Quality Uncertainty and Perception

Information Asymmetry and Management of Quality Uncertainty and Quality Perception
Introduction ................................................................................................. 1
1. Recent Metrics for Business Performance ........................................... 2
   1.1 Quality Pursued in Various Disciplines ............................................ 3
      1.2 Total Quality Management ............................................................ 5
      1.2.1 Total Quality Management ............................................................ 5
      1.2.2 Economics ............................................................ 6
      1.2.3 Marketing ............................................................................. 8
1.3 Quality Commonality and Multidisciplinary Approach ......................... 9
1.4 Management of Quality Uncertainty and Perception ............................. 11

Quality Uncertainty Due to Information Asymmetry .................................. 13
2. Prelude to Quality Uncertainty ................................................................. 13
2.1 Information Asymmetry and Quality Uncertainty .................................. 14
2.2 Examples of Information Asymmetry-and Quality Uncertainty ............. 15
   2.3 Car Seller ............................................................................ 15
   2.3.1 Insurance Policy ...................................................................... 16
   2.3.2 Information Technology (IT) Firms and Investors ......................... 16
   2.3.3 Online Shopping .................................................................... 16
2.3 Implications of Asymmetric Information .............................................. 17
2.4 Causes of Quality Uncertainty due to Information Asymmetry .......... 20
   2.5 Socioeconomic and Cultural Conditions ......................................... 22
   2.6 Enablers or Marketing Strategies .................................................. 23

Perceived Quality Through Time .................................................................. 27
3. Emergence of Perceived Quality .............................................................. 27
3.1 Factors of Perceived Quality ................................................................. 28
3.2 SERVQUAL as a Metric of Perceived Quality .................................... 29
3.4 Marketing Science Approach to Product Quality Perception 30.
3.5 Expected Quality Approach from Information Economics 30
   3.5.1 Example: The Market for Used Cars 31
3.6 Critical Appraisal of Existing Approaches 31
3.7 Need of a Robust Approach 33

Quality Uncertainty and Quality Perception 35
4.1 Theoretical Background of Probability and Reliability Engineering 35
4.2 System Reliability 37
   4.2.1 System Reliability with Components in a System 37
   4.2.2 Items in Series 38
   4.2.3 Items in Parallel 38
4.3 Success Tree and Failure Tree Method 39
4.4 Paradigm for Mathematical Modeling 40
4.5 Behavior of Asymmetry and QU 44
4.6 Fault Tree or Success Tree Analysis 45
4.7 Market with Multiple Players 47
4.8 Computation of Quality Uncertainty and Perception 48
   4.8.1 Computation procedure for QU and QP 49
   4.8.2 Computation procedure for QP at Market End 49
4.9 Product Life Cycle and Information Asymmetry 50
4.10 Managerial Implications and Strategies 52
Appendix A 53

Root Cause and Failure Analysis of Quality Uncertainty 57
5.1 Theoretical Background of Seven Management Tools 57
   5.1.1 Affinity Diagram 57
   5.1.2 Interrelationship Diagram (ID) 58
   5.1.3 Tree Diagram 58
   5.1.4 Prioritization Matrix 58
   5.1.5 Matrix Diagram 58
   5.1.6 Process Decision Program Chart 59
   5.1.7 Activity Network Diagram 59
5.2 Cause-and-Effect Methodology 59
   5.2.1 Qualitative Framework 59
   5.2.2 Quantitative Framework 60
5.3 An Illustrative Case of Ball Bearing 60
5.4 Root-Cause Analysis of Quality Uncertainty 63
   5.4.1 Affinity Diagram for Quality Uncertainty 63
   5.4.2 Interrelationship Diagram for Quality Uncertainty 65
5.5 Innovative Method of Failure Analysis 68
   5.5.1 Quality Uncertainty as a Probability 68
   5.5.2 Failure Analysis of Quality Uncertainty 68
## 6 Dynamics of Quality Perception

### 6.1 System Dynamics Methodology
- 6.1.1 Procedural Steps in System Dynamics Modeling

### 6.2 Causal Loop Mapping of Quality Perception
- 6.2.1 What is a Causal Loop Diagram?
- 6.2.2 Causal Loop Diagram of Quality Uncertainty or Perception

### 6.3 Preliminary Model, Variables, Data, and Analysis
- 6.3.1 Information Symmetry
- 6.3.2 Total Quality Management Index
- 6.3.3 Perception Due to Enablers
- 6.3.4 Quality Perception
- 6.3.5 Required Extra Effort
- 6.3.6 Purpose and Data Collection
- 6.3.7 Analysis from Simulation Runs
- 6.3.8 Findings from the Simulation Runs

### 6.4 Toward Market Dynamics
- 6.4.1 Information Sector
- 6.4.2 Company Reputation

### 6.5 Quality Perception and Market Dynamics
- 6.5.1 Dynamic Hypothesis and Boundary Selection
- 6.5.2 Modeling Framework
- 6.5.3 Focus of the Experimentation
- 6.5.4 Experimentation Plan for Simulation Runs
- 6.5.5 Market Sector
- 6.5.6 Information Proliferation Sector
- 6.5.7 Industry Sector
- 6.5.8 Socioeconomic (Poverty) Sector

### 6.6 Observations from Simulation Runs
- 6.6.1 Process of Quality Perception
- 6.6.2 Quality Perception in Developed Nations
- 6.6.3 Quality Perception in Developing Nations

### 6.7 Evolving Hierarchy of Policies for Quality Management
- 6.7.1 Correlation Performances
- 6.7.2 Analytic Hierarchy Approach
6.7.3 Important Hierarchy of Policies ........................................... III
6.8 Managerial Implications ......................................................... 112
  6.8.1 Developed Nations .......................................................... 112
  6.8.2 Developing Nations ......................................................... 112
Appendix C ................................................................................. 114

7 Future **Directions of Quality Perception** ....................................... 119
  7.1 Illustration of Quality Uncertainty .......................................... 120
  7.2 System Thinking of Quality Uncertainty .................................... 121
  7.3 Cause and Effect Analysis of Quality Uncertainty ...................... 121
  7.4 Probabilistic Modeling of Quality Uncertainty .......................... 121
  7.5 Remodeling of Expected Quality or Perceived Quality .............. 121
  7.6 Behavioral Study of Quality Perception Through Simulations ....... 122
  7.7 Theory Building of Quality Uncertainty and Perception ............. 122
  7.8 Refining the Dimensions of Quality Perception ........................ 123
  7.9 Parameters' Optimization for Quality Perception ...................... 123
  7.10 Modeling of Product Information Proliferation Rate ............... 124
  7.11. Study of Information Asymmetry in Supply Chain Processes ....... 124
  7.12 TQM Constructs and Quality Perception ................................... 125
  7.13 Product Life Cycle and Quality Perception .............................. 125
  7.14 Industry Specific Modeling of Quality Perception .................... 125
  7.15 Development of a Robust Measure of Quality Perception .......... 126
  7.16 Studying the Impact of Perceived Quality on Stock Market ........ 126
