### Chapter 1  ORIGIN AND DEVELOPMENT OF INDUSTRIAL STRUCTURE THEORY

1.1 Meaning of Industrial Structure 1

1.2 Origin of Industrial Structure Theory 4

1.2.1 Ideological Origin of Industrial Structure Theory 4

1.2.2 Formation of the Industrial Structure Theory 5

1.3 Development of the Industrial Structure Theory 6

1.4 Research Field and Theoretical System of Industrial Structure 14

1.4.1 Research Field of Industrial Structure 14

1.4.2 Theoretical System of the Industrial Structure 16

### Chapter 2  EVOLUTION AND LAWS OF INDUSTRIAL STRUCTURE

2.1 Related Theories on Industrial Structure Evolution 19

2.1.1 Conceptions of Three Industries 19

2.1.2 Law of Three Industrial Structure Changes: Petty–Clark Theorem 20

2.1.3 Kuznets Laws 21

2.1.4 Chenery and Others across National Models 23

2.2 General Trend in the Evolution of Industrial Structure 28

2.2.1 Stage of Industrialization Development 28
Contents

2.2.2 Conversion Process of Leading Industries 29
2.2.3 Internal Changes of Three Industries 31
2.2.4 Order of the Evolution of Industrial Structure 31
2.3 Empirical Analysis of the Typical Countries 32

Chapter 3 Rationalization of Industrial Structure 41
3.1 Meaning and Content of Industrial Structure Rationalization 41
3.1.1 Meaning of Industrial Structure Rationalization 41
3.1.2 Content of Industrial Structure Rationalization 44
3.2 Judging Benchmark for Industrial Structure Rationalization 46
3.2.1 Benchmark of International Standard Structure 46
3.2.2 Benchmark of Demand Structure 48
3.2.3 Benchmark of Balanced Ratio among Industries 50
3.3 Comparison and Determination of Industrial Structure Rationalization 51
3.4 Adjustment of Industrial Structure Rationalization 53
3.4.1 Process of Adjustment 53
3.4.2 Mechanism and Drive of Adjustment 54

Chapter 4 Advancement of Industrial Structure 57
4.1 Dynamic Reasons of the Advancement of Industrial Structure 57
4.2 Functioning Mechanism of the Advancement of Industrial Structures 60
4.3 Judgment Standard of the Advancement of Industrial Structure 62
4.3.1 International Standard Structure of the Advancement of Industrial Structure 62
4.3.1.1 Standard Structure That Takes Production Values as Indicators 62
4.3.1.2 Standard Structure That Takes the Structures of Labor Force as Indicators 63
4.3.2 Relative Comparison and Discretion of the Advancement of Industrial Structure 64
4.3.2.1 Similarity Discretion Method 66
4.4 Economic Development Stage and the Level of Advancement of Industrial Structure 68
4.4.1 Industry Stage Theory of W.G. Hoffman 68
4.4.2 Economic Growth Stage Theory of Rostow 69
4.4.3 Economic Development Stage Theory of H.B. Chenery and M. Syrquin 71
4.5 Main Influencing Factors of the Advancement of Industrial Structure 71
4.5.1 Development Level of National Economy 72

### Chapter 5  RELATIONAL ANALYSIS FOR INDUSTRIAL OUTPUT

5.1 Fundamental Tools of the Industrial Structure Relation Analysis  
5.1.1 Input-Output-Table  
5.1.1.1 Physical Input-Output Table  
5.1.1.2 Valuable Type Input-Output Table  
5.1.2 The Input-Output Model  
5.1.2.1 Calculation and Determination of Various Coefficients  
5.1.2.2 Two Basic Input-Output Models  
5.2 Analysis of the Relational Effect of the Industrial Structure  
5.2.1 Analysis of Intermediate Demand and Intermediate Input  
5.2.1.1 Intermediate Demand Rate  
5.2.1.2 Intermediate Input Rate  
5.2.1.3 Effects of the Intermediate Demand Rate and the Intermediate Input Rate  
5.2.2 Breadth and Depth of Industry-Related Effects  
5.3 Inter-Industry Effect Results Analysis  
5.3.1 Industrial Sensitivity Coefficient and Influence Coefficient  
5.3.1.1 Influence Coefficient  
5.3.1.2 Sensitivity Coefficient  
5.3.2 Industrial Production-Induced Coefficient and Final Demand-Dependent Coefficient  
5.3.2.1 Production-Induced Coefficient  
5.3.2.2 Industrial Final Demand-Dependent Coefficient  
5.3.2.3 Comprehensive Employment and Capital Coefficient

### Chapter 6  REGIONAL INDUSTRIAL STRUCTURE

6.1 Conception and Characteristic of Region  
6.1.1 Regional Classification  
6.1.1.1 Homogeneous Region  
6.1.1.2 Nodes Region
6.1.1.3 Planning Region 104
6.1.2 Characteristics of Regions 104
6.2 Optimization of Regional Industrial Structure and Economic Development 105
6.2.1 Meaning of Regional Industrial Structure 105
6.2.2 Characteristics of Regional Industrial Structure 107
6.2.3 Optimizing Regional Industrial Structure and Economic Development 108
6.3 Influence Factors of Regional Industrial Structure 111
6.3.1 Regional Factor Endowment 111
6.3.2 Demand-Oriented Structure 111
6.3.3 Inter-Regional Economic Relation 112
6.3.4 Regional Concentration Degree of Production 112
6.4 Economic Indicators to Analyze the Regional Industrial Structure 113
6.4.1 Economic Indicators Reflecting the Specialization of Regional Industrial Structure 113
6.4.1.1 Location Quotient 113
6.4.1.2 Per Capita Output Coefficient and Per Capita Production Value Coefficient 114
6.4.1.3 Regional and Inter-Regional Commodity Rate 114
6.4.1.4 Coefficient of Regional Industrial Output 115
6.4.2 Economic Indicators Reflecting the Convergence of Regional Industrial Structure 115
6.5 Regional Industrial Structure Policy 117

Chapter 7 Selection of Regional Leading Industry 121
7.1 Summarization of Selection 121
7.1.1 Conception and Function of Leading Industry 121
7.1.2 General Properties of the Leading Industry 122
7.1.2.1 Quick Growth Rate of Production 122
7.1.2.2 High Location Quotient 123
7.1.2.3 Good Market Prospect 123
7.1.2.4 Great Industrial Correlation 124
7.1.3 Realization of Leading Industry 124
7.1.3.1 Self-Regulation of Market 124
7.1.3.2 Active Intervention of the Government 125
7.1.4 Evolution Process and Characteristics of Leading Industries 125
7.1.4.1 Leading Industry Having Regional Nature 125
7.1.4.2 Natural Process of Development of Leading Industry 126
CONTENTS

7.1.4.3 Stage Property of Leading Industries 126
7.1.4.4 Sequence Succession of Evolution for Leading Industry 127
7.1.4.5 Multilevel of Leading Industries 128

7.2 Related Theories of Selection Benchmark of Regional Leading Industries 128
7.2.1 Hirschman Benchmark 128
7.2.2 Rostow Benchmark 129
7.2.3 Shinohara Benchmark 130
7.2.4 Too Dense Environment Benchmark and Rich Labor Benchmark 131

7.3 Principle of Selecting Regional Leading Industry 132
7.3.1 Maximization Principle of Income Elasticity of Demand 132
7.3.2 Maximization Principle of Rising Degree of Productivity 132
7.3.3 Maximization Principle of Industrial Correlation 133
7.3.4 Principle of Labor Force Employment 133
7.3.5 Principle of Dynamic Comparative Advantage 134

7.4 Measuring Indexes of Selecting Regional Leading Industry 135
7.4.1 Index of Industrial Correlation 135
7.4.2 Index of Income Elasticity of Demand 136
7.4.3 Index of Technological Progress 136
7.4.4 Index of Growth 137
7.4.5 Index of Employment 137
7.4.6 Index of GDP Proportion 137

Chapter 8 Optimization Model of Regional Industrial Structure 139
8.1 Model of Estimating the Order Degree of Industrial Structure 139
8.2 “Fast Track” Model of Industrial Structure Adjustment 141
8.3 Grey Dynamic Linear Programming Model of Industrial Structure Adjustment 145
8.4 Grey Clustering Decision-Making Model of the Selection of Regional Leading Industries 148

Chapter 9 Research on Industrial Structure Optimization and Upgrading in M City, W Province during the Period of “11th Five-Year Plan” 155
9.1 Status Quo and Problems in the Industrial Structure of M City 156
CONTENTS

9.1.1 Analysis of the Internal Structure of the Three Major Industries in M City 156
  9.1.1.1 Analysis of the Internal Structure of the Primary Industry 156
  9.1.1.2 Analysis of the Internal Structure of the Secondary Industry 157
  9.1.1.3 Analysis on the Internal Structure of the Tertiary Industry 158

9.1.2 Problems in the Industrial Structure of M City 158
  9.1.2.1 High Proportion of Employment in the Primary Industry 159
  9.1.2.2 Single Internal Industrial Structure 159
  9.1.2.3 Serious Lack of Development in the Tertiary Industry 159
  9.1.2.4 Low Industrial Technology Level and Added Value 160

9.2 Main Influence Factors of the Industrial Structure Upgrading in M City 160
  9.2.1 Impact of Science and Technology 160
  9.2.2 Impact of Investment Structure 161
  9.2.3 Impact of Labor Force 163
  9.2.4 Impact of Industrial Policies 164
  9.2.5 Impact of Natural Resources 165
  9.2.6 Impact of Changes in Demand 166

9.3 Selection of Leading Industries in M City 167
  9.3.1 Index System of the Selection of Leading Industries in M City 167
  9.3.2 Selection of Leading Industries in M City 169

9.4 Industrial Structure Optimization of M City 175
  9.4.1 Optimization of the Industrial Structure and Employment Structure of Three Major Industries in M City during the Period of 11th Five-Year Plan 175
  9.4.2 Internal Structure Optimization Program of the Primary Industry in M City 181
  9.4.3 Internal Structure Optimization Program of the Secondary Industry in M City 185
  9.4.4 Internal Structure Optimization Program of the Tertiary Industry in M City 190

Chapter 10 Keystones and Ideas of the Industrial Structure Adjustment in S Province 195

10.1 Current Situation and Problems in the Industrial Structure in S Province 195
CONTENTS

10.1.1 Current Situation Analysis of the Industrial Structure in S Province 195
  10.1.1.1 Comparative Analysis of the Industrial Structure between S Province and Other Provinces in the Country 195
  10.1.1.2 Analysis of the Internal Structure of the Primary Industry in S Province 196
  10.1.1.3 Analysis of the Internal Structure of the Secondary Industry in S Province 198
  10.1.1.4 Analysis of the Internal Structure of the Tertiary Industry in S Province 199

10.1.2 Characteristics of the Evolution of the Industrial Structure in S Province 200

10.1.3 Problems in the Industrial Structure in S Province 202
  10.1.3.1 Low Proportion of the Tertiary Industry in the Three Major Industries 202
  10.1.3.2 Low Proportion of Scientific and Technological Industries in the Three Major Industries 203

10.2 Selection of Leading Industries in S Province 208
  10.2.1 Evaluation Index System in the Selection of Leading Industries in S Province 208
  10.2.2 Selection of Leading Industries and Auxiliary Industries in S Province 210

10.3 S Direction and Keystone of the Industrial Structure Adjustment in S Province 216
  10.3.1 Direction of the Industrial Structure Adjustment in the Three Major Industries in S Province 216
  10.3.2 Direction of the Internal Industrial Structure Adjustment in the Primary Industry in S Province 224
  10.3.3 Direction of the Internal Industrial Structure Adjustment in the Secondary Industry in S Province 227
  10.3.4 Direction of Internal Restructuring in the Tertiary Industry in S Province 234

Chapter 11 Research on Approaches to Industrial Structure Upgrading of S Province 241

11.1 Background of Industrial Structure Upgrading of S Province 241
11.2 Comprehensive Evaluation and Analysis of the Industrial Structure of S Province 244
   11.2.1 Association Analysis of the Industrial Structure of S Province 244
      11.2.1.1 Comparison of Input-Output Correlation Coefficients 245
      11.2.1.2 Comparison of Input-Output Tables of 1997 and 2000 246
   11.2.2 Quadratic Programming Mathematical Model of Industrial Structure of S Province 250
   11.2.3 Comparative Analysis of Industrial Structure between S Province and Other Provinces 253
      11.2.3.1 Comparison of the Inner Structure of the Primary Industry of Different Provinces 255
      11.2.3.2 Comparison of Inner Structure of Secondary Industry of Different Provinces 256
      11.2.3.3 Comparison of the Inner Structure of Tertiary Industry of Different Provinces 259

11.3 Approaches to Industrial Structure Upgrading of S Province 260
   11.3.1 General Targets of Upgrading the Industrial Structure of S Province 260
   11.3.2 Choice of Upgrading Industrial Structure of S Province 263
      11.3.2.1 Approaches to Industrial Structure Upgrading in the Southern Region 263
      11.3.2.2 Approaches to Industrial Structure Upgrading in the Central Region 266
      11.3.2.3 Approaches to Industrial Structure Upgrading in the Northern Region 270

11.4 Countermeasure of Realizing the Upgrading of Industrial Structure in S Province 274
   11.4.1 Establishing the Scientific Development View, Further Enhancing the Understanding, Creating Good Environment for Upgrading Industrial Structure 274
   11.4.2 Guaranteeing Steady Development and Advancing the Upgrading of Regional Agriculture Industrial Structure 275
   11.4.3 Multi-Pronged and Uneven Advancement of the Upgrading of Secondary Industrial Structure 276
11.4.3.1 Strengthening the Macroscopic Management, Concentrating Efforts, Limiting Objectives, Prominent Key

11.4.3.2 Advancing the Dynamics of Enterprise

11.4.3.3 Cultivating Industry Colony and Strengthening the Regional Industry Innovation Ability

11.4.4 Positively Developing the Emergent Industry and Realizing the Upgrading of Tertiary Industry Structure

11.4.4.1 Adjusting Investment Trends, Carrying on Investment Guidance according to the Collective Services, Half-Collective Services, Personal Services

11.4.4.2 Implementing Innovation of Scientific Services, Positively Introducing New Technology of Service, Promoting Modernization of Tertiary Industry and Increasing the Provision of New Service Products

11.4.4.3 Loosening and Enhancing Quality Price Difference of Service Products

11.4.4.4 Vigorously Cultivating Emergent Industries and Adjusting Internal Structure of the Tertiary Industry

11.4.5 Advancing the Step to Develop High and New Technology Industries

11.4.5.1 Implementing Major Scientific and Technological Special Projects to Enhance Scientific and Technological Innovation

11.4.5.2 Establishing High-Tech Industry Development Area and Cultivating High-Tech Industry Belt along the River

11.4.5.3 Developing Product Groups of High Technology

11.4.5.4 Developing a System of Risk Financing and Cultivating Small and Medium High-Tech Enterprises
11.4.6 Adjusting Strategy of Introducing Foreign Capital, Enlarging Dynamics of Bringing in Foreign Capital and Speeding Up the Industrial Upgrading through the Introduction of Foreign Capital 282

11.4.7 Completing the Mechanism and Policy of the Leading Industry Development, Establishing Ways of Realizing the Leading Industry 284

Chapter 12 Study on Ways of Industrial Structure Advancement during the 11th Five-Year Plan in China 287

12.1 Main Problems Existing in Optimization of the Industrial Structure 287
12.1.1 Unreasonable Industrial Structure 287
12.1.2 Uncoordinated Development of Industry and Lack of Competitive Ability 290
12.1.3 General Low Efficiency of Industry Structure 291

12.2 Spatial Layout and Situation of Chinese Industrial Structure 293
12.2.1 Classification of Industrial Economic Period in All Provinces 294
12.2.2 Degrees of Order for Industrial Structures of Provinces 294
12.2.3 Classification of Provinces according to the Process of Industrial Structure Advancement 294

12.3 Our Target of Industrial Structure Adjustment 298

12.4 Measurement of the Degree of Order for Chinese Industrial Structure 302
12.4.1 Analysis of the Degree of Order of the Chinese and World Standard Industrial Structure 302
12.4.2 Degree of Order Analysis of Our Industrial Structure and the Goal of the 11th Five-Year Plan 304
12.4.3 Degree of Order Analysis of Actual Structure and Optimal Structure 306
12.4.4 Comparison of the Degree of Order of Industrial Structure in Different Provinces 306

12.5 Choice of Methods to Upgrade Industrial Structure in China 310
12.5.1 Positively Participating in the World Economy, "Bringing In" and "Going Out" Are Inevitable Choices to Speed Up Industrial Structure Advancement (Way I) 310
12.5.2 Breakthrough in the Region, Spreading, Equilibrium of the Whole Body and Rising Up, a Feasible Regional Choice to the Industry Structure Upgrading (Way II) 312
12.5.2.1 Main Idea of Breakthrough in the Region, Spreading, Equilibrium of the Whole Body, and Rising Up 312
12.5.2.2 Concentration and Spread of Yangtze River Delta Economic Circle for Industrial Structure Upgrading 312
12.5.2.3 Concentration and Spread of Pearl River Delta Economic Circle for Industrial Structure Upgrading 314
12.5.2.4 Concentration and Spread of the Capital Economic Circle Industrial Structure Upgrading 316
12.5.2.5 Progress of Realization of China's Industrial Structure Upgrading 317

12.5.3 Tracked by the Leading Industry, from Low Level to High Level: A Feasible Choice of Industrial Structure Upgrading (Way III) 318
12.5.3.1 Level Analysis of the Industrial Structure of Different Regions in Our Country 318
12.5.3.2 Selection and Development of Regional Leading Industries Upgrading 320

12.5.4 From Cities to Rural Areas, the City Leads the Rural Areas: An Inevitable Choice of Advancement Solution Based on the Industrial Structure in Solving the Problem of Rural Areas (Way IV) 323
12.5.4.1 Vigorous Promotion of Industrialized Operation of Agriculture, Raising Agricultural Disaster Mitigation, Disaster Resilience, and Consolidation of the Status of Agriculture as Foundation 324
12.5.4.2 Speeding Up the Process of Urbanization in Rural Areas as Objective Needs of Industrial Structure Upgrading 325
