Book Series »Innovation Potentials«

Rainer Frietsch, Margot Schüller (Eds.)

**Competing for Global Innovation
Leadership: Innovation Systems and
Policies in the USA, Europe and Asia**

B 369698

FRAUNHOFER VERLAG

Contents	Page
1 Introduction	1
<i>Rainer Frietsch, Margot Schüller</i>	
2 The Innovation System and Innovation Policy in the United States	5
<i>Philip Shapira, Jan Youtie</i>	
2.1 Introduction	5
2.2 The US Innovation System: Scale, Structure and Key Actors.....	5
2.3 Innovation Policies in the US	10
2.3.1 Framework and Indirect Policies	12
2.3.2 Direct Innovation Policies	15
2.3.3 Capabilities for Innovation	21
2.3.4 Coordination and System Stimulation	24
2.3.5 State Innovation Policies	25
2.3.6 The Credit Crunch and System Stimulation: Innovating out of Crisis?	26
2.4 Assessment and Evaluation	26
2.5 Conclusions	28
3 Building an Innovation Hub: A Case Study of the Transformation of University Roles in Regional Technological and Economic Development.....	31
<i>Jan Youtie, Philip Shapira</i>	
3.1 Introduction	31
3.2 Role of Intermediaries in the Innovation Process.....	31
3.3 Regional Context: Contrasting University Models in the US South.....	38
3.4 Evolution of the Role of Georgia Tech as a Knowledge Hub	39
3.5 Examples of University-centered Knowledge-hub Initiatives.....	43
3.5.1 New Scientific Entrepreneurs: The Georgia Research Alliance.....	44
3.5.2 Targeted Technology Clusters: The Yamacraw Initiative.....	45
3.5.3 Building Technology-based Entrepreneurship: The Advanced Technology Development Center	46
3.5.4 Faculty Research Commercialization: VentureLab	47
3.5.5 Innovation in Traditional Industries and Georgia Centers of Innovation	47
3.5.6 Know-how Transfer: The Georgia Tech Industrial Extension Service.....	48
3.5.7 Other Supporting State Policies	49
3.6 Assessment and Evaluation	49

3.7	Regional Comparisons of University Trajectories in the US South	52
3.8	Concluding Points	54
4	The European Research Area (ERA): Trends and Future Challenges of a Political Concept.....	57
	<i>Henning Kroll, Thomas Stahlecker, Andrea Zenker</i>	
4.1	Political Background	57
4.1.1	The Lisbon Strategy	57
4.2	The European Research Area	61
4.2.1	Development of the Concept	61
4.2.2	Specific Goals in the Framework of ERA	63
4.2.3	Instruments of Implementation	65
4.3	European Research Policy in Context	65
4.3.1	EU Innovation Policy	66
4.3.2	Structural Funds and Cohesion Policy Framework	68
4.4	Summary	70
5	Recent Trends in Innovation Policy in Germany	73
	<i>Rainer Frietsch, Henning Kroll</i>	
5.1	Introduction	73
5.2	The German Innovation System at a Glance	73
5.3	Specialization of the German R&D Landscape	79
5.4	Innovation Policy in Germany	82
5.5	The High-Tech Strategy for Germany	83
5.6	SME Support Policy in the Framework of the High-Tech Strategy	86
5.7	Concluding Summary	90
6	France: Innovation System and Innovation Policy	93
	<i>Emmanuel Muller, Andrea Zenker, Jean-Alain Héraud</i>	
6.1	Introduction	93
6.2	Overview of the French Innovation System	93
6.2.1	Research Administration and Research Support Institutions	96
6.2.2	The Big Players (CNRS, CEA, INSERM, INRA, INRIA)	102
6.2.3	Higher Education	104
6.3	Research and Innovation Policy Instruments	105
6.3.1	Financial Measures	105

6.3.2	Public Procurement Policy.....	108
6.3.3	Network-related Measures	110
6.4	Multi-level and Multi-actor Governance.....	112
6.5	Conclusion: A System in Evolution?.....	117
7	Asia's Catching-up: Scientific and Technological Competitiveness.....	119
	<i>Rainer Frietsch, Margot Schüller</i>	
7.1	Introduction.....	119
7.2	Innovation in Latecomer Countries.....	121
7.3	Scientific Performance.....	122
7.4	R&D Expenditures	126
7.5	Technological Performance – Patent Applications.....	129
7.6	Competition on International Markets – Foreign Trade.....	136
7.7	Conclusion	141
8	Changes in the Japanese Innovation System and Innovation Policies	143
	<i>Kerstin Cuhls, Iris Wieczorek</i>	
8.1	Outstanding Features of the Japanese Innovation System.....	143
8.2	Main Actors in the Japanese Innovation System	144
8.2.1	Council for Science and Technology Policy (CSTP)	146
8.2.2	Science Council of Japan (SCJ).....	146
8.2.3	The Ministries	146
8.2.4	International Scientific Exchange Organizations.....	148
8.2.5	Intermediaries	148
8.2.6	Research and Education System	150
8.2.7	Public and Private Research Institutions.....	153
8.2.8	The Industrial Sector.....	154
8.2.9	Collaboration between the Public and Private Sectors	155
8.3	Challenges for the Japanese Innovation System	156
8.4	General Framework Conditions and Infrastructure	158
8.5	Innovation Policy at the Government Level.....	161
8.6	General Outlook and Challenges for Japan's Innovation Policies.....	167

9	The Innovation System and Innovation Policy in South Korea	169
	<i>Margot Schüller, David Shim</i>	
9.1	Introduction	169
9.2	The Innovation System and its Key Actors	169
9.2.1	Political and Administrative Institutions	171
9.2.2	Research Performers.....	174
9.2.3	Research System.....	174
9.2.4	Education System	175
9.2.5	Industrial System	176
9.2.6	Intermediaries	177
9.3	South Korea's Innovation Policy	178
9.4	Assessment of South Korea's Innovation Policy	186
10	Supporting Regional Innovation Support Systems and Innovative Clusters in South Korea	189
	<i>Robert Hassink</i>	
10.1	Introduction	189
10.2	South Korea's Policy Framework.....	190
10.3	Regional Innovation Support Systems in South Korea: The Case of Gyeonggi.....	192
10.4	Innovative Clusters	195
10.5	Conclusion and Discussion.....	200
11	S&T and Innovation in India: Structure, Strategies and Policies	203
	<i>Jan Peter Wogart, Thomas Stahlecker</i>	
11.1	Introduction	203
11.2	India's S&T System	204
11.2.1	India Moves: Recent Reforms and Results	204
11.2.2	Key Actors, Knowledge Inputs and Innovation Outputs	206
11.2.3	India's Economic Structure: Old and New Faces of Dualism	208
11.2.4	Science and Technology-based Innovations and their Impact on the Indian Economy	209
11.3	Indian Strategies and Policies for S&T Development.....	211
11.3.1	National Plans and Proposals.....	211
11.3.2	International S&T and Innovation: Strategies and Policies	213
11.4	Summary and Conclusions.....	219

12 From Traditional to Innovative Government R&D in India: The Case of CSIR	229
<i>Jan Peter Wogart</i>	
12.1 Introduction	229
12.2 From Founding CSIR in the 1940s to Changing CSIR in the 1990s	230
12.3 Strategic and Structural Changes in the last 20 Years (1988 to 2007)	231
12.4 Future Perspectives and Possible Lessons from China	237
13 China: Innovation System and Innovation Policy	241
<i>Henning Kroll, Marcus Conlé, Margot Schüller</i>	
13.1 Outstanding Features of China's Innovation System	241
13.1.1 Political & Administrative Institutions	243
13.1.2 Relations between the Industrial and the Research Sector	244
13.1.3 Foreign Investment in Science & Technology	246
13.2 Innovation Policy	247
13.2.1 Historical Development	247
13.2.2 Recent Trends in Innovation Governance	248
13.2.3 Direct Innovation Policies	250
13.2.4 Framework and Indirect Policies	256
13.3 Summary and Future Challenges	261
14 Chinese Environmental Innovation Policy: Retrospect and Prospect	265
<i>Haifeng Huang, Guomei Zhou, Min Liu, Huiying Li</i>	
14.1 Introduction	265
14.2 The Concept of Environmental Innovation	265
14.3 The Development of Chinese Environmental Innovation	266
14.4 Environmental Innovation Development Model	269
14.5 China's Policy Analysis of Environmental Innovation	271
14.6 Measures of Environmental Innovation in China	275
14.7 Future Prospects of Chinese Environmental Innovation	277
15 Authors	279
16 Literature	281
