Contents

Volume 1

Foreword and Acknowledgments ................................................................. vii

Introduction: Mass Customization Thinking:
Moving from Pilot Stage to an Established Business Strategy ..................... 1

1 Strategic Aspects of Managing Mass Customization & Personalization .... 19

1.1 From Mass Production to Mass Customization: Hindrance Factors,
Structural Inertia and Transition Hazard .................................................. 21

1.2 How to Implement a Mass Customization Strategy: Guidelines for
Manufacturing Companies ....................................................................... 44

1.3 Media Market Inertia: A Potential Threat to Success
of Mass Customization .......................................................................... 65

1.4 Operationalizing Mass Customization – A Conceptual Model Based
on Recent Studies in Furniture Manufacturing ....................................... 79

1.5 Beyond Mass Customization: Exploring Features of a New Paradigm .... 97

1.6 Is the Best Product a Unique Product? Exploring Alternatives
to Mass Customization with the Online Community of Threadless .... 118

1.7 Before Pine and Dell: Mass Customization in Urban Design,
Architecture, Linguistics, and Food ....................................................... 139

2 Consumer Studies & Marketing Aspects ..................................................... 159

2.1 Typology of Potential Benefits of Mass Customization Offerings for
Customers: An Exploratory Study of the Customer Perspective ............ 161

2.2 The Co-Design Experience: Conceptual Models and Design Tools
for Mass Customization ....................................................................... 181

2.3 Why Consumers Are Willing to Pay for Mass Customized Products:
Dissociating Product and Experiential Value ........................................ 208

2.4 Sneakerheads and Custom Kicks: Insights into
Symbolic Mass Customization ................................................................ 226

2.5 E-Customization: Research and Applications from the
Cognitive Learning Theory ..................................................................... 240

2.6 Modularity as a Base for Efficient Life Event Cycle Management ...... 263
2.7 Bundling, Mass Customization, and Competition under Consumption Uncertainty

3 Building the Solution Space: Product & Process Design for Mass Customization

3.1 Towards a Knowledge Support System for Product Family Design
3.2 Product Family Modeling: Working With Multiple Abstraction Levels
3.3 Market-based Strategic Platform Design for a Product Family Using a Bayesian Game
3.4 Knowledge Based Configurable Product Platform Models
3.5 Change Prediction for Mass Customized Products: A Product Model View

4 Making Manufacturing & Supply Chain Management for MCP Work

4.1 An Agility Reference Model for the Manufacturing Enterprise: The Example of the Furniture Industry
4.2 Overcoming Configuration Process Complexity of Highly Customizable Components
4.3 Mass Customization of Responsive Automated Assembly Cells
4.4 A Prioritization Algorithm for Configuration Scheduling in a Mass Customization Environment
4.5 Procurement Mechanisms for Customized Products

5 Rapid Manufacturing for Mass Customization

5.1 Extreme Customization: Rapid Manufacturing Products that Enhance the Consumer
5.2 e-Manufacturing – Making Extreme Mass Customization Real by Laser-Sintering
5.3 RepRap: The Replicating Rapid Prototyper: Maximizing Customizability by Breeding the Means of Production
5.4 Customization of Consumer Goods: First Steps to Fully Customizable Fashionable Ladies' Shoes
Volume 2

Foreword and Acknowledgments

Introduction and Overview

1 Customization & Personalization of Services

1.1 How to Master the Challenges of Service Mass Customization – A Persona-Based Approach

1.2 Mass Customization in Wireless Communication Services: Individual Services and Tariffs

1.3 Unraveling the Service Innovation Dilemma: The Promise of Network Embeddedness

1.4 Emotional Design Techniques in the Personalization of Services

1.5 One Size Fits All, Made-to-Measure, and Bespoke Tailoring: Challenges in Building an Attractive Service Portfolio

1.6 Mass Customization for Individualized Life-long Learning: Needs, Design, and Implementation

1.7 A Mass of Customizers: The WordPress Software Ecosystem

2 Beyond Bespoke Tailoring: Mass Customization in the Apparel Industry

2.1 Virtual Fit of Apparel on the Internet: Current Technology and Future Needs

2.2 RFID Diffusion in Apparel Retail: How Consumer Interest and Knowledge Lead to Acceptance

2.3 Discard "one size fits all" Labels! Proposal for New Size and Body Shape Labels to Achieve Mass Customization in the Apparel Industry

2.4 Developing Considerate Design: Meeting Individual Fashion and Clothing Needs Within a Framework of Sustainability

2.5 Customized Garment Creation with Computer-Aided Design Technology

2.6 A Case Study in Personalized Digitally Printed Clothing

3 Mass Customization in Architecture and Construction

3.1 Customizing Building Envelopes: Retrospects and Prospects of Customization in the Building Industry
