COMBATING POVERTY AND INEQUALITY

Structural Change, Social Policy and Politics

Contents

Foreword.....	III
Preface.....	V
Acknowledgements.....	VII
OVERVIEW: Combating Poverty and Inequality: Structural Change, Social Policy and Politics.....	1
SECTION ONE: SOCIALLY INCLUSIVE STRUCTURAL CHANGE	
CHAPTER 1: Towards Employment-Centred Structural Change.....	29
1. Structural Change in a Globalized World.....	31
The traditional pattern of structural change may not apply in a globalized world.....	32
2. Emerging Trends in Employment.....	34
Household incomes are affected by the dynamics of global labour supply.....	34
3. How Different Patterns of Development Affect Employment.....	36
East Asian states have followed the classic manufacturing growth path.....	36
The dualism of many middle-income countries exacerbates inequalities.....	40
Can service-led development be an alternative to industrialization?.....	43
Low-income countries remain heavily agrarian.....	45
Without careful management, mineral wealth can be a mixed blessing.....	50
4. The Links between Employment and Poverty.....	52
The working poor poverty rate is one indication of how employment affects poverty.....	52
5. Putting Employment Back on the Agenda: Implications for Policy.....	54
Improve employment opportunities.....	54
Transform the structure of employment to make sustained inroads against poverty.....	56
CHAPTER 2: Income Inequality and Structural Change.....	59
1. Income Equality and Poverty Reduction.....	61
High levels of inequality inhibit development.....	61
2. Global Trends in Inequality.....	62
The global income gap remains daunting.....	62
Income inequality has increased in the majority of countries around the world.....	63
The gap is growing between wage earners and those who derive their income from profits.....	65

3. Inequality, Structural Change and Global Intersectoral Terms of Trade	66
Early development thinking held that inequality rose in the early stages of development, and then declined	68
Global intersectoral terms of trade are a key determinant of inequality	68
Most low-income agrarian economies are highly unequal	70
Global forces now shape the movement of inequality within countries	71
How structural change and global forces affect inequality: Country examples	72
4. Redistributing Wealth and Income: Implications for Policy	76
Make deliberate policy choices to ensure that growth and equity reinforce one another	76
Strengthen the role of the state in fiscal redistribution	77
Refocus on land reform	78
Look after the best interests of small farmers	78
Advocate for reforms in the governance of the global economy	79
CHAPTER 3: Tackling Ethnic and Regional Inequalities	81
1. Ethnic and Spatial Inequalities and Development	82
Many factors contribute to spatial inequalities	82
Regional inequalities typically increase in early stages of development, and later even out	83
Ethnic inequalities are often rooted in historical circumstances	84
2. Ethnic and Spatial Inequalities and Structural Change	86
How inequalities have evolved in agrarian and industrializing economies	86
3. Addressing Ethnic and Regional Inequalities: Implications for Policy	102
Affirmative action is best pursued as part of a larger framework	103
Universal programmes may not be enough	104
Political and cultural inclusivity is key to action for disadvantaged groups	105
CHAPTER 4: Gender Inequalities at Home and in the Market	107
1. Women's Work and Income in Advanced Industrialized Economies	109
Women's participation in the labour market is growing, but gender gaps in wages and work conditions persist	109
State transfers help narrow the poverty gap between men and women	109
Pooling income within households can ease women's poverty but create dependency	110
2. Poverty, Work and Gender in a Development Context	111
Women are disproportionately affected by the rise in informal employment	111
The informal economy is stratified by gender and other social identities	112
Social norms and power relations affect women's access to paid work and control over earnings	113
Gender inequality in labour markets is persistent across diverse development paths	113
3. Gender, Poverty and the Role of Household Structures	120
Income pooling is not sufficient to close gender-based poverty gaps in the Republic of Korea	120
Income pooling effects in Brazil and South Africa vary according to household structures	120
In India, women's employment is often induced by distress, in contrast to Kenya	124

4. The Role of the State in Addressing Gender Inequality and Poverty: Implications for Policy	124
Protect informal workers through state regulation	125
Promote social protection, but not as a substitute for decent employment	126
Increase women's access to land, microcredit and other productive assets	128
Institute policies that support women's long-term economic security	128

SECTION TWO: TRANSFORMATIVE SOCIAL POLICY AND POVERTY REDUCTION

CHAPTER 5: Towards Universal Social Protection	135
1. The Case for Universal Social Protection	136
Neoliberal approaches to social protection fail to deliver on several counts	137
The benefits of narrowly targeting social assistance are questionable	138
Universal social protection demands a strong state role	139
Universal programmes offer greater benefits	139
Universal social protection can enhance economic progress	141
Universal social protection reduces poverty and inequality	142
2. Changing Patterns of Social Protection	144
Various routes to universal social protection exist	145
3. Instituting Universal Social Protection: Implications for Policy	156
Where poverty is widespread, social protection programmes should promote sustainable livelihoods and redistribution	156
A rights-based approach to social protection should seek to limit conditionality and targeting	157
Social assistance should be complemented by policies that promote redistribution and decent work	157
CHAPTER 6: Universal Provision of Social Services	161
1. The Case for Universal and Public Provision	162
Universal access to social services promotes growth and social development	162
The state plays a critical role in social provision	163
Recent policy trends have weakened universalist principles	164
2. Social Services in Developing Countries: Trends and Outcomes	165
Social service policies have shifted dramatically over the last half century	165
Neoliberal shifts since the 1980s have produced a trend towards commercialization	167
Underfunding and commercialization can have negative consequences for health and education	169
3. Social Service Provision in Different Development Contexts	172
Countries vary widely in their systems of social service provision	172
4. Providing Universal Social Services: Implications for Policy	180
Publicly financed systems can be affordable	180
Effective commercialization requires regulation	181

CHAPTER 7: Care and Well-Being in a Development Context	185
1. Care in Context: Institutional Arrangements and Enabling Policies	186
Diverse institutions have a hand in caregiving	186
An enabling environment can ease the burden of care	187
Specific care policies can also lighten the load	187
Economic development can squeeze women's caregiving time	188
2. Unpaid Care in Households, Families and Communities	188
Women's time spent on unpaid care is higher than men's everywhere	188
Women spend more time on paid and unpaid care combined than men	189
Several factors affect the amount of unpaid care work performed by both sexes	189
3. Care Arrangements across Countries	191
How care policies affect outcomes	191
4. Putting Care on the Agenda: Implications for Policy	202
Invest in infrastructure and basic social services	203
Ensure an adequate and reliable source of income	203
Create synergies between social transfers and social services	203
Build on existing programmes to cover care needs	203
Recognize care workers and guarantee their rights	203
Make care work more visible	204
CHAPTER 8: Financing Social Policy	207
1. Spending on Social Policy	208
Social spending reflects both national incomes and policy choices	208
The global context influences the financing of social policy	209
2. Revenue Sources and Their Impact on Development	211
Different financing instruments affect redistribution and reproduction in different ways	211
Different financing instruments affect production and protection in different ways	213
3. Mobilizing Resources for Social Policy	214
Designing equitable and efficient tax systems is key to development	214
Extension of social insurance schemes is a challenge for developing countries	218
A wealth of mineral resources does not necessarily enrich people	220
Aid can contribute to social development and international justice	223
Remittances are a financing source for development and household welfare	226
4. Financing Social Development: Implications for Policy	227
Create financing mechanisms that are sustainable, equitable and conducive to economic development	227
Consider the political and macroeconomic effects of various types of financing	228
Anchor a country's social policy system with domestic sources of financing	228

SECTION THREE: THE POLITICS OF POVERTY REDUCTION

CHAPTER 9: Business, Power and Poverty Reduction	233
1. The Rhetoric and Reality of Corporate Responsibility	234
The social agenda of business is expanding	234
Assessments of CSR reveal major shortcomings	236
CSR varies by region, industry and firm	238
Attention should refocus on corporate accountability	240
2. Changes and Variations in State-Business Relations	241
Globalization and liberalization have profoundly altered power relations	241
The influence of business varies by industry and policy regime	242
3. How Social Pressure Can Affect Corporate Behaviour	244
Labour movements are showing signs of revival	245
Activism is becoming more cohesive	246
The nature of social activism varies by policy regime	246
4. Business Preferences Relating to Social and Labour Market Policy	247
Business preferences have changed under globalization	247
5. The Potential and Limits of Collaborative Institutions	250
Social dialogue and bargaining help drive corporate change	250
Broad-based business associations can be forces for inclusive development	251
6. Towards Corporate Accountability: Implications for Policy	252
Create an enabling environment for collective action	253
Forge social pacts between business and government	254
Promote international norms and laws that regulate TNCs	254
Bring states back into the development equation	254
CHAPTER 10: Building State Capacity for Poverty Reduction	257
1. Dimensions of State Capacity That Promote Development	259
Political capacity is fundamental to setting and implementing policy	259
The capacity to mobilize resources is key to achieving development goals	263
The capacity to put resources to effective use is the core of state power	268
2. Market-Enhancing Institutional Reforms	273
The link between good governance and growth is weak	273
Market-enhancing managerial reforms were part of a second wave of reforms	275
Progress in decentralization is uneven	278

3. Building State Capacity for Structural Change and Poverty Reduction: Implications for Policy	280
Forge political settlements for redistribution	280
Improve domestic resource mobilization and encourage citizen involvement in the allocation and monitoring of resources	281
Tackle the three dimensions of state capacity directly rather than rely on good governance reforms to improve delivery of services	281
Create the foundations of a Weberian bureaucracy to improve service delivery for the poor	281
Improve the quality of decentralization by involving low-income groups in local decision-making processes	281
 CHAPTER 11: Democracy and the Politics of Poverty Reduction	283
 1. Democracy and Redistribution	285
Democracy tends to produce redistributive outcomes, but is subject to group influences	285
2. External Constraints to Pursuing Redistributive Policies	287
Government capture by technocrats insulates decisions from the will of the people	287
Aid conditionality limits the policy options of governments	290
3. Domestic Constraints to Pursuing Redistributive Policies	292
4. When Democracies Deliver Outcomes That Are Beneficial to the Poor	295
In high-income democracies, organized interest groups spurred redistribution	295
In welfare democracies in the South, subaltern groups were the main catalysts for change	297
In dualist countries leaning towards welfare democracy, social pacts have been key	299
Gains are possible, even if interest groups lack ties to power	301
In countries with weak civil societies, electoral competition can bring leaders to account	303
5. The Politics of Poverty Reduction: Implications for Policy	305
Abandon technocratic styles of policy making	305
Go beyond NGO-centred PRSP forums and more actively engage associations and social movements	306
Institutionalize rights to encourage effective group participation in policy making	306
Support organizations that represent the views of diverse groups that include the participation of formal and informal workers	306
Recognize the fact that not all groups can be incorporated into bargaining regimes	306
Empower the general population to exercise influence on how policies are made	306
 CONCLUDING REMARKS: Coordinating Social, Economic and Political Forces to Deliver for the Poor	309
