Preface xv

CHAPTER 1 The Big Ideas ......................................................... 1
Big Idea One: Incentives Matter 2
Big Idea Two: Good Institutions Align Self-Interest with the Social Interest 2
Big Idea Three: Trade-offs Are Everywhere 3
Opportunity Cost 4
Big Idea Four: Thinking on the Margin 5
Big Idea Five: Tampering with the Laws of Supply and Demand Has Consequences 6
Big Idea Six: The Importance of Wealth and Economic Growth 6
Big Idea Seven: Institutions Matter 7
Big Idea Eight: Economic Booms and Busts Cannot Be Avoided but Can Be Moderated 8
Big Idea Nine: Prices Rise When the Government Prints Too Much Money 8
Big Idea Ten: Central Banking Is a Hard Job 9
The Biggest Idea of All: Economics Is Fun 9
Chapter Review 10

Part 1: Supply and Demand

CHAPTER 2 Supply and Demand .................................................. 13
The Demand Curve for Oil 13
Consumer Surplus 16
What Shifts the Demand Curve? 17
Important Demand Shifters 17
Income 18
Population 18
Price of Substitutes 18
Price of Complements 18
Expectations 19
Tastes 19
The Supply Curve for Oil 20
Producer Surplus 23
What Shifts the Supply Curve? 23
Important Supply Shifters 23
Technological Innovations and Changes in the Price of Inputs 24
Taxes and Subsidies 24
Expectations 25
Entry or Exit of Producers 25
Changes in Opportunity Costs 26
Takeaway 27
Chapter Review 28
CHAPTER 3 Equilibrium: How Supply and Demand Determine Prices ........................................33
Equilibrium and the Adjustment Process 33
Who Competes with Whom? 35
Gains from Trade Are Maximized at the Equilibrium Price and Quantity 35
Does the Model Work? Evidence from the Laboratory 38
Shifting Demand and Supply Curves 40
Terminology: Demand Compared to Quantity Demanded and Supply Compared to Quantity Supplied 42
Understanding the Price of Oil 44
Takeaway 46
Chapter Review 47

CHAPTER 4 Price Ceilings and Price Floors .................................................................51
Price Ceilings 51
Shortages 52
Reductions in Quality 52
Wasteful Lines and Other Search Costs 53
Lost Gains from Trade 55
Misallocation of Resources 56
The End of Price Ceilings 58
Price Floors 59
Surpluses 59
Lost Gains from Trade 60
Wasteful Increases in Quality 62
Misallocation of Resources 63
Takeaway 64
Chapter Review 65

Part 2: Economic Growth

CHAPTER 5 GDP and The Measurement of Progress ..................................................69
What Is GDP? 70
GDP is the Market Value . . . 71
. . . of All Final . . . 71
. . . Goods and Services . . . 71
. . . Produced . . . 72
. . . within a Country . . . 72
. . . in a Year 72
Growth Rates 73
Nominal vs. Real GDP 73
Real GDP Growth 74
Real GDP Growth per Capita 74
Cyclical and Short-Run Changes in GDP 76
The Many Ways of Splitting GDP 77
The National Spending Approach: Y = C + I + G + NX 78
The Factor Income Approach: The Other Side of the Spending Coin 79
Why Split 80
### Problems with GDP as a Measure of Output and Welfare
- GDP Does not Count the Underground Economy
- GDP Does not Count Nonmarket Production
- GDP Does not Count Leisure
- GDP Does not Count Bads: Environmental Costs
- GDP Does not Measure the Distribution of Income

#### Takeaway

#### Chapter Review

### CHAPTER 6 The Wealth of Nations and Economic Growth

#### Key Facts about the Wealth of Nations and Economic Growth
- Fact One: GDP per Capita Today Varies Enormously among Nations
- Fact Two: Everyone Used to Be Poor
- Fact Three: There Are Growth Miracles and Growth Disasters

#### Summarizing the Facts: Good and Bad News

#### Understanding the Wealth of Nations
- The Factors of Production

#### Incentives and Institutions
- Institutions
  - Institutions of Economic Growth
  - Property Rights
  - Honest Government
  - Political Stability
  - A Dependable Legal System
  - Competitive and Open Markets

#### Institutions and Growth Miracles Revisited

#### Takeaway

#### Chapter Review

### Appendix: The Magic of Compound Growth: Using a Spreadsheet

### CHAPTER 7 Growth, Capital Accumulation, and the Economics of Ideas: Catching Up vs. The Cutting Edge

#### The Solow Model and Catch-Up Growth
- Capital, Production and Diminishing Returns
- Capital Growth Equals Investment Minus Depreciation
- Why Capital Alone Cannot Be the Key to Economic Growth
- Better Ideas Drive Long-Run Economic Growth

#### The Solow Model—Details and Further Lessons (Optional section)
- The Solow Model and an Increase in the Investment Rate
- The Solow Model and Conditional Convergence
- From Catching Up to Cutting Edge
- Solow and the Economics of Ideas in One Diagram

#### Growing on the Cutting Edge: The Economics of Ideas
- Research and Development Is Investment for Profit
- Spillovers, and Why There Aren't Enough Good Ideas
- Government's Role in the Production of New Ideas
- Market Size and Research and Development

#### The Future of Economic Growth

#### Takeaway

#### Chapter Review

### Appendix: Excellent Growth
CHAPTER 8 Saving, Investment, and the Financial System

The Supply of Savings
- Individuals Want to Smooth Consumption
- Individuals Are Impatient
- Marketing and Psychological Factors
- The Interest Rate

The Demand to Borrow
- Individuals Want to Smooth Consumption
- Borrowing Is Necessary to Finance Large Investments
- The Interest Rate

Equilibrium in the Market for Loanable Funds
- Shifts in Supply and Demand

The Role of Intermediaries: Banks, Bonds, and Stock Markets
- Banks
- The Bond Market
- Bond Prices and Interest Rates
- The Stock Market

What Happens When Intermediation Fails?
- Insecure Property Rights
- Controls on Interest Rates and Inflation
- Politicized Lending and Government-Owned Banks
- Bank Failures and Panics

Takeaway

Chapter Review

Appendix: Bond Pricing and Arbitrage

CHAPTER 9 Stock Markets and Personal Finance

Passive vs. Active Investing
- Why Is It Hard to Beat the Market?

How to Really Pick Stocks, Seriously
- Diversify
- Avoid High Fees
- Compound Returns Build Wealth
- The No Free Lunch Principle or No Return Without Risk

Other Benefits and Costs of Stock Markets
- Bubble, Bubble, Toil, and Trouble

Takeaway

Chapter Review

Part 3: Business Fluctuations

CHAPTER 10 Unemployment and Labor Force Participation

Defining Unemployment
- How Good an Indicator Is the Unemployment Rate?

Frictional Unemployment

Structural Unemployment
- Labor Regulations and Structural Unemployment
- Unemployment Benefits
- Minimum Wages and Unions
Understanding the Great Depression: Aggregate Demand Shocks and Real Shocks 259

Aggregate Demand Shocks and the Great Depression 259
Real Shocks and the Great Depression 260

Takeaway 262

Chapter Review 263

CHAPTER 13 The Real Business Cycle Model: Shocks and Transmission Mechanisms ........................................269

Shocks 269
Oil Shocks 270
Shocks, Shocks, Shocks 273

How Transmission Mechanisms Amplify and Spread Shocks 273
Intertemporal Substitution 274
Uncertainty and Irreversible Investments 276
Labor Adjustment Costs 277
Time Bunching 278
Sticky Wages and Prices 280
Transmission Mechanisms: Summary 281

Takeaway 282

Chapter Review 283

Appendix: Business Fluctuations and the Solow Model..............286

Part 4: Macroeconomic Policy and Institutions

CHAPTER 14 The Federal Reserve System and Open Market Operations ...............................................................289

What Is the Federal Reserve System? 289
The U.S. Money Supplies 290
Fractional Reserve Banking, the Reserve Ratio, and the Money Multiplier 293

How the Fed Controls the Money Supply 295
Open Market Operations 295
The Fed Controls a Real Rate Only in the Short Run 297
Discount Rate Lending and the Term Auction Facility 297
The Term Auction Facility 299
Required Reserves and Payment of Interest on Reserves 300

The Federal Reserve and Systemic Risk 300
Revisiting Aggregate Demand and Monetary Policy 301
Who Controls the Fed? 303

Takeaway 304

Chapter Review 305

Appendix: The Money Multiplier Process in Detail ....................309

CHAPTER 15 Monetary Policy .........................................................313

Monetary Policy: The Best Case 314
Rules vs. Discretion 316
Reversing Course and Engineering a Decrease in AD 317
The Fed as Manager of Market Confidence 318
The Negative Real Shock Dilemma 319
The Problem with Positive Shocks:
The 1997–2006 Housing Boom and Bust 322
Takeaway 324
Chapter Review 324

CHAPTER 16 The Federal Budget: Taxes and Spending 335
Tax Revenues 335
- The Individual Income Tax 336
  - Taxes on Capital Gains and Interest and Dividends 338
  - The Alternative Minimum Tax (AMT) 339
- Social Security and Medicare Taxes 339
- The Corporate Income Tax 340
- The Bottom Line on the Distribution of Federal Taxes 340
Spending 342
- Social Security 342
- Defense 344
- Medicare and Medicaid 345
- Unemployment Insurance and Welfare Spending 345
- Everything Else 345
- The National Debt, Interest on the National Debt, and Deficits 347

Will the U.S. Government Go Bankrupt? 349
- The Future Is Hard to Predict 350
Revenues and Spending Undercount the Role of Government in the Economy 352
Takeaway 352
Chapter Review 353

CHAPTER 17 Fiscal Policy 359
Fiscal Policy: The Best Case 360
- The Multiplier 361
The Limits to Fiscal Policy 362
- Crowding Out 363
  - A Special Case of Crowding Out: Ricardian Equivalence 365
- A Drop in the Bucket: Can Government Spend Enough to Stimulate Aggregate Demand? 367
- A Matter of Timing 367
  - Automatic Stabilizers 369
- Government Spending versus Tax Cuts as Expansionary Fiscal Policy 369
- Fiscal Policy Does Not Work Well to Combat Real Shocks 370
When Fiscal Policy Might Make Matters Worse 372
So When Is Fiscal Policy a Good Idea? 373
Takeaway 374
Chapter Review 375

Part 5: International Economics

CHAPTER 18 International Trade 381
Why Trade? 381
- The Division of Knowledge 381
