Introduction to Estimating Economic Models

Atsushi Maki
Contents

List of figures ix
List of tables xi
Preface xv

1 Introduction 1
  1.1 Overview 1
  1.2 Experimental design 1
  1.3 Introduction of stochastic concept 5
  1.4 Data sets derived from the Monte Carlo method 6

2 Consumer behavior 10
  2.1 Theory of consumer behavior 10
  2.2 Model 15
  2.3 How to generate a data set by the Monte Carlo method 17
  2.4 Examples 18
  Bibliography 50

3 Producer behavior 51
  3.1 Theory of producer behavior 52
  3.2 Models 55
  3.3 How to generate a data set by the Monte Carlo method 57
  3.4 Examples 61
  Bibliography 78

4 Market equilibrium models 79
  4.1 Theory of market equilibrium 80
  4.2 Identification problem 84
  4.3 Models: competitive, oligopolistic, and monopolistic markets 91
  4.4 How to generate a data set by the Monte Carlo method 96
  4.5 Examples 101
  Bibliography 110
Contents

5 Macroeconomic models 111
  5.1 General models 112
  5.2 Empirical models 117
  5.3 How to generate a data set by the Monte Carlo method 124
  5.4 Examples 128
  Bibliography 141

6 Microeconomic analysis using micro-data:
  qualitative-response models 142
  6.1 Qualitative-response models 143
  6.2 How to generate a data set by the Monte Carlo method 150
  6.3 Examples 156
  6.4 The merits of micro-data sets revisited 165
  Bibliography 166

7 Microeconomic analysis using panel data 167
  7.1 Models 167
  7.2 How to generate a data set by the Monte Carlo method 173
  7.3 Examples 176
  Bibliography 180

8 Macroeconomic time-series analysis 181
  8.1 Characteristics of time series and time-series models 182
  8.2 How to generate a data set by the Monte Carlo method 185
  8.3 Examples 186
  Bibliography 195

9 Summary and conclusion 197
