Preface 19  

## 1. Introduction 21

1.1 The research design 24  
1.2 Case selection 28  
1.3 State of the literature 32  

## 2. Definitions 39

2.1 Innovation, innovation capacity and the knowledge economy 39  
2.2 Innovation systems 42  
2.3 Interaction and networks 45  
2.4 Science, Technology & Innovation policy - The distinctiveness of the policy field 46  

## 3. The Interplay of National and Regional Innovation Systems 49

3.1 The national dimension of innovation 49  
3.2 The regional dimension of innovation 53  

## 4. The politics between national and regional level: Multi-level governance 59

4.1 Multi-level Governance Type I - Federalism 61  
4.1.1 The balance of centralization and decentralization 63  
4.1.2 Specific aspects of federalism regarding ST&I policies 65  
4.2 Multi-level Governance Type II: Devolution of ST&I policies 67  
4.3 Policy Networks 69  
4.4 Towards a framework of analysis 73
4.4.1 National and regional innovation systems

4.4.2 Multi-level governance and the arenas of negotiation

5. Innovation systems in the South and the challenges for development

5.1 Structural features of innovation systems in the South

5.2 ST&I policies for competitiveness and the challenges for emerging economies

5.2.1 The technological gap between developing and industrialized countries

5.2.2 Export orientation and the resulting challenges

6. Introducing Brazil. Some remarks on the country’s economic history

6.1 Technology policy during military rule from 1964 until 1985

6.2 The weakness of the NIS and the end of import substitution industrialization

6.3 Regional development during the ISI period

6.4 Structural adjustment and the need for competitiveness

6.5 Regional development and federalism in the 90s

6.6 Where Brazil currently stands: Some facts and figures

7. Characteristics and institutions of the national level

7.1 Conselho Nacional de Ciência e Tecnologia – CCT

7.2 The Ministry for Science and Technology (MCT)

7.2.1 The Action Plan for Science, Technology and Innovation 2007-2010 (PACTI)

7.2.2 The Brazilian Innovation Agency FINEP

7.2.3 The Sectoral Funds for S&T (Fundos Setoriais para Ciência e Tecnologia)

7.3 The “Lei do Bem” and the “Lei de Inovação”

7.4 The higher education sector and the scientific community

7.5 Brazilian firms and the new Industrial, Technological and Foreign Trade Policy (PITCE)

7.6 Concrete measures to support interaction on the subnational level
8. Multi-level Governance, the arenas for negotiation and the ST&I policy network

8.1 Federalism
8.1.1 The devolution of ST&I policies
8.1.1.1 The institutional isomorphism on the subnational level
8.1.1.2 The concentration of innovative capabilities
8.1.2 The process of finding the right balance between centralization and decentralization of policy-making competencies
8.1.2.1 The limited power of subnational entities in national politics
8.1.2.2 The federal policy monopoly due to tight subnational budgets
8.2 ST&I policies in Congress
8.2.1 Some general features of congressional politics
8.2.2 The limited interest of ST&I in Congress
8.3 The National Council of State Secretaries for Science and Technology (CONSECTI)
8.4 The power structure of the policy network
8.4.1 The structure prior to the PACTI 2007-2010
8.4.2 The current structure of the policy network

9. Evidence of two regional innovation systems

9.1 Introducing Espírito Santo
9.1.1 Endogenous potential and impact of the national level
9.1.2 The role of UFES in the RIS
9.1.3 The role of regional politics
9.1.4 Assessing the ES case
9.2 Introducing Rio Grande do Sul
9.2.1 The impact of the national level and the important role of universities in RS
9.2.2 The role of the Industrial Federation FIERGS
9.2.3 The role of regional politics and the SECT-RS
9.2.4 Regional development plans
9.2.5 Assessing the gaúcho case
9.3 Results from the case studies

10. Conclusions

10.1 Political factors why the innovative capabilities are so low
10.2 Case specific and general hypothesis
10.3 Outlook and suggestions to meet the policy challenges
