The Economics of Quality: An Empirical Analysis of the Software Industry

Inaugural-Dissertation

zur Erlangung des akademischen Grades eines Doktors
der Wirtschafts- und Sozialwissenschaften
(Dr. rer. pol.)
der Friedrich-Alexander-Universität Erlangen-Nürnberg

vorgelegt von
Diplom-Wirtschaftsinformatiker
Lars M. Karg
aus Michelstadt
# Contents

1 Introduction ........................................... 1
   1.1 Problem Statement .................................. 2
   1.2 Contributions ...................................... 3
   1.3 Outline ........................................... 5

2 Theoretical Foundation ................................. 7
   2.1 Introduction ....................................... 7
   2.2 Basics of Software Development ................. 8
   2.3 Quality in Software Development ............... 9
      2.3.1 Evolution of Quality Management .......... 10
         2.3.1.1 Inspection Era .......................... 11
         2.3.1.2 Quality Control Era ..................... 11
         2.3.1.3 Quality Assurance Era .................. 12
         2.3.1.4 Total Quality Management Era .......... 13
      2.3.2 Meaning of Software Quality ............... 14
      2.3.3 Achieving Software Quality ................. 17
         2.3.3.1 Through Quality Control and Assurance .. 18
         2.3.3.2 Through Software Process Improvement .. 21
   2.4 Quality Costs in Software Development .......... 22
      2.4.1 Definition of Software Quality Costs ...... 23
      2.4.2 Usage of Software Quality Costs .......... 24
         2.4.2.1 As a Business Parameter ................. 24
         2.4.2.2 As a Communication Tool ................. 25
         2.4.2.3 For Planning and Control ............... 25
         2.4.2.4 As a Motivator .......................... 26
      2.4.3 Software Quality Costing Approaches ...... 26
         2.4.3.1 Prevention, Appraisal, and Failure Approach, Crosby’s Approach, and Opportunity Cost-based Approach .. 28
2.4.3.2 Process Costing Approach ............................................. 30
2.4.3.3 Activity-based Costing Approach .......................... 31
2.4.3.4 Application in Software Development .......... 34
2.4.4 Empirical Findings on Quality Costs in Production Economics ................................. 35
2.4.5 Quality Cost Models .......................................................... 37
  2.4.5.1 Trade-off and Revised Trade-off Quality Cost Model ........................................... 37
  2.4.5.2 Criticism of the Trade-off and the Revised Trade-off Quality Cost Model .......... 39
  2.4.5.3 Dynamic Quality Cost Model ........................................ 40
  2.4.5.4 Application to Software Development ...................... 43
2.5 Concluding Remarks ............................................................... 46

3 State-of-the-Art ................................................................. 47
3.1 Introduction ................................................................. 47
3.2 Review Approach .............................................................. 48
3.3 Classification Scheme ......................................................... 49
  3.3.1 Research Topic .......................................................... 49
  3.3.2 Research Scope ........................................................ 51
  3.3.3 Research Approach ..................................................... 51
3.4 General Review Results and Discussion ......................... 53
  3.4.1 Domain-relevant Journals ............................................. 53
  3.4.2 Historical Development of the Research Domain .... 53
  3.4.3 Article Distribution across Properties .................. 54
3.5 Specific Review Results and Discussion .......................... 59
  3.5.1 Industry Level .......................................................... 59
  3.5.2 Company Level ........................................................ 59
    3.5.2.1 Prevention Costs Only .......................................... 60
    3.5.2.2 Failure Costs Only, and Appraisal and Failure Costs Only ...................... 60
    3.5.2.3 Prevention, Appraisal, and Failure Costs ........................................... 61
  3.5.3 Project/product Level .................................................. 62
    3.5.3.1 Appraisal Costs Only and Failure Costs Only .................................. 62
    3.5.3.2 Appraisal and Failure Costs Only ........................................... 63
  3.5.4 Activity Level ............................................................ 65
    3.5.4.1 Appraisal Costs Only ............................................. 65
    3.5.4.2 Appraisal and Failure Costs Only ........................................... 66
3.6 Summary and Implications for Further Research 66
  3.6.1 Summary and General Implications 67
  3.6.2 Implications for our Further Research 68
3.7 Concluding Remarks 70

4 Research Model and Data Measures 71
  4.1 Introduction 71
  4.2 Basic Conceptual Research Framework 72
    4.2.1 Inspection Performance 74
    4.2.2 Conformance Quality 75
    4.2.3 Internal Failure Costs 76
  4.3 Extended Conceptual Research Framework 77
    4.3.1 Process-, People- and Team-related Factors 80
    4.3.2 Dispersion- and Distribution-related Factors 81
    4.3.3 Release- and Product-related Factors 83
    4.3.4 Factors Included in the Extended Conceptual Research Framework 86
    4.3.5 Internal Failure Processing Efficiency 88
  4.4 Research Sites and Data Collection 90
    4.4.1 Research Sites 90
      4.4.1.1 Commercial Software Vendor 90
      4.4.1.2 SourceForge.net 91
    4.4.2 Data Collection Procedure and Sources 92
      4.4.2.1 Commercial Software Vendor 93
      4.4.2.2 SourceForge.net 94
  4.5 Variable Definition and Measurement 96
    4.5.1 Economic Variables 96
    4.5.2 Team and Control Variables 100
    4.5.3 Constant and Unobservable Variables 104
  4.6 Concluding Remarks 105

5 Empirical Test of the Research Model 107
  5.1 Introduction 107
  5.2 Empirical Models and their Construction 108
    5.2.1 Model Specification 108
    5.2.2 Model Construction Approach 110
      5.2.2.1 Data Examination 110
      5.2.2.2 Basic Model Construction 112
