The International Handbook on Non-Market Environmental Valuation

Edited by

Jeff Bennett

Professor of Environmental Management, Crawford School of Economics and Government, The Australian National University, Canberra, Australia

Edward Elgar
Cheltenham, UK • Northampton, MA, USA
Contents

List of contributors vii
Acknowledgements xix

1 The rise and rise of non-market environmental valuation
   Jeff Bennett 1

2 Using hedonic pricing for estimating compensation payments
   for noise and other externalities from new roads
   Ståle Navrud and Jon Strand 14

3 A hedonic price model of coral reef quality in Hawaii
   Roy Brouwer, Sebastiaan Hess, Yi Liu, Pieter van Beukering
   and Sonia Garcia 37

4 Applying the travel cost method to Minorca beaches: some
   policy results
   Pere Riera, Kenneth E. McConnell, Marek Giergiczny and
   Pierre-Alexandre Mahieu 60

5 The role of water quality perceptions in modelling lake
   recreation demand
   Yongsik Jeon, Joseph A. Herriges, Catherine L. Kling and
   John Downing 74

6 Testing the robustness of contingent valuation estimates of
   WTP to survey mode and treatment of protest responses
   John Loomis, Armando González-Cabán and Joseph Champ 102

7 Consequentiality and contingent values: an emerging paradigm
   Gregory L. Poe and Christian A. Vossler 122

8 Decision versus experienced utility: an investigation using the
   choice experiment method
   Dugald Tinch, Sergio Colombo and Nick Hanley 142

9 Bioindicator-based stated preference valuation for aquatic
   habitat and ecosystem service restoration
   Robert J. Johnston, Eric T. Schultz, Kathleen Segerson and
   Elena Y. Besedin 159
10 Efficiency versus bias: the role of distributional parameters in count contingent behaviour models 187
   Jeffrey Englin, Arwin Pang and Thomas Holmes

11 Estimation of household water demand with merged revealed and stated preference data 201
   Jeremy Cheesman and Jeff Bennett

12 Preference heterogeneity and non-market benefits: the roles of structural hedonic and sorting models 222
   H. Allen Klaiber and V. Kerry Smith

13 Dealing with scale and scope issues in stated preference experiments 254
   John Rolfe and Xuehong Wang

14 Experimental design strategies for stated preference studies dealing with non-market goods 273
   John M. Rose, Stuart Bain and Michiel C.J. Bliemer

15 Incentive and information properties of preference questions: commentary and extensions 300
   Richard T. Carson and Theodore Groves

16 Valid value estimates and value estimate validation: better methods and better testing for stated preference research 322
   Ian J. Bateman

17 Evaluating benefit transfer for Canadian water quality improvements using US/Canada metadata: an application of international meta-analysis 353
   Paul J. Thomassin and Robert J. Johnston
