INNOVATIVE FINANCING MECHANISMS FOR THE WATER SECTOR
**Table of Contents**

Abbreviations and acronyms .................................................. 11

Executive summary .................................................................. 13

**Introduction** ........................................................................ 25

Overview .................................................................................. 25
Target audience .......................................................................... 26
Structure of the report ............................................................... 26

**Chapter 1. Setting the stage** .................................................. 29

1.1. Financial flows for water and sanitation services ................. 29
1.2. Why focus on market-based repayable finance in this report? .. 31
1.3. Why is innovation needed to increase market-based repayable finance? 33
1.4. Previous recommendations and their follow-up ...................... 36

**Chapter 2. Mobilising market-based repayable finance** ............ 45

2.1. Potential recipients of market-based repayable finance .......... 45
2.2. Potential sources .................................................................. 48
2.3. Critical mismatches driving innovation: a summary ............... 59

**Chapter 3. Pushing the boundaries of innovative finance** ........ 63

3.1. Blending grants and repayable financing ............................... 63
3.2. Extending the range of potential borrowers via micro-finance .... 69
3.3. Alleviating affordability constraints with output-based aid ...... 74
3.4. Mitigating risks with guarantees and insurance ..................... 80
3.5. Creating grouped financing vehicles to increase access to finance 89
3.6. Increasing lending to sub-sovereigns via innovation ................ 96
3.7. Strengthening the balance sheet via equity injections .......... 100
3.8. Increasing transparency in the sector via credit ratings .......... 106
3.9. Developing “bankable” projects through project preparation facilities .............. 108
3.10. Summary evaluation ............................................................... 111

Chapter 4. Assessing the impact of the global financial crisis .......................... 117
4.1. Potential impact on market-based repayable finance ............................... 118
4.2. Potential impact on the 3Ts ......................................................... 126
4.3. In sum: glimmers of hope after the drought? .................................... 130

Bibliography ...................................................................................... 135

Figures
Figure 1.1 Using repayable finance to bridge the financing gap ....................... 31

Tables
Table 2.1 Characteristics of water service providers and access to finance .......... 47
Table 3.1 Examples of innovative financial mechanisms in the water sector ........ 64
Table 3.2 Risk mitigation instruments: definitions and applications .................. 81
Table 3.3 Summary of innovative financial mechanisms: applicability and potential limitations ................................................................. 111

Boxes
Box 1.1 Definitions .............................................................................. 30
Box 1.2 Financial innovation in the water sector in England and Wales ........... 34
Box 1.3 Camdessus Panel recommendations to increase repayable market-based financing ................................................................. 37
