 Using revealed preference methods to value health care: The travel cost approach 161
Philip M. Clarke

10 Experimental design and the estimation of willingness to pay in choice experiments for health policy evaluation 185
Richard T. Carson and Jordan J. Louviere
11 Benefit assessment for cost–benefit analysis studies in health care using discrete choice experiments: Estimating welfare in a health care setting 211
Jordan J. Louviere and Denzil G. Fiebig

12 A practical guide to reporting and presenting stated preference discrete choice experiment results in cost–benefit analysis studies in health care 231
Emma McIntosh

13 The relevance of cost–benefit analysis in health care: Concluding comments 259
Emma McIntosh, W.L. (Vic) Adamowicz, and F. Reed Johnson
