<td>95</td>
</tr>
</tbody>
</table>
4.5 Other order types 96
   Hybrid order types 96
   Conditional order types 98
   Hidden order types 100
   Discretionary order types 103
   Routed order types 106
   Crossing order types 108
   Order-contingent order types 109

4.6 Summary 112

5 Algorithm overview 115
  5.1 Introduction 115
  5.2 Categorising algorithms 116
  5.3 Common features of algorithms 118
    Algorithm parameters 118
  5.4 Impact-driven algorithms 119
    Time Weighted Average Price (TWAP) 120
    Volume Weighted Average Price (VWAP) 123
    Percent of Volume (POV) 127
    Minimal impact 130
  5.5 Cost-driven algorithms 132
    Implementation Shortfall (IS) 133
    Adaptive Shortfall (AS) 138
    Market Close (MC) 141
  5.6 Opportunistic algorithms 143
    Price inline (PI) 144
    Liquidity-driven 146
    Pair trading 150
  5.7 Other trading algorithms 154
    Multi-leg 155
    Volatility-driven 157
    Gamma Weighted Average Price (GWAP) 159
  5.8 Summary 160

6 Transaction costs 161
  6.1 Introduction 161
  6.2 The investment process 162
  6.3 Pre-trade analysis 165
    Price data 165
    Liquidity data 166
    Risk data 166
    Transaction cost estimates 167
  6.4 Post-trade analysis 167
    Performance analysis 167
    Post-trade transaction costs 172
  6.5 Breaking down transaction costs 173
    Investment-related costs 175
    Trading-related costs 176
    Summary 184
  6.6 Transaction costs across world markets 184
6.7 Summary 186

7 Optimal trading strategies 189
7.1 Introduction 189
7.2 Assessing the difficulty of orders 190
7.3 Selecting the optimal trading strategy 192
   The efficient trading frontier 192
   Choosing the benchmark 194
   Determining the level of risk aversion 196
   Choosing a trading goal 196
   Determining the optimal trading horizon 198
7.4 Choosing between trading algorithms 199
   Mapping algorithms to the efficient trading frontier 199
   Factors affecting algorithm choice 203
   Other requirements for trading algorithms 208
7.5 To cross or not to cross? 211
7.6 Market conditions during the 2007-09 financial crisis 213
7.7 A decision tree for strategy selection 214
7.8 Summary 217

Part III Implementing trading strategies 219

8 Order placement 221
8.1 Introduction 221
8.2 Price formation 222
   Valuation 222
   Models of price formation 223
8.3 Price discovery/Order matching 226
   Continuous matching 226
   Call-based matching 231
8.4 Order placement decisions 234
   Signalling risk 234
   Venue choice 235
   Order choice 237
   Order aggressiveness 237
   Market factors affecting order placement decisions 238
8.5 Dealing with hidden liquidity 247
   Spotting hidden liquidity 248
   Estimating the probability of hidden liquidity 250
8.6 Estimating execution probability 252
8.7 Summary 254

9 Execution tactics 257
9.1 Introduction 257
9.2 Designing execution tactics 258
   Impact-driven tactics 259
   Price/Risk-driven tactics 262
   Opportunistic/Liquidity-driven tactics 265
9.3 Algorithm selection 270
10 Enhancing trading strategies

10.1 Introduction

10.2 Forecasting market conditions
   - Predicting asset prices
   - Predicting trading volume
   - Predicting liquidity
   - Predicting volatility

10.3 Estimating transaction costs
   - Market impact
   - Timing risk

10.4 Handling special events
   - Predictable events
   - Unpredictable events

10.5 Summary

11 Infrastructure requirements

11.1 Introduction

11.2 Order management
   - Order entry
   - Order routing

11.3 Algorithmic trading
   - Infrastructure requirements for algorithmic trading
   - Designing an environment for algorithmic trading
   - Implementing trading rules
   - Testing

11.4 Other requirements
   - Clearing and settlement
   - Regulations compliance

11.5 Summary

Part IV Advanced trading strategies

12 Portfolios

12.1 Introduction

12.2 Portfolio risk
   - Portfolio volatility
   - Diversification
   - Decomposing portfolio risk
   - Portfolio risk measures

12.3 Transaction cost analysis for portfolios
   - Market impact
   - Timing Risk

12.4 Optimal portfolio trading
   - Additional goals for portfolio trading
   - Hedging
   - Minimising the overall portfolio risk
12.5 Portfolio trading with algorithms

Portfolio trading with standard trading algorithms
Tailoring algorithms for portfolio trading

12.6 Summary

Addendum A: Covariance

13 Multi-asset trading

13.1 Introduction

13.2 Multi-asset trading strategies

13.3 Utility strategies

FX cash trades
Covering short sales

13.4 Structured strategies

Principal protected notes

13.5 Hedging strategies

Hedging market risk
Hedging interest rate risk
Hedging derivative risk factors (the “Greeks”)

13.6 Arbitrage strategies

Multiple listing/depositary receipt arbitrage
Basis trading
Index arbitrage
ETF Index Arbitrage
Option arbitrage
Futures and options arbitrage
Dividend arbitrage

13.7 Adapting algorithms for multi-asset trading

Factors to consider for multi-asset trading algorithms
Minimising risk
Trading algorithm choice

13.8 Summary

14 News

14.1 Introduction

14.2 Types of news

Macroeconomic news
Corporate news

14.3 The changing face of news

Digitisation of news
Digitisation of corporate reports/research
Changing sources of news

14.4 Computerised news handling techniques

News filtering
News association
News analysis
News interpretation
News mining

14.5 Market reactions to news

Reactions to macroeconomic news
Reactions to corporate news/announcements
Other factors which affect the impact of news

14.6 Incorporating news into trading strategies

- Precautions for automated news handling
- Potential news-based indicators
- News-based algorithms

14.7 Summary

15 Data mining and artificial intelligence

15.1 Introduction

15.2 Data mining

- Data mining techniques
- Finding patterns/associations

15.3 Artificial Intelligence

- Types of artificial intelligence
- Predicting data and trends

15.4 Incorporating in trading strategies

- Applying short-term forecast models
- Generating trading strategies/rules/parameters
- Back-testing

15.5 The future

15.6 Summary

Epilogue

Appendices

A Equity markets
B Fixed income markets
C Foreign exchange markets
D Money markets
E Derivatives markets
F Other markets
