NEW DEVELOPMENTS IN COMPUTABLE GENERAL EQUILIBRIUM ANALYSIS FOR TRADE POLICY

Edited by
John Gilbert

Department of Economics and Finance,
Jon M. Huntsman School of Business, Utah State University,
Logan, UT, USA

United Kingdom – North America – Japan
India – Malaysia – China
CHAPTER 1 ESTIMATION OF PARAMETERS OF CONSTRAINED OPTIMIZATION MODELS

1 Rationality and the empirical specification of economic models
2 Three problems
  2.1 The economic model
  2.2 Extremum estimation is a bi-level programming problem
  2.3 Ill-posedness
  2.4 Derivation of estimator properties
3 A Bayesian approach
  3.1 Ill-posed inverse problems
  3.2 A Bayesian point estimator
  3.3 Solving the bi-level program
  3.4 Estimator properties
4 Demonstration of the concepts
  4.1 A synthetic economic model
  4.2 Stochastic model
  4.3 Likelihood function
  4.4 Prior information
  4.5 Posterior density function
  4.6 Posterior mode estimator
  4.7 A bi-level programming solution
  4.8 Importance sampling for mean and variance
  4.9 Other applications
5 Conclusion

CHAPTER 2 TRADE LIBERALIZATION AND THE EXTENSIVE MARGIN OF TRADE IN A CGE MODEL WITH HETEROGENEOUS FIRMS

Fan Zhai

1 Introduction
2 The CGE model
   2.1 Demand
   2.2 Production and trade
   2.3 Equilibrium and closure
   2.4 Calibration
3 Extensive and intensive margins of trade
4 Concluding comments
References

CHAPTER 3 WELFARE GAINS FROM CHANGING PARTNERS IN A TRADE BLOC: THE CASE OF MERCOSUR

Lorenzo Caliendo and Fernando Parro

1 Introduction
2 A quantitative model for trade policy analysis
3 MERCOSUR: characteristics and trade policy
   3.1 Historical background
   3.2 Interregional tariffs
   3.3 Common external tariff
   3.4 Has MERCOSUR increased trade among members?
4 Quantitative exercise: data
5 Quantitative exercise: counterfactual scenarios and results
6 Summary and conclusion
Acknowledgments

CHAPTER 4 THE ECONOMY-WIDE EFFECTS OF FURTHER TRADE REFORMS IN TUNISIA'S SERVICES SECTORS

Philippa Dee and Ndiame Diop

1 Introduction
2 Methodological approach to measure services trade barriers
3 Benchmarking Tunisia on services restrictiveness
4 Reform options
   4.1 Reform strategies
   4.2 First-round impacts on sectoral prices
5 The economy-wide effects of services trade liberalization in Tunisia
Chapter 5: U.S. Imports of Low-Skilled Labor: Restrict or Liberalize?

Peter B. Dixon and Maureen T. Rimmer

1 Introduction 104
2 Description of simulations and key results 105
  2.1 Description 105
  2.2 Overview of principal results 108
3 Business-as-usual forecast 113
4 Restricting the supply of illegal labor by tighter border security: Simulation 1 114
  4.1 Macroeconomic effects of reducing the supply of illegal immigrants 114
  4.2 Industry effects of reducing the supply of illegal immigrants 117
  4.3 Occupation and wage effects 119
  4.4 Effects on the welfare of U.S. households 122
5 Liberalizing through a guest-worker program: Simulations 2–6 125
  5.1 Simulation 2: Liberalized entry with no change in characteristics 126
  5.2 Simulation 3: Liberalized entry with increased substitutability 126
  5.3 Simulation 4: Liberalized entry with increased substitutability and increased productivity 127
  5.4 Simulations 5 and 6: Liberalized entry with increased substitutability, increased productivity and visa charges 129
6 Concluding remarks 130
  6.1 Policy approaches to illegal immigration 130
  6.2 Methodological issues 132
Appendix: the USAGE labor-market extension for the study of illegal immigration 133
  A1 Introduction 133
  A2 Workforce, categories, functions, and activities 136
  A3 Labor supply from each category to each activity 138
  A4 Demand for labor in the United States 141
  A5 Relationship between after-tax and before-tax wage rates in the United States 144
CHAPTER 6  MODELING BIOFUELS POLICIES IN GENERAL EQUILIBRIUM: INSIGHTS, PITFALLS, AND OPPORTUNITIES  
Alla Golub, Thomas W. Hertel, Farzad Taheripour and Wallace E. Tyner

1 Motivation  
1.1 Why is it important to provide quantitative analyses of biofuels? 153
1.2 Why CGE analysis? 156

2 Modeling framework 158
2.1 Key elements of the GTAP model for biofuel analysis 158
2.2 Extensions to the GTAP model for biofuel analysis 165

3 Selected applications 168
3.1 Historical analysis of the biofuels boom 168
3.2 Global GHG emissions from land use change 170
3.3 Interplay between biofuels and the livestock sectors 176
3.4 How robust are these findings? Sensitivity analysis of biofuel impacts 179

4 Conclusions and future challenges 181
Acknowledgments 184
References 184

CHAPTER 7  BIOECONOMICS AND INTERNATIONAL TRADE: THE CASE OF THE GREAT SALT LAKE, UTAH  
David C. Finnoff and Arthur J. Caplan

1 Introduction 189
2 The Great Salt Lake ecosystem 191
3 The GSL regional and international economies 199
3.1 The brine shrimp fishery 201
3.2 The mineral extraction sector 202
3.3 The agricultural sector 202
3.4 The recreation/wildlife-viewing sector 203
3.5 The composite good sector 203
3.6 The household sector 204
3.7 The market-clearing and endowment-updating equations 206
Contents

4 Simulation results 208
5 Conclusions 211
Acknowledgments 212
Technical Appendix 212
References 215

CHAPTER 8 EXPLORING POVERTY IMPACTS OF ASEAN TRADE LIBERALIZATION FOR CAMBODIA, LAO PDR, THAILAND AND VIETNAM 217
Anna Strutt, Thomas W. Hertel and Susan Stone

1 Introduction 217
2 Overview of Cambodia, Lao PDR, Thailand, and Vietnam 218
3 Modeling framework and data
  3.1 The GTAP model and database 221
  3.2 Analysis of poverty impacts 223
4 Potential impacts of ASEAN trade liberalization 233
  4.1 Overall impacts of ASEAN liberalization 233
5 Concluding comments
References 243

CHAPTER 9 REGIONAL TRADE REFORM UNDER SAFTA AND INCOME DISTRIBUTION IN SOUTH ASIA 247
John Gilbert and Reza Oladi

1 Introduction 247
2 Literature review 248
3 South Asian trade and poverty patterns 252
4 Methodology
  4.1 Model 256
  4.2 Data 257
  4.3 Experimental design 258
5 Results and discussion 260
6 A future extension 264
7 Concluding comments
References 269

CHAPTER 10 REGIONAL TRADE OPPORTUNITIES FOR ASIAN AGRICULTURE 273
Shikha Jha, David Roland-Holst, Songsak Sriboonchitta and Drew Behnke

1 Introduction 274
2 Motivation and background 275
  2.1 Evidence from high income Asia 275
2.2 People's Republic of China 277
2.3 Greater Mekong subregion 279
3 The dynamic forecasting model 280
  3.1 Scenarios 282
4 Simulation results 286
5 Conclusions and policy implications 297
   Acknowledgments 300
   References 301

CHAPTER 11  COMPUTATIONAL ANALYSIS OF
THE MENU OF U.S.–JAPAN TRADE
POLICIES 303
  Drusilla K. Brown, Kozo Kiyota and
  Robert M. Stern

1 Introduction 304
2 The Michigan Model of World Production and Trade 305
  2.1 Overview of the Michigan Model 305
  2.2 Benchmark data 311
3 Computational analysis of U.S. free trade agreements 315
4 Computational analysis of Japan's free trade agreements 337
5 Hub and spoke effects of the U.S. and Japan FTAs 346
6 Welfare effects of unilateral free trade and global
   free trade 349
7 Summary and conclusions 352
   Acknowledgments 352
   Appendix 353
   References 353

CHAPTER 12  CHINA’S GROWING PARTICIPATION
IN PREFERENTIAL TRADE AGREEMENTS:
IMPLICATIONS FOR CHINA AND
ITS TRADING PARTNERS 357
  Robert Scollay and John Gilbert

1 Introduction 357
2 Modeling approach 361
3 Results and policy discussion 365
  3.1 Welfare effects 365
  3.2 Effect on exports 369
4 Conclusions 375
   References 377
CHAPTER 13  EX ANTE ASSESSMENT OF THE WELFARE IMPACTS OF TRADE REFORMS WITH NUMERICAL MODELS
Joseph F. Francois and Will Martin

1 Introduction 379
2 Does trade really matter? 383
3 What should we measure?
   3.1 Integrating the different sources of welfare gains 389
   3.2 The relationship between money metric and national accounts measures 394
4 Representing different types of trade barriers 395
   4.1 Tariffs 396
   4.2 Export taxes 398
   4.3 Export subsidies 398
   4.4 Nontariff measures 399
   4.5 Foreign exchange distortions 401
   4.6 Procedural barriers 401
   4.7 Services trade barriers 402
   4.8 Specification of the counterfactual level of protection 403
5 Problems in measuring welfare change 404
   5.1 Aggregation of distortions 404
   5.2 Revenue utilization and dissipation 405
   5.3 Labor markets 407
   5.4 Parameter estimates 409
6 Productivity and competition effects 410
   6.1 Variety with identical firms 410
   6.2 Variety, heterogeneous firms, and firm efficiency 411
   6.3 Oligopoly 413
   6.4 New products and new markets 414
7 Quantifying investment effects 414
   7.1 Adjustment costs 417
8 Exploring relative magnitudes 419
9 Conclusions and recommendations 421
References 424
