Money, Banking and Financial Markets in Central and Eastern Europe

20 Years of Transition

Edited by

Roman Matousek
Director, Centre for EMEA Banking, Finance and Economics, London Metropolitan University, UK
## Contents

*List of Figures and Tables*  
1 Introduction  
*Roman Matousek*

2 The Spread of the Financial Crisis to Central and Eastern Europe: Evidence from the BIS Data  
*Dubravko Mihaljek*  
2.1 Introduction  
2.2 Build-up of vulnerabilities  
2.3 The crisis spreads  
2.4 Impact on capital flows  
2.5 Is this crisis different?  
2.6 Looking ahead  

3 Are Product Market Structures Affected by Banking Concentration: Evidence from Transition Countries  
*Fabrizio Coricelli and Mojca Marc*  
3.1 Introduction  
3.2 Methodology and econometric model  
3.3 Data description  
3.4 Results  
3.4.1 The benchmark model  
3.4.2 Outliers  
3.4.3 Institutional variables  
3.4.4 Cross-border loans  
3.4.5 Market size  
3.4.6 Delayed effects and correlation vs. causation  
3.4.7 UNIDO dataset  
3.4.8 Structural break  
3.5 Conclusion
4 Financing Constraints, Credit, Rationing, and Financing Obstacles: Evidence from Firm Level Data in South Eastern Europe
   I. Hashi and V. Z. Toçi
   4.1 Introduction
   4.2 Review of the Literature
      4.2.1 Credit rationing and financing constraints: The theory
      4.2.2 The empirical literature
   4.3 Financing constraints, credit rationing and financing obstacles in SEE
      4.3.1 The empirical framework
      4.3.2 Data and Models
   4.4 Results
      4.4.1 Financing constraints: reliance on Internal Funds and Bank Loans
      4.4.2 Testing for credit rationing: rejected and discouraged applicants
      4.4.3 The importance of financing obstacles for firms' operation and growth
   4.5 Conclusions and policy implications
5 Efficiency, Persistence and Predictability of Central European Stock Markets
   Ladislav Kríštoufek
   5.1 Introduction
   5.2 Long-range dependence
   5.3 Hurst exponent estimation and market efficiency
      5.3.1 Classical and modified rescaled range analyses
      5.3.2 Detrended fluctuation analysis
      5.3.3 Hurst exponent and market efficiency
   5.4 Data
   5.5 Results
      5.5.1 Global dependence
      5.5.2 Monte Carlo simulations
      5.5.3 Time-varying dependence
      5.5.4 Predictability test
   5.6 Conclusion
6 Non-Linear Stock Market Co-Movement in Central and East European Countries
   Barry Harrison and Winston Moore
   6.1 Introduction
6.2 Data and summary statistics 122
6.3 Econometric approach 124
6.4 Empirical results 126
   6.4.1 Full sample 126
   6.4.2 Time-varying results 130
6.5 Conclusions 134

7 Cross-Country Versus Cross-Regional Convergence in the European Union: An Empirical Exploration 139
   Menbere Workie Tiruneh
   7.1 Introduction 139
   7.2 The basic issues in growth and convergence debates 140
   7.3 The Solow-Swan model and the convergence debate: A brief theoretical review 142
       7.3.1 The absolute and relative convergence hypotheses 144
       7.3.2 Empirical specifications 146
   7.4 A brief review of previous empirical research 148
   7.5 Data description, samples and results 150
       7.5.1 Cross-country convergence across EU members 150
       7.5.2 Cross-regional convergence in the European Union 154
       7.5.3 The absence of a 'trickle-down effect' in regional convergence: country-by-country case 154
   7.6 Conclusion 156

8 Price- and News-Based Measures of Financial Integration among New EU Member States and the Euro Area
   J. Babecký, J. Frait, L. Komárek and Z. Komáriková 161
   8.1 Introduction 161
   8.2 Financial integration: Concept and evidence 163
       8.2.1 Indicators of financial integration 163
       8.2.2 Evidence from the key segments of the financial system 164
   8.3 Price-based measures of financial integration 166
       8.3.1 β-convergence 166
       8.3.2 α-convergence 167
   8.4 News-based measures of financial integration 167
   8.5 Data 169
   8.6 Results 169
       8.6.1 Price-based measures of financial integration 169
       8.6.2 News-based measures of financial integration 173
   8.7 Conclusion 175
## Contents

*Shahdad Naghshpour and Bruno S. Sergi*  
9.1 Introduction 179  
9.2 Literature review 181  
9.3 Model 187  
9.4 Data and analysis 188  
9.5 Panel data analysis 191  
9.5.1 Fixed-effect model 191  
9.5.2 Between estimators 192  
9.5.3 Error component model 193  
9.6 Conclusions 194

10  Inflation Convergence in the New EU Member States from Central and Eastern Europe  
*Alina M. Spiru*  
10.1 Introduction 197  
10.2 Empirical studies on inflation convergence: A selective review 199  
10.3 Methodology 201  
10.4 Data and empirical results 206  
10.5 The inflation convergence record: A look at potential explanatory factors 220  
10.6 Concluding remarks 223

11  Persistent Differential Inflation Rates in the New Euro Member Countries: The Phillips Curve before and after Adopting the Euro  
*Marjan Senjur*  
11.1 Introduction 229  
11.2 The Phillips curve before adopting the euro 232  
11.3 Price levels and the Phillips curve after adopting the euro 234  
11.3.1 The law of one price and comparative price levels in a heterogeneous monetary union 234  
11.3.2 The convergence of price levels between old euro area member countries 235  
11.3.3 The convergence of the price levels of new EU member countries 237  
11.3.4 The Phillips curve after adopting the euro 238  
11.4 The comparative price level gap due to Balassa’s developmental and structural effect 239
11.4.1 Differential inflation due to economic development reasons 239
11.4.2 Differential inflation as a result of differential growth rates 241
11.4.3 The Phillips curve of the differential inflation rate 243
11.5 Managed comparative price levels: The Samuelson effect 244
11.5.1 Differential inflation due to comparative unit labour costs (ULC) 245
11.5.2 The Phillips curve of a managed differential inflation rate 246
11.6 Policy implications and discussion 246
11.7 Conclusions 249

12 Implications of Volatility for Uncovered Interest Parity Testing
Alexandra Horobet, Sorin Dumitrescu and Dan Gabriel Dumitrescu

12.1 Introduction 253
12.2 Data and research methodology 254
  12.2.1 Short review of empirical evidences from testing CIP and UIP 255
  12.2.2 OLS regressions 259
  12.2.3 High volatility episodes and uncovered interest parity 260
  12.2.4 The regime-switching models 261
12.3 Results 262
  12.3.1 Results of OLS analysis 262
  12.3.2 High volatility implications for UIP validation 264
  12.3.3 Results of Markov-switching models 264
12.4 Concluding remarks 272
