Alicia Gutiérrez González

The Protection of Maize under the Mexican Biosafety Law: Environment and Trade

Universitätsverlag Göttingen
2010
CHAPTER I

BIOTECHNOLOGY AND BIODIVERSITY: DEVELOPMENTS, POTENTIALS AND CONCERNS

INTRODUCTION

A. Development of Biotechnology
   I. Historical Development
   II. Overview of Biotechnology
   III. Categorisation of Biotechnology
   IV. Benefits and Risks of Biotechnology
   V. Biotechnology and its Commercial Use from 1996 to 2008
   VI. Important Biotechnology Institutes in Mexico
   VII. Multinational Biotech Corporations

B. Protection of Biodiversity in Mexico with Special Focus on Maize
   I. Current Mexican Protection of Biodiversity
   II. Defining Maize (Zea Mays Subsp. Mays)
   III. Mexico as Centre of Origin and Diversity of Maize
   IV. Importance of Maize both Worldwide and for Mexico
   V. Consumption of Maize in Developed and in Developing Countries

C. Concerns
   II. The Star-Link Event

D. Conclusion

CHAPTER II

MEXICAN AND INTERNATIONAL BIOSAFETY RULES REGARDING GENETICALLY MODIFIED ORGANISMS

INTRODUCTION

A. Early and Sectoral Approaches
   I. The United States of America (USA)
   II. Germany
   III. The European Union
   IV. Mexico
B. Conceptualization of the Issue with Relevance to Biodiversity and Biotechnology by the Lead of the CBD and the BSP .......................................................... 92
   I. Agenda 21 ....................................................................................... 94
   II. Convention on Biological Diversity ............................................ 95
   III. Cartagena Protocol on Biosafety ................................................. 97
   VI. Other International Developments .............................................. 104
C. The Mexican Biosafety Law as an Implementation of International
   Commitments in the Sense of a Homogenous Approach ....................... 112
   I. Hierarchy of International Agreements in Mexico ......................... 112
   II. Historical Development of the Mexican Biosafety Law .................. 114
   III. Coordination of Biotechnology Policies ..................................... 115
   IV. Adoption of the Precautionary Principle .................................... 118
   V. National Register of Biosafety on GMO’s .................................... 120
   VI. The Information System of Living Modified Organisms
       (SIOVM) ....................................................................................... 122
   VII. Objectives and Scope of the Mexican Biosafety Law .................. 123
   VIII. The Risk Assessment Applying the Precautionary Principle
         on a Case-by-case Basis .............................................................. 123
   IX. Procedure for Approval of Permits for the Release of
       GMO’s into the Environment ....................................................... 126
   X. Procedure for Authorization of GMO’s Intended for Direct
       Use as FFP’s, Including Imports ................................................ 130
   XI. Imports and Exports of GMO’s .................................................. 132
   XII. Restriction of Release of GMO’s into the Environment ............... 133
   XIII. Regime for Special Protection of Maize .................................... 136
D. Conclusion ...................................................................................... 138

CHAPTER III ............................................................................................. 141

THE MEXICAN BIOSAFETY LAW AND THE NAFTA/WTO REGIMES
REGARDING IMPORTS OF GM MAIZE ............................................... 141
INTRODUCTION ...................................................................................... 141

A. Process of Economic Liberalisation in Mexico .................................. 142
   I. Agricultural Policies Objectives from 1990 to 2008 ....................... 143
   II. Liberalization of the Corn Market: Domestic Intervention
       ........................................................................................................... 145
III. Asymmetries in Terms of Economics, Technology, Production Factors, and Agricultural Policies and Support between Mexico vis-á-vis USA Regarding Maize.................147
IV. Elimination of Trade Barriers and the Protection for Import-Sensitive Products such as Maize within the NAFTA Regime.................................................................149

B. The Mexican Biosafety Law and the NAFTA/WTO Regimes........156
   I. General Trade Rules.........................................................156
   II. National Policy Exceptions.............................................159

C. Imports of GM Maize..........................................................164
   I. Harmonization of Labelling and Identification of GMO’s Imports within NAFTA .........................................................165
   II. Labelling and Identification Requirements of GMO’s Imports..................................................................................166
   III. Imports Bans within the Agreement on Technical Barriers to Trade (TBT Agreement) and the Agreement on the Application of Sanitary and Phytosanitary Measures (SPS Agreement).................................................................173

D. Conclusion.............................................................................180

SUMMARY................................................................................182

BIBLIOGRAPHY........................................................................186

INDEX.......................................................................................206
