PART 1 INTRODUCTION TO MICROECONOMICS

CHAPTER 1 Analyzing Economic Problems 1
Microeconomics and Climate Change 4
1.1 Why Study Microeconomics? 4
1.2 Three Key Analytical Tools 5
Constrained Optimization 6
Equilibrium Analysis 12
Comparative Statics 13
1.3 Positive and Normative Analysis 18

LEARNING-BY-DOING EXERCISES
1.1 Constrained Optimization: The Farmer's Fence 7
1.2 Constrained Optimization: Consumer Choice 8
1.3 Comparative Statics with Market Equilibrium in the U.S. Market for Corn 16
1.4 Comparative Statics with Constrained Optimization 18

CHAPTER 2 Demand and Supply Analysis 26
What Gives with the Price of Corn? 29
2.1 Demand, Supply, and Market Equilibrium 30
Demand Curves 30
Supply Curves 32
Market Equilibrium 33
Shifts in Supply and Demand 35
2.2 Price Elasticity of Demand 43
Elasticities along Specific Demand Curves 45
Price Elasticity of Demand and Total Revenue 47
Determinants of the Price Elasticity of Demand 48

PART 2 CONSUMER THEORY

CHAPTER 3 Consumer Preferences and the Concept of Utility 73
Why Do You Like What You Like? 75
3.1 Representations of Preferences 75
Assumptions about Consumer Preferences 75
Ordinal and Cardinal Ranking 76
3.2 Utility Functions 77
Preferences with a Single Good: The Concept of Marginal Utility 77
Preferences with Multiple Goods: Marginal Utility, Indifference Curves, and the Marginal Rate of Substitution 81

Market-Level versus Brand-Level Price Elasticities of Demand 49
2.3 Other Elasticities 51
Income Elasticity of Demand 51
Cross-Price Elasticity of Demand 52
Price Elasticity of Supply 54
2.4 Elasticity in the Long Run versus the Short Run 54
Greater Elasticity in the Long Run Than in the Short Run 56
Greater Elasticity in the Short Run Than in the Long Run 56
2.5 Back-of-the-Envelope Calculations 57
Fitting Linear Demand Curves Using Quantity, Price, and Elasticity Information 58
Identifying Supply and Demand Curves on the Back of an Envelope 59
Identifying the Price Elasticity of Demand from Shifts in Supply 61

APPENDIX Price Elasticity of Demand along a Constant Elasticity Demand Curve 72

LEARNING-BY-DOING EXERCISES
2.1 Sketching a Demand Curve 31
2.2 Sketching a Supply Curve 33
2.3 Calculating Equilibrium Price and Quantity 34
2.4 Comparative Statics on the Market Equilibrium 37
2.5 Price Elasticity of Demand 45
2.6 Elasticities along Special Demand Curves 47

CHAPTER 3 Consumer Preferences and the Concept of Utility 73

3.3 Special Preferences 92
Perfect Substitutes 92
Perfect Complements 93
The Cobb–Douglas Utility Function 94
Quasilinear Utility Functions 95

LEARNING-BY-DOING EXERCISES
3.1 Marginal Utility 82
3.2 Marginal Utility That Is Not Diminishing 83
3.3 Indifference Curves with Diminishing \( MRS_{xy} \) 90
3.4 Indifference Curves with Increasing \( MRS_{xy} \) 91
| CONTENTS |
|-------------------|-------------------|-------------------|-------------------|
| **CHAPTER 4 Consumer Choice** 103 | **CHAPTER 5 The Theory of Demand** 150 |
| How Much of What You Like Should You Buy? | Why Understanding the Demand for Cigarettes Is Important for Public Policy |
| 4.1 The Budget Constraint 105 | 5.1 Optimal Choice and Demand 152 |
| How Does a Change in Income Affect the Budget Line? 107 | The Effects of a Change in Price or Income: An Algebraic Approach 160 |
| How Does a Change in Price Affect the Budget Line? 107 | 5.2 Change in the Price of a Good: Substitution Effect and Income Effect 162 |
| **APPENDIX 1 The Mathematics of Consumer Choice** 143 | The Substitution Effect 163 |
| **APPENDIX 2 The Time Value of Money** 144 | The Income Effect 163 |
| **LEARNING-BY-DOING EXERCISES** 4.1 Good News/Bad News and the Budget Line 110 | Income and Substitution Effects When Goods Are Not Normal 165 |
| 4.2 Finding an Interior Optimum 115 | 5.3 Change in the Price of a Good: The Concept of Consumer Surplus 173 |
| 4.3 Finding a Corner Point Solution 119 | Understanding Consumer Surplus from the Demand Curve 173 |
| 4.4 Finding a Corner Point Solution with Perfect Substitutes 120 | Understanding Consumer Surplus from the Optimal Choice Diagram: Compensating Variation and Equivalent Variation 175 |
| 4.5 Consumer Choice That Fails to Maximize Utility 134 | 5.4 Market Demand 182 |
| 4.6 Other Uses of Revealed Preference 136 | Network Externalities 184 |
| **PART 3 PRODUCTION AND COST THEORY** 200 | Market Demand with Network Externalities 184 |
| **CHAPTER 6 Inputs and Production Functions** 202 | 5.5 The Choice of Labor and Leisure 187 |
| Can They Do It Better and Cheaper? | As Wages Rise, Leisure First Decreases, Then Increases 187 |
| 6.1 Introduction to Inputs and Production Functions 202 | The Backward-Bending Supply of Labor 189 |
| 6.2 Production Functions with a Single Input 204 | **5.6 Consumer Price Indices** 192 |
| **LEARNING-BY-DOING EXERCISES** 5.1 A Normal Good Has a Positive Income Elasticity of Demand 159 |
| 5.2 Finding a Demand Curve (No Corner Points) 160 | 5.3 Finding a Demand Curve (with a Corner Point Solution) 161 |
| 5.4 Finding Income and Substitution Effects Algebraically 168 | 5.4 Market Demand 182 |
| 5.5 Income and Substitution Effects with a Price Increase 170 | Network Externalities 184 |
| 5.6 Income and Substitution Effects with a Quasilinear Utility Function 171 | Market Demand with Network Externalities 184 |
| 5.7 Consumer Surplus: Looking at the Demand Curve 174 | 5.5 The Choice of Labor and Leisure 187 |
| 5.8 Compensating and Equivalent Variations with No Income Effect 178 | As Wages Rise, Leisure First Decreases, Then Increases 187 |
| 5.9 Compensating and Equivalent Variations with an Income Effect 180 | The Backward-Bending Supply of Labor 189 |
| 5.10 The Demand for Leisure and the Supply of Labor 191 | **APPENDIX 1 The Mathematics of Consumer Choice** 143 |
| **APPENDIX 2 The Time Value of Money** 144 | **APPENDIX 2 The Time Value of Money** 144 |
| **APPENDIX 2 The Time Value of Money** 144 | **APPENDIX 2 The Time Value of Money** 144 |
Comparative Statics: Short-Run Input Demand versus Long-Run Input Demand 273
More Than One Variable Input in the Short Run 274
APPENDIX Advanced Topics in Cost Minimization 281

LEARNING-BY-DOING EXERCISES
7.1 Using the Cost Concepts for a College Campus Business 252
7.2 Finding an Interior Cost-Minimization Optimum 258
7.3 Finding a Corner Point Solution with Perfect Substitutes 259
7.4 Deriving the Input Demand Curves from a Production Function 267
7.5 Short-Run Cost Minimization with One Fixed Input 274
7.6 Short-Run Cost Minimization with Two Variable Inputs 275

CHAPTER 8 Cost Curves 285
How Can HiSense Get a Handle on Costs?
8.1 Long-Run Cost Curves 287
Long-Run Total Cost Curve 287
How Does the Long-Run Total Cost Curve Shift When Input Prices Change? 289
Long-Run Average and Marginal Cost Curves 292
8.2 Short-Run Cost Curves 302
Short-Run Total Cost Curve 302
Relationship Between the Long-Run and the Short-Run Total Cost Curves 303
Short-Run Average and Marginal Cost Curves 305
Relationships Between the Long-Run and the Short-Run Average and Marginal Cost Curves 306
When Are Long-Run and Short-Run Average and Marginal Costs Equal, and When Are They Not? 307
8.3 Special Topics in Cost 310
Economies of Scope 310
Economies of Experience: The Experience Curve 313
8.4 Estimating Cost Functions 315
Constant Elasticity Cost Function 316
Translog Cost Function 316
APPENDIX Shephard's Lemma and Duality 323

LEARNING-BY-DOING EXERCISES
8.1 Finding the Long-Run Total Cost Curve from a Production Function 288
8.2 Deriving Long-Run Average and Marginal Cost Curves from a Long-Run Total Cost Curve 294
8.3 Deriving a Short-Run Total Cost Curve 303
8.4 The Relationship between Short-Run and Long-Run Average Cost Curves 308
PART 4 PERFECT COMPETITION

CHAPTER 9 Perfectly Competitive Markets 327

9.1 What Is Perfect Competition? 330
9.2 Profit Maximization by a Price-Taking Firm 332
Economic Profit versus Accounting Profit 333
The Profit-Maximizing Output Choice for a Price-Taking Firm 334

9.3 How the Market Price Is Determined:
   Short-Run Equilibrium 337
The Price-Taking Firm's Short-Run Cost Structure 337
Short-Run Supply Curve for a Price-Taking Firm When All Fixed Costs Are Sunk 339
Short-Run Supply Curve for a Price-Taking Firm When Some Fixed Costs Are Sunk and Some Are Nonsunk 341
Short-Run Market Supply Curve 344
Short-Run Perfectly Competitive Equilibrium 348
Comparative Statics Analysis of the Short-Run Equilibrium 349

9.4 How the Market Price Is Determined:
   Long-Run Equilibrium 352
Long-Run Output and Plant-Size Adjustments by Established Firms 352
The Firm's Long-Run Supply Curve 353
Free Entry and Long-Run Perfectly Competitive Equilibrium 354
Long-Run Market Supply Curve 356
Constant-Cost, Increasing-Cost, and Decreasing-Cost Industries 358
What Does Perfect Competition Teach Us? 363

9.5 Economic Rent and Producer Surplus 367
Economic Rent 367
Producer Surplus 370
Economic Profit, Producer Surplus, Economic Rent 376
APPENDIX Profit Maximization Implies Cost Minimization 384

PART 5 MARKET POWER

CHAPTER 11 Monopoly and Monopsony 438

How Do Firms Play Monopoly? 440
11.1 Profit Maximization by a Monopolist 440
The Profit-Maximization Condition 440
A Closer Look at Marginal Revenue: Marginal Units and Inframarginal Units 444
Average Revenue and Marginal Revenue 445
The Profit-Maximization Condition Shown Graphically 447
A Monopolist Does Not Have a Supply Curve 449

LEARNING-BY-DOING EXERCISES
9.1 Deriving the Short-Run Supply Curve for a Price-Taking Firm 341
9.2 Deriving the Short-Run Supply Curve for a Price-Taking Firm with Some Nonsunk Fixed Costs 343
9.3 Short-Run Market Equilibrium 349
9.4 Calculating a Long-Run Equilibrium 356
9.5 Calculating Producer Surplus 375

CHAPTER 10 Competitive Markets: Applications 386

Is Support a Good Thing? 388
10.1 The Invisible Hand, Excise Taxes and Subsidies 388
The Invisible Hand 389
Excise Taxes 390
Incidence of a Tax 394
Subsidies 397
10.2 Price Ceilings and Floors 400
Price Ceilings 400
Price Floors 408
10.3 Production Quotas 413
10.4 Price Supports in the Agricultural Sector 417
Acreage Limitation Programs 418
Government Purchase Programs 418
10.5 Import Quotas and Tariffs 422
Quotas 422
Tariffs 425

LEARNING-BY-DOING EXERCISES
10.1 Impact of an Excise Tax 393
10.2 Impact of a Subsidy 400
10.3 Impact of a Price Ceiling 407
10.4 Impact of a Price Floor 412
10.5 Comparing the Impact of an Excise Tax, a Price Floor, and a Production Quota 417
10.6 Effects of an Import Tariff 428

11.2 The Importance of Price Elasticity of Demand 450
Price Elasticity of Demand and the Profit-Maximizing Price 450
Marginal Revenue and Price Elasticity of Demand 451
Marginal Cost and Price Elasticity of Demand: The Inverse Elasticity Pricing Rule 453
The Monopolist Always Produces on the Elastic Region of the Market Demand Curve 454
The IEPR Applies Not Only to Monopolists 456
Quantifying Market Power: The Lerner Index 457
11.3 Comparative Statics for Monopolists  458  
Shifts in Market Demand  458  
Shifts in Marginal Cost  461  
11.4 Monopoly with Multiple Plants and Markets  463  
Output Choice with Two Plants  463  
Output Choice with Two Markets  465  
Profit Maximization by a Cartel  466  
11.5 The Welfare Economics of Monopoly  469  
The Monopoly Equilibrium Differs from the Perfectly Competitive Equilibrium  469  
Monopoly Deadweight Loss  471  
Rent-Seeking Activities  471  
11.6 Why Do Monopoly Markets Exist?  471  
Natural Monopoly  472  
Barriers to Entry  473  
11.7 Monopsony  475  
The Monopsonist’s Profit-Maximization Condition  475  
An Inverse Elasticity Pricing Rule for Monopsony  477  
Monopsony Deadweight Loss  478  

LEARNING-BY-DOING EXERCISES  
11.1 Marginal and Average Revenue for a Linear Demand Curve  447  
11.2 Applying the Monopolist’s Profit-Maximization Condition  449  
11.3 Computing the Optimal Monopoly Price for a Constant Elasticity Demand Curve  453  
11.4 Computing the Optimal Monopoly Price for a Linear Demand Curve  454  
11.5 Computing the Optimal Price Using the Monopoly Midpoint Rule  460  
11.6 Determining the Optimal Output, Price, and Division of Production for a Multiplant Monopolist  465  
11.7 Determining the Optimal Output and Price for a Monopolist Serving Two Markets  466  
11.8 Applying the Monopsonist’s Profit-Maximization Condition  476  

11.9 Applying the Inverse Elasticity Rule for a Monopsonist  478  

CHAPTER 12 Capturing Surplus  485  
Why Did Your Ticket Cost So Much Less Than Mine?  
12.1 Capturing Surplus  487  
12.2 First-Degree Price Discrimination: Making the Most from Each Consumer  490  
12.3 Second-Degree Price Discrimination: Quantity Discounts  495  
Block Pricing  495  
Subscription and Usage Charges  498  
12.4 Third-Degree Price Discrimination: Different Prices for Different Market Segments  501  
Two Different Segments, Two Different Prices  501  
Screening  504  
Third-Degree Price Discrimination with Capacity Constraints  506  
Implementing the Scheme of Price Discrimination: Building “Fences”  508  
12.5 Tying (Tie-In Sales)  512  
Bundling  513  
Mixed Bundling  515  
12.6 Advertising  518  

LEARNING-BY-DOING EXERCISES  
12.1 Capturing Surplus: Uniform Pricing versus First-Degree Price Discrimination  492  
12.2 Where Is the Marginal Revenue Curve with First-Degree Price Discrimination?  493  
12.3 Increasing Profits with a Block Tariff  497  
12.4 Third-Degree Price Discrimination in Railroad Transport  503  
12.5 Third-Degree Price Discrimination for Airline Tickets  505  
12.6 Price Discrimination Subject to Capacity Constraints  507  
12.7 Markup and Advertising-to-Sales Ratio  520  

PART 6 IMPERFECT COMPETITION AND STRATEGIC BEHAVIOR  
CHAPTER 13 Market Structure and Competition  528  
Is Competition Always the Same? If Not, Why Not?  
13.1 Describing and Measuring Market Structure  530  
13.2 Oligopoly with Homogeneous Products  533  
The Cournot Model of Oligopoly  533  
The Bertrand Model of Oligopoly  541  
Why Are the Cournot and Bertrand Equilibria Different?  543  
The Stackelberg Model of Oligopoly  544  
13.3 Dominant Firm Markets  546  
13.4 Oligopoly with Horizontally Differentiated Products  549  
What Is Product Differentiation?  549  
Bertrand Price Competition with Horizontally Differentiated Products  553  
13.5 Monopolistic Competition  558  
Short-Run and Long-Run Equilibrium in Monopolistically Competitive Markets  558  
Price Elasticity of Demand, Margins, and Number of Firms in the Market  560  
Do Prices Fall When More Firms Enter?  560  

## TABLE OF CONTENTS

### APPENDIX The Cournot Equilibrium and the Inverse Elasticity Pricing Rule 570

### LEARNING-BY-DOING EXERCISES

13.1 Computing a Cournot Equilibrium 536
13.2 Computing the Cournot Equilibrium for Two or More Firms with Linear Demand 540
13.3 Computing the Equilibrium in the Dominant Firm Model 548
13.4 Computing a Bertrand Equilibrium with Horizontally Differentiated Products 556

### CHAPTER 14 Game Theory and Strategic Behavior 571

What's in a Game?
14.1 The Concept of Nash Equilibrium 573
A Simple Game 573

### PART 7 SPECIAL TOPICS

### CHAPTER 15 Risk and Information 604
What Are My Chances of Winning?
15.1 Describing Risky Outcomes 606
Lotteries and Probabilities 606
Expected Value 608
Variance 608
15.2 Evaluating Risky Outcomes 611
Utility Functions and Risk Preferences 611
Risk-Neutral and Risk-Loving Preferences 614
15.3 Bearing and Eliminating Risk 617
Risk Premium 617
Consider the Option to Eliminate Risk? The Present Value of Future Income 619
Asymmetric Information in Insurance Markets: Moral Hazard and Adverse Selection 622
15.4 Analyzing Risky Decisions 627
Decision Tree Basics 627
Decision Trees with a Sequence of Decisions 629
The Value of Information 631
15.5 Auctions 633
Types of Auctions and Bidding Environments 634
Auctions When Bidders Have Private Values 635
Auctions When Bidders Have Common Values: The Winner's Curse 639

### LEARNING-BY-DOING EXERCISES

15.1 Computing the Expected Utility for Two Lotteries for a Risk-Averse Decision Maker 614
15.2 Computing the Expected Utility for Two Lotteries: Risk-Neutral and Risk-Loving Decision Makers 616
15.3 Computing the Risk Premium from a Utility Function 620
15.4 The Willingness to Pay for Insurance 621
15.5 Verifying the Nash Equilibrium in a First-Price Sealed-Bid Auction with Private Values 636

### CHAPTER 16 General Equilibrium Theory 648
How Do Gasoline Taxes Affect the Economy?
16.1 General Equilibrium Analysis: Two Markets 650
16.2 General Equilibrium Analysis: Many Markets 654
The Origins of Supply and Demand in a Simple Economy 654
The General Equilibrium in Our Simple Economy 660
Walras' Law 664
16.3 General Equilibrium Analysis: Comparative Statics 665
16.4 The Efficiency of Competitive Markets 669
What Is Economic Efficiency? 669
Exchange Efficiency 670
Input Efficiency 676
Substitution Efficiency 678
Pulling the Analysis Together: The Fundamental Theorems of Welfare Economics 681
16.5 Gains from Free Trade 682
Free Trade Is Mutually Beneficial 682
Comparative Advantage 686

### APPENDIX Deriving the Demand and Supply Curves for General Equilibrium in Figure 16.9 and Learning-by-Doing Exercise 16.2 692

### LEARNING-BY-DOING EXERCISES

16.1 Finding the Prices at a General Equilibrium with Two Markets 654
CONTENTS

16.2 Finding the Conditions for a General Equilibrium with Four Markets 663
16.3 Checking the Conditions for Exchange Efficiency 674

CHAPTER 17 Externalities and Public Goods 697
When Does the Invisible Hand Fail?
17.1 Introduction 699
17.2 Externalities 700
Negative Externalities and Economic Efficiency 702
Positive Externalities and Economic Efficiency 711
Property Rights and the Coase Theorem 716
17.3 Public Goods 719

Efficient Provision of a Public Good 720
The Free Rider Problem 722

LEARNING-BY-DOING EXERCISES
17.1 The Efficient Amount of Pollution 704
17.2 Emissions Fee 707
17.3 The Coase Theorem 717
17.4 Optimal Provision of a Public Good 721

Mathematical Appendix 729
Solutions to Selected Problems 749
Glossary 771
Photo Credits 781
Index 783
