Essays on the Economics of Intellectual Property Rights, Innovation, and Marketing

A dissertation presented

by

Yi Qian

to

The Economics Department

in partial fulfillment of the requirements
for the degree of
Doctor of Philosophy
in the subject of economics

HARVARD UNIVERSITY
Cambridge, Massachusetts

June, 2006
Contents

1.1 Introduction ................................................. 1
1.2 Data ......................................................... 6
  1.2.1 Design of the Study ...................................... 6
  1.2.2 Selection of the Outcome Variables and Construction of the Control Variables .......... 8
  1.2.3 Control Variables for Latent Innovative Potential ............ 10
  1.2.4 Interaction Variables for the Conditional Importance of Patent Implementation ......................................... 12
1.3 Methodology .................................................. 12
  1.3.1 Matched Sampling ....................................... 12
  1.3.2 Regression Models ...................................... 17
1.4 Results ....................................................... 21
  1.4.1 Using Citation-weighted US Patents as Innovation Proxy ... 21
  1.4.2 Using R&D Expenditures and Personnel as Innovation Proxies ................................................. 27
  1.4.3 Checking Potential Biases due to Small Samples and Omitted Variables ......................................... 33
1.5 Conclusions .................................................... 34

v
## Pricing and Marketing Impacts of Entry by Counterfeitters and Imitators

### 2.1 Introduction

### 2.2 VDIC Model—Vertical Differentiation with Imitation and Counterfeiting

- 2.2.1 Benchmark Setup
- 2.2.2 Asymmetric Information Implications

### 2.3 Empirical Research Design

- 2.3.1 Theoretical Implications For Empirics
- 2.3.2 Identification Problem and Solutions
- 2.3.3 Data

### 2.4 Empirical Analyses and Results

- 2.4.1 Testing Entry Effects on Prices with OLS—Table 2.1
- 2.4.2 Testing Pricing Effects and Asymmetric Information with IV Estimation and Stratification Analyses
- 2.4.3 Bayesian Model for Response Times and Prices—IV-BHCM
- 2.4.4 Quality Changes after Entry
- 2.4.5 Predicting Entry
- 2.4.6 Robustness Checks and Estimations on Other Authentic Prices and Total Profits

### 2.5 Discussion and Conclusion

## Legal Monopoly: A Propensity Score Approach to the Analysis of Patent and Antitrust Litigation

### 3.1 Introduction

### 3.2 Propensity Score Methods

### 3.3 Antitrust and Patenting Dataset

### 3.4 Results of Propensity Score Analysis

### 3.5 Cooperative Research and Antitrust
