## Part 1 INTRODUCTION

### Chapter 1
**Introduction to information management**

- **Chapter at a glance**
- **Objective**
- **Learning outcomes**
- **Management issues**
- **Links to other chapters**

#### Introduction
2

#### Information in today's world

- **The information society**
- **The information economy**
- **The information age**
4
5
6

#### Information in today's organization

- **Information overload**
- **Research insight 1.1 How much information?**
- **Using information to support processes**
- **Using information to create value**
- **Mini case study 1.1 Capital One creates value through information**
- **Activity 1.1 Types of organizational information**
7
8
9
10
11
11
14

#### Fundamentals of business information management

- **What is business information management?**
15
16

#### Information resources

- **Information quality**
- **Activity 1.2 Assessing information quality for the Lo-Cost Airline Company**
- **The data-to-information transformation process**
- **Information types and sources**
- **Online information sources**
- **Activity 1.3 Smarter searching using Google**
- **Case study 1.1 Avoiding disasters**
16
19
20
20
21
22
24
24

#### Technology resources

- **Software resources**
- **Technology infrastructure resources**
- **Information systems**
- **E-business and e-commerce**
- **Informatics**
- **Does IT matter?**
25

**Introduction** 39

**The main categories of software** 40

**Applications software** 41

Categorizing applications by level of decision making 42

Enterprise applications 44

*Mini case study 2.1 Enterprise applications improve information access at Minolta Europe* 47

Document and records management systems 47

Departmental applications 49

Personal productivity or office software 49

Groupware 49

*Activity 2.1 Options for using groupware to support student learning* 50

Database systems 51

**Systems software** 52

Operating systems software 52

Network software 55

Development software 56

*Case study 2.1 Spares ordering systems in the Navy* 57

**Selecting appropriate software** 58

The software selection process 58

Criteria for selecting software 59

*Activity 2.2 Selecting applications software for a small business* 60

The make, buy or rent decision 60

*Activity 2.3 On-demand computing* 61

Best-of-breed or single-vendor? 62

Research insight 2.1 Single-vendor or best-of-breed? 62

*Case study 2.2 IT as a utility* 63

Open-source software 64

*Mini case study 2.2 Munich makes the move to Linux* 66

**Debate 2.1** 66

*Activity 2.4 Selecting open-source software* 67

*Case study 2.3 Is open-source software a realistic choice?* 67

**E-business applications** 69

Research insight 2.2 *Online transaction costs* 70
### E-business defined
- Mini case study 2.3 *Dabs.com profit from e-business* 72
- E-business benefits and management issues 75

### From the Internet to intranets and extranets
- Intranet applications 77
- Intranet benefits and management issues 78
- Mini case study 2.4 *A modern intranet for Ceva Santé Animale* 78
- Extranet applications 80
- Mini case study 2.5 *Herman Miller puts the extranet first* 81
- Extranet benefits and management issues 82
- Web logs 83

### Customer relationship management applications
- Mini case study 2.6 *Standard Life Bank justifies new data warehouse* 86

### Supply chain management applications
- Mini case study 2.7 *Iceland brings its suppliers in from the cold* 88

### Summary
99

### Exercises
- Self-assessment questions 89
- Essay and discussion questions 89

### References
90

### Further reading
91

### Weblinks
91

### Chapter 3
#### Technology for information management
92

### Introduction
- Research insight 3.1 *From techno-speak to common speak* 93
- Systems theory 94
- Activity 3.1 *Why are environmental influences important?* 96
- Decision-making theory 96
- Research insight 3.2 *How people process information* 97

### Technology infrastructure components
- The client/server model 99
- Types of client computer 101
- Types of server computer 103
- Computing architectures 104
- Voluntary computing 105
- Case study 3.1 *Why storage networks matter* 107

### Selecting computer components
109

### Selecting processors
- Factors in microprocessor selection 110
- Graphics and audio microprocessors 112
- Research insight 3.3 *Moore's law* 113

### Selecting memory devices
- Factors in selection of RAM 114
- Activity 3.2 *Understanding storage capacity* 115

### Selecting permanent storage
- RAID systems 117
Mean time before failure or mean time between failures (MTBF) 118

Case study 3.2 Summerhill Veterinary Surgery 119
Factors in selection of storage devices and media 120

Activity 3.3 Selecting RAM, storage devices and media 121

Selecting output devices 122
Monitors 122
Printers 123
Factors in selecting displays or monitors 123
Factors in selecting printers 124

Selecting input devices 125
Factors in selecting input devices 125
Other input devices 125

Assistive technologies 126

Debate 3.1 127

Introduction to network technology 127
Telecommunications channels 127
Different forms of guided media 128
Wi-Fi 129
Telecommunications components 129
Electronic data interchange (EDI) 130

Internet technology 131
The development of the Internet 132
What is the World Wide Web? 133
Internet standards – how does the Internet work? 135
Internet data transfer standards 137
Internet-related standards bodies 137
The HTTP protocol 138
Uniform resource locators (URLs) 138
HTML (Hypertext Markup Language) 139
Indexing, describing and referencing HTML documents 140
XML (eXtensible Markup Language) 141
Examples of XML applications 143

Activity 3.4 E-business standards 146

Mini case study 3.1 Ancient stone helps create e-business standard 146

The semantic web 148
The wireless Internet 149
SMS messaging 151

Mini case study 3.2 QR Codes show England fans the way 152
Interactive digital TV 152

Case study 3.3 Online sales soar at easyJet 152

Summary 156

Exercises 156
Self-assessment questions 156
Essay and discussion questions 156

References 157
Further reading 158

Part 2 STRATEGY

Chapter 4
Information management strategy 162

Chapter at a glance · Objective · Learning outcomes · Management issues · Links to other chapters 162

Introduction 163

Why is an information management strategy needed? 164
- Data and information needs – concerns about data quantity 164
- Data and information needs – concerns over time, quality and cost 165
- The information lifecycle 166
- Records management 167

Formal strategies 168
- Mini case study 4.1 Consequences of poor information management strategy 169
- Case study 4.1 Ten commandments for information management 170

The relationship between strategies for managing information-related resources 172
- Responsibility for information-related resources 172
- Alternative relationships between strategies for managing information-related resources 173
- Research insight 4.1 How managers perceive information management 175
- Debate 4.1 177

Developing an information management strategy 177
- The strategy process 177
- Information management strategy issues 179
  1 The Hawley Committee IM Guidelines 179
     - Research insight 4.2 Information management guidelines from the Hawley Committee Report 179
     - Activity 4.1 Strategic issues of information management 181
  2 Orna's information policy and information audit 181
  3 The Willard model of information resource management 182

Information management themes and approaches 183
- IM theme 1: Information value 183
- IM theme 2: Information quality (see Chapter 10) 185
  - Activity 4.2 Assessing information quality of online resources 185
- IM theme 3: Information security (see Chapters 9 and 12) 186
- IM theme 4: Legal and ethical compliance (see Chapter 12) 187
- IM theme 5: Knowledge management (see Chapter 5) 188
- IM theme 6: Technology support (see Chapters 2, 3 and 6) 188
- IM management approach 1: Structuring the information management function 189
  - Case study 4.2 A global information management strategy at GlaxoSmithKline 190
- IM management approach 2: Responsibilities 192
- Critiquing the roles and responsibilities in IM 192
  - Activity 4.3 Assigning responsibilities for information ownership at the Lo-Cost Airline Company 194
- The chief information officer (CIO) role 194
  - Debate 4.2
  - Research insight 4.3 The elusive CIO 195
- IM management approach 3: Information resource analysis 196
  - Information mapping 196
- IM management approach 4: Information policy 197
Chapter 5
Knowledge management strategy

Chapter at a glance • Objective • Learning outcomes • Management issues • Links to other chapters

Introduction

Defining knowledge

From information to knowledge and from knowledge to information

Debate 5.1

Defining knowledge management

Research insight 5.1 Deadly sins of knowledge management

Activity 5.1 Defining knowledge management

Knowledge management strategy

Research insight 5.2 How important is knowledge management to business?

The knowledge audit

Define audit objectives

Identify ideal state

Define audit sample

Select audit assessment tools

Activity 5.2 Using the ASHEN model

Build profiles of employees

Develop a knowledge map

Case study 5.1 Using social network analysis as part of a knowledge audit

Develop a knowledge value chain to represent core knowledge processes

Determine key issues and conclusions

Discuss key findings in groups to test conclusions

Highlight good practice examples of knowledge management already in action in the organization

Knowledge management objectives, vision and mission

Activity 5.3 Defining knowledge management objectives

Strategy selection

Codification versus personalization

Activity 5.4 Assessing knowledge management strategy approaches

Explorer versus exploiter

Aggressive versus conservative

Technocratic versus economic versus behavioural

Case study 5.2 Knowledge management strategy at the UK Department of Trade and Industry (DTI)
Strategy options: knowledge management in action
  Communities of practice 238
  Competitive intelligence 238
  Story and narrative management 242

Using information and communications technologies (ICT) to enable knowledge management
  Matching ICT to knowledge management requirements 244
  Intranets and extranets 245
  Expertise databases and corporate yellow pages 246
  Collaborative tools 247
  Corporate portals 247
  Customer relationship management (CRM) systems 248
  Document management/Content management systems 249
  E-learning 250

Roles and competencies
  Activity 5.5 Knowledge management roles and competencies 251

Creating a knowledge-sharing culture: rewards and incentives for knowledge management
  Activity 5.6 Debate: can a standard be developed for knowledge management? 254

Summary 254
Exercises
  Self-assessment questions 255
  Essay and discussion questions 255
References 256
Further reading 257
Weblinks 258

Chapter 6
Information systems strategy 259

Chapter at a glance · Objective · Learning outcomes · Management issues · Links to other chapters 259

Introduction 260
What is IS strategy? 261
  IT governance 262
    Mini case study 6.1 Philips benefits from COBIT IT governance 264
    Information systems strategy activities 265

Defining a process for IS strategy development 267
  Long-term vs short-term scope of IS strategy 267
  Top-down vs bottom-up IS strategy 268
    Debate 6.1 268
      Mini case study 6.2 Test Valley Council IS strategy 2002–2005 268
      Activity 6.1 Evaluating different approaches to the IS strategy development process 272

Responsibilities and controls for IS strategy 273
  Case study 6.1 Jean-Pierre Corniou of Renault shows how to bring business technology out into the open 273
  Activity 6.2 Where should ultimate responsibility for IS lie? 275
  Research insight 6.1 Does IS have a voice? 276
  Mini case study 6.3 The incredible shrinking CIO 277

### Part 3 IMPLEMENTATION

#### Chapter 7
Managing systems development

Chapter at a glance · Objective · Learning outcomes · Management issues · Links to other chapters · Introduction
Types of information systems project

Mini case study 7.1 The UK National Health Service project to develop an integrated care records service (ICRS) 319

Project management goals

Approaches to building information management applications 323
Activity 7.1 Choices in systems build 324
Debate 7.1

Mini case study 7.2 Alstom replaces legacy systems with enterprise resource planning system 325

The project management process

Research insight 7.1 Balanced resourcing for IS projects 326
Planning tools to support the project management process 327
Methodologies to support the project management process
The PRINCE2 methodology 329
Euromethod 330
British Standard 6079 330
The Dynamic Systems Development Method (DSDM) 330
COBIT IT governance framework 330
Systems analysis and design methodologies 331
The European Foundation for Quality Management (EFQM) 332
Organizing to support the project management process 332
Case study 7.1 Reading Council implements the PRINCE2 project management methodology 333

The systems development process

The waterfall model of systems development 335
Prototyping 336
Agile software development 338
The Dynamic Systems Development Method (DSDM) 339
The DSDM systems development framework 339
Timeboxing 342
Further systems development methodologies 343
Structured Analysis and Structured Design (SASD) 343
Jackson Systems Development (JSD) 343
Merise 344
Structured Analysis, Design and Implementation of Information Systems (STRADIS) 344
Yourdon Systems Model (YSM) 344
End-user development 344
Research insight 7.2 Rapid results teams 345
Case study 7.2 Information systems development in the Police Force 345

Risk management

Mini case study 7.3 Dell begs ToryDems to keep NHS IT project 349
Debate 7.2 350

Key activities in systems development

350
Systems initiation phase

Key activities of systems initiation
1 Produce feasibility study 351
2 Project plan 351
Typical problems of the initiation phase 352

Systems analysis phase

Key activities of systems analysis
1 Focus groups 352
Approaches to managing change 376
Soft systems methodology 378
Stakeholder involvement in change management 379
  Leadership qualities 379
Employee motivation 381
  Debate 8.2 384
  Changing job design 384
  Education and training 384
  Activity 8.3 Managing e-commerce-related change at the Lo-cost Airline Company 385
  Research insight 8.1 The role of Human Resources Departments 386
Specific examples of change management in BIM 386
  1 The corporate information portal 386
  What is it? 386
  What are the benefits? 388
  Problems of change management 388
  Approaches to managing change 388
  Mini case study 8.1 IT and change in small to medium businesses 389
  Activity 8.4 Keeping a portal alive 389
  2 Sell-side e-commerce 390
  What is it? 390
  What are the benefits? 390
  Problems of change management 392
  Approaches to managing change 392
  3 Customer relationship management 395
  What is it? 395
  What are the benefits? 396
  Problems of change management 396
  Approaches to managing change 397
  4 Business intelligence 398
  What is it? 398
  What are the benefits? 400
  Case study 8.2 A discussion of data analysis methods 401
  Problems of change management 402
  Approaches to managing change 402
  Activity 8.5 Summarizing common themes in change management for BIM 404
  Case study 8.3 Fighting the flood of data 405
Summary 406
Exercises 407
  Self-assessment questions 407
  Essay and discussion questions 407
References 408
Further reading 410
Weblinks 410

Chapter 9
Building an information architecture 411

Chapter at a glance · Objective · Learning outcomes · Management issues ·
Links to other chapters 411

Introduction 412
  Definitions 412
Information architecture 414
Standards for information architecture 415

**Systems analysis**
Identifying information architecture requirements 416
Using the results from the information and knowledge audits 417
Identifying stakeholders 417
Questionnaires 418
Interviews 418

**Activity 9.1 Researching requirements at The Lo-cost Airline Company:**

questionnaire 418

Observation 419
Audit of documentation 419
Systems diagrams 420

Information flow diagrams 420

**Activity 9.2 Understanding an information flow diagram** 421

Data flow diagrams 422
Entity relationship diagrams 424
UML 426

Use case analysis 427

Actors 427
Use cases 428
Use case diagramming 428
Card sorting 428
Card sorting for web classification 428
Class Responsibility Collaborator (CRC) cards 430

Analysis for interoperability 431
Security analysis 433

Introduction to information security 433
Standards: British Standard for Information Security BS7799 433

**Design**

Database design 435
Normalization 435
Data dictionaries 436

**Case study 9.1 Remote database administrators and vendors** 437

Web design 438
The difference between websites and intranets 438

Analysis for web design: web blueprint 439

Page design and wireframes 440
Navigation systems 442
Search versus browse 445
Using search technologies 446
Organizational standard and guidelines 448

**Activity 9.3 Intranet design at the Lo-cost Airline Company** 450

Uses of meta-data on web pages 451

**Activity 9.4 Creating Dublin Core metadata using an online generator** 452

**Designing for interoperability** 452

Taxonomy, thesauri and controlled vocabularies 452

**Case study 9.2 Sainsbury’s: getting connected with a taxonomy** 458

Using Extensible Markup Language – XML 460
XML schemas 460
Uses of XML 460
RSS 461

**Usability** 464
Activity 9.5 Jacob Nielsen's ten usability heuristics 465

Security design 466
   Security design: logical 466
   Security policies 466
   Acceptable use policies 467
   Security design: physical 467

Summary 468

Exercises 469
   Self-assessment questions 469
   Essay and discussion questions 469

References 470
Further reading 471
Weblinks 471
Multimedia resources 472

Part 4 MANAGEMENT

Chapter 10
Managing information quality 474

Chapter at a glance · Objective · Learning outcomes · Management issues · 474
Links to other chapters 475

Introduction 477

Define information quality 478
   The DIKAR and RAKID models 479
   Data quality 479
      Mini case study 10.1 Abbey Bank cuts costs through improving data quality 481
   Information quality 482
   COBIT information quality requirements 486
      Activity 10.1 Evaluation of information quality 487
   Knowledge quality 487
      Activity 10.2 Management of knowledge quality at AstraZeneca 489
   Actions and results quality – performance management systems 490
      The imperative for performance management systems 490
   Corporate performance management 491
      Activity 10.3 Capabilities of a corporate performance management system 493
   Mini case study 10.2 Jigsaws always have more than one piece 494
   Performance metrics 495
   The balanced scorecard 496
   Six Sigma quality improvement 497
   Assessing the quality of business performance metrics 498
   Case study 10.1 NHS Operating Room Management Information System (ORMIS) 499
   Research insight 10.1 Successful metrics guidelines 500

Conduct information audit 501
   What is an information audit? 501
   What is the purpose of an information audit? 502
   What is the procedure for an information audit? 503
   Research insight 10.2 An information audit at the University of Glamorgan 505
   Case study 10.2 An information audit at an SME 507
Define and implement information quality policy 509
Approaches for managing data quality 510
The data dictionary 510
Data validation 511
Data quality auditing 512
Data cleansing 512
Data migration to data warehouses 513
Targets for data quality 513
Activity 10.4 Procedures for managing information quality – the challenge of the e-mail address 514
Human factors in data quality 514
Mini case study 10.4 Managing data quality at the Lo-cost Airline Company 515
Approaches to managing information quality 516
Mini case study 10.5 A games retailer 517
Human factors in information quality 519
Responsibilities for information quality 520

Summary 521
Exercises 522
Self-assessment questions 522
Essay and discussion questions 522

References 522
Further reading 523
Weblinks 524

Chapter 11
Managing information services quality 525

Chapter at a glance · Objective · Learning outcomes · Management issues · Links to other chapters 525

Introduction 526
What is information service quality? 527
Attributes of service quality 529
Activity 11.1 End-user information service quality requirements 530
Assessing online service quality 530
Case study 11.1 Multi-channel customer service 531
Costs of service delivery 532
Managing information delivery 532
Mini case study 11.1 The World Bank pulls information using the Google Search Appliance 533
Managing the quality of information delivery 535
Controlling information security 536
Business continuity planning 538
Mini case study 11.2 The price of security 538
Managing computer viruses 539
Types of virus 539
Protecting computer systems against viruses 541
Controlling information service usage 543
E-mail management 543
1 Minimizing spam (unsolicited e-mail) 543
Research insight 11.1 E-mail volume 544
2 Minimizing internal business e-mail 547
3 Minimizing external business e-mail  548
4 Minimizing personal e-mail (friends and family)  548
   Debate 11.1  549
5 Legal liability  549

**End-user support**  550
   End-user development  550
      Research insight 11.2 *Press Delete for IT time wasters*  551
   ICT infrastructure  554
      Research insight 11.3 *Service quality disruptions*  554

**Resourcing information services**  555
   Managing service costs  555
      Reducing the TCO of client computers  556
   The cost of information provision  558
      **Case study 11.2 How long before we scrap that PC?**  559
   Outsourcing of information services  560
      **Mini case study 11.3 Outsourcing**  561
      Types of information services outsourcing  562
   Offshore outsourcing or ‘offshoring’  562
