List of editors and contributors viii
Foreword by Daniel McFadden xv

1 Introduction 1
    André de Palma, Robin Lindsey, Emile Quinet and Roger Vickerman

PART I TRANSPORT AND SPATIAL ECONOMY

2 General equilibrium models for transportation economics 21
    Johannes Bröcker and Jean Mercenier
3 Transport in spatial models of economic development 46
    Michael Wegener
4 New economic geography: the role of transport costs 67
    Miren Lafourcade and Jacques-François Thisse
5 Transport costs and international trade 97
    Alberto Behar and Anthony J. Venables
6 City formation and transport costs 116
    Takatoshi Tabuchi

PART II THE DEMAND FOR TRANSPORT

7 Valuation of travel time savings 135
    David A. Hensher
8 Advances in discrete choice: mixture models 160
    Joan L. Walker and Moshe Ben-Akiva
9 Dynamic traffic modeling 188
    André de Palma and Mogens Fosgerau
10 Activity-based travel demand analysis 213
    Abdul Rawoof Pinjari and Chandra R. Bhat
11 Economics of transport logistics 249
    Michel Beuthe

PART III THE COST OF TRANSPORT

12 Cost functions for transport firms 273
    Leonardo J. Basso, Sergio R. Jara-Diaz and William G. Waters II
13 Efficiency measurement theory and its application to airport benchmarking 298
    Tae Hoon Oum, Katsuhiro Yamaguchi and Yuichiro Yoshida
14 Theory of external costs 319
    Stef Proost
A handbook of transport economics

15 External costs of transport in the United States
   Mark Delucchi and Don McCubbin
   341

16 External costs of transport in Europe
   Rainer Friedrich and Emile Quinet
   369

17 The value of a statistical life
   Henrik Andersson and Nicolas Treich
   396

18 Transport and energy
   Kenneth Button
   425

19 The full marginal costs of highway travel: methods and empirical estimation for North America
   Yossi Berechman, Bekir Bartin, Ozlem Yanmaz-Tuzel and Kaan Ozbay
   444

PART IV  OPTIMAL PUBLIC DECISIONS

20 Surplus theory
   Yoshitsugu Kanemoto
   479

21 The direct and wider impacts of transport projects: a review
   Peter Mackie, Daniel Graham and James Laird
   501

22 Price discrimination
   Simon P. Anderson and Régis Renault
   527

23 Road congestion pricing
   Georgina Santos and Erik Verhoef
   561

24 The economics of information in transport
   Piet Rietveld
   586

25 Personal intelligent travel assistants
   Caspar G. Chorus and Harry J.P. Timmermans
   604

26 Equity dimensions of transport policies
   Alain Trannoy
   624

27 Psychology and rationality in user behavior: the case of scarcity
   Jonathan L. Gifford
   650

PART V  COMPETITION AND REGULATION

28 Competition, regulation and public service obligations
   Marco Ponti
   661

29 The theory of incentives applied to the transport sector
   Elisabetta Iossa and David Martimort
   684

30 Public–private partnerships in transport
   Antonio Estache, Ellis Juan and Lourdes Trujillo
   708

31 Parking economics
   Richard Arnott
   726

32 The industrial organization of competition in local bus services
   Philippe Gagnepain, Marc Ivaldi and Catherine Muller-Vibes
   744

33 Competition and regulation in rail transport
   Chris Nash
   763
34 Airport governance and regulation: three decades of aviation system reform 779
   David Gillen
35 Competition and regulation in air transport 797
   Anming Zhang, Yimin Zhang and Joseph A. Clougherty
36 Competition and regulation in seaports 822
   Hilde Meersman, Eddy Van de Voorde and Thierry Vanelslander
37 Competition and regulation in maritime transport 844
   Mary R. Brooks
