Erik Mooi • Marko Sarstedt

A Concise Guide to Market Research

The Process, Data, and Methods Using IBM SPSS Statistics

Springer

Contents

1 **Introduction to Market Research** 1
Introduction 1
What is Market and Marketing Research? 2
When Should Market Research (Not) Be Conducted? 4
Who Provides Market Research? 5
Questions 7
Further Readings 8
References 8

2 **The Market Research Process** 11
Introduction 11
Identify and Formulate the Problem 12
Determine the Research Design 13
Exploratory Research 13
Uses of Exploratory Research 14
Descriptive Research 15
Uses of Descriptive Research 16
Causal Research 16
Uses of Causal Research 19
Design the Sample and Method of Data Collection 20
Collect the Data 20
Analyze the Data 20
Interpret, Discuss, and Present the Findings 21
Follow-Up 21
Qualitative and Quantitative Research 21
Questions 22
Further Readings 22
References 23

3 Data 25
Introduction 25
Types of Data 26
Primary and Secondary Data 29
Quantitative and Qualitative Data 30
Unit of Analysis 31
Dependence of Observations 31
Dependent and Independent Variables 32
Measurement Scaling 32
Reliability and Validity 34
Population and Sampling 37
Probability Sampling 39
Non-probability Sampling 40
Sample Sizes 41
Questions 42
Further Readings 43
References 44

4 Getting Data 45
Introduction 45
Secondary Data 46
Internal Secondary Data 46
External Secondary Data 48
Accessing Secondary Data 50
Primary Data 52
Collecting Quantitative Data: Designing Questionnaires 52
Collecting Quantitative Data: Basic Experimental Research 67
Collecting Qualitative Data: Basic Qualitative Research 69
Questions 73
Further Readings 74
References 74

5 Descriptive Statistics 77
The Workflow of Data 77
Create Structure 78
Enter Data 80
Clean Data 80
Describe Data 83
Univariate Graphs/Charts/Tables 83
Univariate Statistics 85
Bivariate Graphs/Tables 87
Bivariate Statistics 87
Detect Outliers 88
Transform Data 89

Create a Codebook 91
Introduction to SPSS 92
Finding Your Way in SPSS 92
Creating Univariate Graphs, Charts, and Tables in SPSS 102
Calculating Univariate Descriptive Statistics in SPSS 106
Creating Bivariate Graphs and Tables in SPSS 107
Calculating Bivariate Descriptive Statistics in SPSS 109
Case Study 109
Questions 111
Further Readings 111
References 112

6 Hypothesis Testing & ANOVA 113
Introduction 114
Understanding Hypothesis Testing 114
Testing Hypotheses About One Mean 117
Formulate the Hypothesis 117
Select an Appropriate Test and Check Assumptions 119
Choose the Significance Level 121
Calculate the Test Statistic 124
Compare the Test Statistic (p-value) with the Critical Value (Significance Level) 127
Interpret the Results 131
Comparing Two Means: Two-samples t-test 131
Two Independent Samples 131
Two Paired Samples 134
Comparing More Than Two Means: Analysis of Variance ANOVA 136
Understanding One-Way ANOVA 137
Going Beyond One-Way ANOVA: The Two-Way ANOVA 146
Example 149
Case Study 158
Questions 159
Further Readings 159
References 160

7 Regression Analysis 161
Introduction 161
Understanding Regression Analysis 162
Conducting a Regression Analysis 165
Consider Data Requirements for Regression Analysis 165
Specify and Estimate the Regression Model 167
Test the Assumptions of Regression Analysis 170
Interpret the Regression Model 177

Overall Model Fit 178
Effects of Individual Variables 181
Validate the Regression Model 182
Use the Regression Model 185
Example 186
Case Study 197
Questions 199
Further Readings 200
References 200

8 Factor Analysis 201
Introduction 202
Understanding Principal Components Analysis 202
Conducting a Principal Components Analysis 206
Check Assumptions and Carry out Preliminary Analyses 206
Extract the Factors 208
Determine the Number of Factors 212
Interpret the Factor Solution 213
Evaluate the Goodness-of-fit of the Factor Solution 216
Confirmatory Factor Analysis and Reliability Analysis 218
Structural Equation Modeling 221
Example: Principal Components Analysis and Reliability Analysis ... 223
Case Study 233
Questions 235
Further Readings 235
References 236

9 Cluster Analysis 237
Introduction 237
Understanding Cluster Analysis 238
Conducting a Cluster Analysis 240
Decide on the Clustering Variables 240
Decide on the Clustering Procedure 243
Validate and Interpret the Cluster Solution 260
Example 265
Case Study 281
Questions 282
Further Readings 283
References 284

10 Communicating the Results 285
Introduction 286
Identify the Audience 287
Structure the Written Report 288

Title Page 288
Executive Summary 288
Table of Contents 289
Introduction 289
Methodology 290
Results 291
Conclusion and Recommendations 293
Limitations 294
Appendix 295
Guidelines for Written Reports 295
Guidelines for Oral Presentations 296
Structure the Oral Presentation 296
Provide Visual Aids 298
Follow-Up 298
Ethics in Research Reports 299
Questions 300
Further Readings 301
References 301

Index 303
