<i>Table of Cases</i>	xxv
<i>Table of Legislation</i>	xxvii

## 1. ENVIRONMENTAL TAX REFORMS: EXPERIENCES AND POTENTIAL

<b>1. The Role of Fiscal Instruments in Environmental Policy</b>	<b>3</b>
<i>Katri Kosonen and Gaëtan Nicodème</i>	
I. Introduction	1.01
II. The Role of Fiscal Instruments in Energy and Environmental Policy	1.07
III. Complementing Taxes with Other Fiscal Instruments	1.16
IV. Reduced VAT Rates on the Supply of Energy-Efficient Goods and Services	1.22
V. Direct Fiscal Incentives to Promote Energy-Efficiency	1.33
VI. Direct Fiscal Incentives in Comparison with Reduced VAT Rates	1.39
VII. Conclusions	1.40
<b>2. Scale of Economic Activity and Environmental Taxation</b>	<b>21</b>
<i>Francesco La Camera and Aldo Ravazzi Douvan</i>	
I. Foreword: The Climate and Economic Challenges	2.01
II. The Use of Environmental Taxation	2.09
III. <i>Pigouvian</i> Taxes and the Economy–Ecology Relationship	2.15
IV. Climate Change and Growth, Scale and Limits	2.36

<b>3. Why Are Environmental Tax Revenues Falling in the European Union?</b>	<b>37</b>
<i>Katri Kosonen</i>	
I. Introduction	3.01
II. Types of Environmental Taxes in the EU	3.10
III. Trends in Environmental Tax Revenues	3.19
IV. Drivers of the Trends in Environmental Tax Revenues	3.28
V. The Role of Revenue-Raising Instruments in Environmental Policies	3.41
VI. Future Prospects	3.52
<b>4. Ecological Tax Reform for Austria: An Evaluation of Economic and Emission Effects</b>	<b>57</b>
<i>Daniela Kletzan-Slamanič, Angela Köppl, Kurt Kratena and Alexandra Wegescheider-Pichler</i>	
I. Motivation	4.01
II. Environmental Tax Revenue in Austria	4.16
III. An Approach for an Environmental Tax Reform in Austria	4.21
IV. Macroeconomic Effects of the Environmental Tax Reform Approach	4.37
V. Effects on Energy Demand and CO <sub>2</sub> Emissions	4.49
VI. Summary and Conclusions	4.54
<b>5. Environmental Tax Reform: Administrative and Compliance Costs of Energy Taxes in the Czech Republic</b>	<b>76</b>
<i>Jan Pavel and Leoš Vitek</i>	
I. Introduction	5.01
II. The Czech Tax System and its Organization	5.03
III. Transaction Costs of Taxation	5.05
IV. Administrative Costs	5.10
V. Compliance Costs	5.16
VI. Conclusion	5.35

<b>6. Exploring the Potential of Harmonizing Environmental Tax Reform Efforts in the European Union</b>	<b>89</b>
<i>S Bassi, M Pallemmaerts and P ten Brink</i>	
I. Introduction: The Role of Environmental Tax Reform to Support Sustainable Development in the EU	6.01
II. Methodology	6.06
III. Feasibility of ETR: Possible Future Scenarios for Environmental Taxes	6.10
IV. Areas of Applicability: The Role of ETR in the Context of EU Environmental Policy	6.16
V. The Experience with Environmental Taxes and Other Market-Based Instruments in EU Policy and Legislation: An Overview	6.29
VI. The Issue of Harmonization: Prospects for Enhanced Cooperation and the Open Method of Coordination (OMC)	6.38
VII. Concluding Remarks	6.54
<b>7. China and Other Asian Countries Are Getting Ready to Catch up with Europe on Environmental Fiscal Reforms</b>	<b>108</b>
<i>Kai Schlegelmilch</i>	
I. Introduction	7.01
II. Other Asian Countries	7.31
III. Conclusions	7.61
<b>8. Roadmap for Improving Environmentally Related Taxation in China</b>	<b>127</b>
<i>Ye Ruqiu and Wang Guijuan</i>	
I. Preface	8.01
II. A Roadmap for Building up an Environment-Related Taxation System in China	8.04
III. Design of Carbon Tax and Analysis of its Impacts	8.26

2. MARKET-BASED INSTRUMENTS FOR CLIMATE PROTECTION	
2.1. CROSS-SECTIONAL ANALYSIS	
9. A Critical Legal Review of Tax-Related Financial Mechanisms for Climate Protection in Developing Countries	147
<i>Amparo Grau</i>	
I. The Deficit for Climate Change Finance in Developing Countries	9.01
II. The Recent Approach in the European Union in Order to Integrate Environment and Development Cooperation	9.06
III. Proposals to Generate New and Additional Resources by Using Tax Measures	9.10
IV. The Work Carried Out by the International Civil Aviation Organization and the International Maritime Organization	9.20
V. Final Remark	9.42
10. Lost in Translation? The Political Economy of Market-Based Climate Policy in Japan	163
<i>Sven Rudolph and Seung-Joon Park</i>	
I. Introduction	10.01
II. A Comprehensive Approach	10.04
III. Input and Output	10.08
IV. External Constraints	10.17
V. Political Actors	10.27
VI. Conclusions	10.59
2.2. MARKETS FOR TRADING IN GREENHOUSE GAS EMISSIONS	
11. Shop 'Til You Drop: Developing Countries and the EU Dream of a Global Carbon Market	187
<i>Javier de Cendra de Larragán</i>	
I. Introduction	11.01

II. The Starting Point: Achievements and Limitations of the CDM	11.03
III. Proposals to Improve the CDM in the Post-2012 Regime	11.07
IV. The EU Vision of the Construction of a Global Carbon Market	11.25
V. A Critique of the EU Vision and Some Suggestions for the Way Forward	11.36
<b>12. The EU Emission Trading Scheme: Insights from the First Trading Years with a Focus on Price Volatility</b>	<b>205</b>
<i>Claudia Kettner, Angela Köppl and Stefan Schleicher</i>	
I. Introduction	12.01
II. Main Features of the EU ETS	12.06
III. Method of Data Analysis	12.21
IV. Stringency of the Allocation Caps	12.25
V. Distribution of Installations and Allocations	12.39
VI. The Evolution of the Price Volatility Issue	12.44
VII. Conclusions	12.56
<b>13. Investment in a Market-Based Cap-and-Trade Program as a New US Clean Climate Policy</b>	<b>226</b>
<i>Rahmat O Tavallali</i>	
I. Introduction	13.01
II. Global Warming and Greenhouse Gases	13.06
III. The United States and Emission of Greenhouse Gases	13.11
IV. The Kyoto Protocol—A Lesson Learned	13.13
V. American Clean Energy and Security Act of 2009	13.17
VI. Economic Impact of the Cap-and-Trade Program	13.19
VII. Conclusion	13.24

<b>14. Managing Transport Emissions through Tradable Permits and Regulatory Emission Standards: A Comparative Analysis Evaluating Australia's Carbon Pollution Reduction Scheme</b>	<b>236</b>
<i>Anna Mortimore</i>	
I. Introduction	14.01
II. Challenge of Reducing Transport Emissions	14.06
III. Carbon Pollution Reduction Targets	14.16
IV. Australia's Carbon Pollution Reduction Scheme	14.19
V. Carbon Pollution Reduction Scheme and the Road Transport Sector	14.23
VI. Australia Applies Carbon Pollution Reduction Scheme to Fuel Producers	14.30
VII. Impact on Existing Fiscal Instruments	14.32
VIII. Australia's Solution to Reducing Road Transport Emissions?	14.36
IX. Will the Scheme Deliver Significant Reduction in Road Emissions?	14.40
X. European Union ETS Excludes Road Transport	14.53
XI. EU Regulates Performance Standards	14.56
XII. Conclusion	14.66
<b>2.3. SOME ISSUES IN CARBON TAXATION</b>	
<b>15. Carbon Taxation in Theory and Practice</b>	<b>261</b>
<i>David G Duff and Shi-Ling Hsu</i>	
I. Introduction	15.01
II. The Case for Carbon Taxation	15.03
III. Carbon Taxes in Practice	15.26
IV. Conclusion	15.42
<b>16. Carbon Tax and Equity: The Importance of Policy Design</b>	<b>277</b>
<i>E Combet, F Ghersi, J-C Hourcade and D Théry</i>	
I. Introduction	16.01
II. Perceived vs Real Impacts: Reasons for the Gap	16.04

III. Lessons from Partial Equilibrium Analysis	16.11
IV. Ultimate Distributive Impacts: General Equilibrium Analyses	16.20
V. Conclusion	16.37
<b>17. The Distributive Effects of Carbon Taxation in Italy</b>	<b>296</b>
<i>Chiara Martini</i>	
I. Introduction	17.01
II. Emission-Reduction Policies in Italy	17.07
III. The Empirical Models	17.13
IV. Results	17.40
V. Welfare Analysis	17.59
VI. Conclusions	17.81
<b>18. Implementation and Impacts of a Carbon Tax in France</b>	<b>319</b>
<i>F Caccia and S Lefranc</i>	
I. Introduction	18.01
II. How to Provide Equity without Undermining Efficiency	18.50
III. Possible Compensation Schemes	18.53
IV. Conclusion	18.68
<b>19. Carbon Pricing in Canada: Options and Specifics</b>	<b>337</b>
<i>Tracy Snoddon and Randall Wigle</i>	
I. Introduction	19.01
II. Carbon Pricing Options	19.04
III. The Policy Environments	19.08
IV. Challenges to Carbon Pricing in Canada	19.18
V. Moving to a More Cost-Effective Policy Environment in Canada	19.54
VI. Summary	19.60

<b>20. The Role of Technological and Lifestyle Changes Versus Carbon Taxes in Determining the Energy Demand of Households</b>	<b>354</b>
<i>Kurt Kratena, Ina Meyer and Michael Wüger</i>	
I. Introduction	20.01
II. Methodology and Model Description	20.05
III. Data	20.20
IV. Empirical Results	20.27
V. Scenario Simulation: Compensating for Rebound Effects through Energy Taxes	20.34
VI. Conclusion	20.41
 <b>21. Greenhouse Gas-Weighted Consumption Taxes on Food as a Climate Policy Instrument</b>	 <b>376</b>
<i>Fredrik Hedenus, Kristina Mohlin and Stefan Wirsenius</i>	
I. Introduction	21.01
II. Differentiated Consumption Taxes on Food as a Climate Policy Instrument	21.06
III. Methods and Data	21.13
IV. Results	21.31
V. Discussion	21.39
VI. Conclusions	21.42
<b>2.4. VAT AS AN INSTRUMENT OF ENVIRONMENTAL POLICY</b>	
 <b>22. Value Added Tax as an Environmental Policy Instrument?</b>	 <b>395</b>
<i>Frans H Oosterhuis and Marije Schaafsma</i>	
I. Introduction	22.01
II. Greening VAT in the EU: Experiences and Proposals	22.04
III. The Rationale behind VAT Differentiation	22.08
IV. Introducing Reduced VAT Rates for Eco-Friendly Products	22.12
V. Abolishing Reduced VAT Rates for Environmentally Harmful Products	22.29

VI. Conclusion: The Prospects for VAT as an Environmental Policy Tool	22.37
<b>23. China's Export Tax and Export VAT Refund Rebate on Energy-Intensive Goods and Their Consequences for Climate Change</b>	408
<i>Xin Wang and Tancredè Voituriez</i>	
I. Introduction	23.01
II. China's Export Restrictions	23.07
III. China's Export Taxes and VAT Refunding in EU ETS Leakage-Prone Sectors	23.15
IV. Assessing the Cost of Export Restricting Measures with EU ETS Quota Price Equivalent	23.31
V. Discussion of Results	23.39
VI. Conclusion	23.47
2.5. SUBSIDIES AND THE ENVIRONMENT: SOME ISSUES	
<b>24. A Dark Recession, Red Ink and the Green Economy: Climate Change Tax Incentives in the US Economic Stimulus Program</b>	431
<i>Janet E Milne</i>	
I. Amount and Allocation of This Public Investment	24.02
II. The Keys to Enactment	24.04
III. Distinctive Green Economy Features of the Stimulus Legislation	24.08
IV. An Effective Green Economy Stimulus? Questions Remain	24.27
V. Conclusion	24.34
<b>25. State Aid and the EU Council Directive 2003/96/EC: The Case for Augmenting the Environmental Component</b>	448
<i>Álvaro Antón Antón and Iñaki Bilbao Estrada</i>	
I. Introduction	25.01
II. The Emission Rights Trading Scheme	25.08

III. The Tax Treatment of Energy Products and Electricity	25.10
IV. Joint Application of the Two Market-Based Instruments	25.19
V. The Necessary Modification of EU ETS and ETD	25.26
VI. Conclusion: Coordination through Exemptions and its Compatibility with Art 87 of EC Treaty	25.43
<b>26. WTO Law on Subsidies: A Hindrance to the International Competitiveness of Renewable Energy? A Case Study of Investment Incentives for Renewable Energy</b>	<b>463</b>
<i>Carol Ní Ghiollarnáth</i>	
I. Introduction	26.01
II. Investment Incentive Conclusion	26.50
III. Conclusion	26.53
<b>3. MARKET-BASED INSTRUMENTS FOR THE SUSTAINABLE MANAGEMENT OF ENERGY</b>	
<b>27. Market-Based Instruments for Energy Sustainability: A National Overview</b>	<b>483</b>
<i>Giorgio Panella, Andrea Zatti and Fiorenza Carraro</i>	
I. Introduction	27.01
II. Italy in the Framework of the EU Regulation	27.03
III. Energy Taxation	27.06
IV. MBIs and the Support to Renewable Energy	27.10
V. Energy-Efficiency Policies	27.42
VI. Conclusions	27.55
<b>28. The Spanish Energy Tax System with Special Reference to the Electricity Tax System</b>	<b>504</b>
<i>Isabel Bassas Pérez</i>	
I. Introduction	28.01
II. The Electricity Sector	28.18
III. The Spanish Electricity Tax System	28.23
IV. Conclusion	28.65

<b>29. Tax-Incentive Options to Promote Environmentally Friendly Products: The Case of Energy-Efficient Domestic Appliances</b>	<b>521</b>
<i>S Mudgal, B Tinetti, A Markandya and R Ortiz</i>	
I. Introduction	29.01
II. EU Policy Context	29.07
III. Past Experiences of Tax Incentives for Energy-Using Products	29.15
IV. Assessment of Tax-Incentive Options at EU Level	29.26
V. Conclusions and Discussion	29.33
 <b>30. External Costs from Energy Generation and Their Internalization in New Member States</b>	 <b>536</b>
<i>Vojtěch Máca, J Melichar and M Ščasný</i>	
I. Introduction	30.01
II. Optimal Environmental Taxation Theory	30.07
III. External Costs	30.13
IV. Summary of External Costs Assessment	30.22
V. Concluding Remarks	30.52
 <b>31. Recent US Tax Laws Greatly Expand Use of Tax Code to Encourage Resource Conservation</b>	 <b>554</b>
<i>Bruce W McClain, Paul J Lee, John T Geekie and Philip Thornton</i>	
I. Introduction	31.01
II. Heartland, Habit, Harvest and Horticulture Act of 2008	31.04
III. The Emergency Economic Stabilization, Energy Improvement and Extension, and Tax Extenders and AMT Relief Acts of 2008 and Other Recent Tax Acts	31.10
IV. American Recovery and Reinvestment Act of 2009	31.30
V. Conclusion	31.41

<b>4. MARKET-BASED INSTRUMENTS FOR THE SUSTAINABLE MANAGEMENT OF WATER</b>	
<b>32. Water Pricing: Economic and Social Issues</b>	573
<i>G Panella and A Zatti</i>	
I. Introduction	32.01
II. Water Allocation: Water Abstraction Charges	32.06
III. Water Pricing in the Irrigation Sector	32.17
IV. Household Water Charging: The Regulatory Reform of the Water Services	32.25
V. Affordability Goals: Household's Expenditure in Water Services	32.35
VI. Public and Private Management and Affordability Issues	32.46
VII. Conclusions	32.53
<b>33. Water Charges for the Protection of Water Resources in Brazil: The Case of Piabanha River Basin (Petrópolis, Rio de Janeiro)</b>	592
<i>José Marcos Domingues and Paulo Sergio O de Souza Leite</i>	
I. Brazilian Legal Regime of Water Resources	33.01
II. The Water Grant	33.10
III. Water Charges	33.19
IV. Legal Nature of Water Charges	33.25
V. The 'SNUC' Environmental Compensation	33.43
VI. Case Study—Water-Resource Management in the Paraíba do Sul River Basin	33.54
VII. Conclusions	33.74
<b>34. Water Taxes in Europe: An Analysis of the Situation in Spain</b>	614
<i>Francisco Adame Martinez</i>	
I. Introduction	34.01
II. Water Taxes in the European Union	34.03
III. Water Taxes in Spain	34.09
IV. Final Comments	34.28

<b>35. Reforming Environmentally Harmful Subsidies in the Water Sector: Irrigation Subsidies in Spain</b>	624
<i>Samuela Bassi, Claudia Dias Soares and Carolina Valsecchi</i>	
I. Introduction	35.01
II. Water Scarcity and the Issue of Environmentally Harmful Irrigation Subsidies in Spain	35.05
III. Irrigation Subsidies in Spain: Economic, Social and Environmental Issues	35.20
IV. Alternative Policies and Potential for Reform	35.58
V. Conclusions	35.70
<b>36. Regulating Phosphorus from the Agricultural Sector: Development of a Model Including Stocks and Flows</b>	645
<i>Line Block Hansen, Lars Gårn Hansen and Gitte Holton Rubæk</i>	
I. Introduction	36.01
II. P Cycling and P Loss Processes from Agricultural Land	36.05
III. Experiences with Regulation	36.13
IV. The Phosphorus Stock and Flow Model	36.15
V. The Simple Model	36.25
VI. Discussion	36.37
VII. Conclusion	36.41
5. MARKET-BASED INSTRUMENTS FOR THE SUSTAINABLE MANAGEMENT OF URBAN AREAS	
<b>37. Water Consumption as a Sign of Solid Waste Production: A Proposal to Assess the Charge on Domestic Waste Management in Urban Areas</b>	663
<i>B García Carretero, P Chico de la Cámara and PM Herrera Molina</i>	
I. Introduction	37.01
II. Taxes and Charges as Instruments to Discourage Waste Production and to Finance Waste Management	37.04

III. Choices for Quantifying Taxes and Charges on Local Waste Production	37.19
IV. Conclusions and Proposals	37.30
<b>38. The Environmental Impact of Property Taxes on Urban Blight in the United States</b>	<b>674</b>
<i>Hans Sprohge, Larry Kreiser, Bill Butcher and Julsuchada Sirisom</i>	
I. Introduction	38.01
II. Environmental Impact of Property Taxes	38.05
III. New for Old: Obstacles to Urban Renewal	38.09
IV. Maintenance of Buildings versus Deterioration	38.10
V. Property Taxes as an Investment Expense	38.12
VI. Property Taxes as a Business Expense	38.14
VII. Property Taxes and Urban Sprawl	38.17
VIII. Environmental Impact of Urban Blight	38.20
IX. Current Approaches to Property Tax Relief	38.26
X. Two Radical Approaches to Property Tax Relief	38.32
XI. Conclusion	38.46
<b>39. Addressing Environmental Problems through Motor Vehicle Taxes: Experiences of the Republic of Serbia</b>	<b>687</b>
<i>Miloš Milošević and Monika Milošević</i>	
I. Introduction	39.01
II. A Review of Taxes and Charges on Vehicles in the Republic of Serbia	39.05
III. Other Ecologically Significant Fiscal Measures in the Field of Transport	39.22
IV. European Trends in the Domain of Motor Vehicle Taxation	39.24
V. The Serbian System in Light of European Recommendations	39.28
VI. Conclusion	39.34

6. EVALUATION OF MARKET-BASED  
ENVIRONMENTAL POLICIES

<b>40. Transactions Costs, Risks and Policy Failure</b>	<b>705</b>
<i>PV Martin and J Shortle</i>	
I. Risks in Environmental Policy	40.01
II. Transactions Cost and Policy	40.11
III. Water-Quality Trading: USA	40.17
IV. Volumetric Trade	40.33
V. Synthesis	40.46
<b>41. An Experimental Study on Discretionary Environmental Enforcement</b>	<b>721</b>
<i>Anna Rita Germani, Andrea Morone and Piergiuseppe Morone</i>	
I. Introduction	41.01
II. The Experimental Model	41.04
III. Experimental Findings	41.15
IV. Some Concluding Remarks	41.23
<b>42. Optimal Specificity in Environmental Standard-Setting</b>	<b>730</b>
<i>Michael G Faure</i>	
I. Introduction	42.01
II. Basic Economics of Standard-Setting	42.07
III. Europe: Harmonization and IPPC	42.23
IV. Levelling the Playing Field? A Look at Legal History	42.34
V. Concluding Remarks	42.37
<i>Index</i>	<b>747</b>
