1. INTRODUCTION

1.1 Origins and Objectives of the Study 1
1.2 The Scope of the Model 4

2. GENERAL ECONOMIC PRINCIPLES FOR BUILDING COMPREHENSIVE URBAN MODELS

2.1 Introduction 7
2.2 General Equilibrium (The Competitive Case) 8
  2.2.1 Introduction 8
  2.2.2 Excess demand functions 9
  2.2.3 Walras's law 11
  2.2.4 A general theorem for the existence of a unique equilibrium 11
  2.2.5 Stability of equilibrium 14
  2.2.6 Optimality of equilibrium 16
  2.2.7 Urban general equilibrium 16
  2.2.8 The case of discrete choice 18
2.3 General Equilibrium (Monopolistic Competition) 21
  2.3.1 Introduction 21
  2.3.2 Monopolistic competition 21
  2.3.3 Reaction functions and Nash equilibria 22
  2.3.4 Existence, uniqueness, stability and optimality of Nash equilibria 23
  2.3.5 The urban case and discrete choice models 23
2.4 General Equilibrium (With Externalities) 24
  2.4.1 Externalities 24
  2.4.2 Equilibrium with externalities 25
