<i>List of illustrations</i>	<i>page</i> xiii
<i>Introduction to the second edition</i>	xv
<i>Preface to the second edition</i>	xxi
<i>Preface to the first edition</i>	xxiii
<i>Table of notation</i>	xxv
<i>Table of assumptions</i>	xxix
A General equilibrium theory: Getting acquainted	1
1 Concept and history of general equilibrium theory	3
1.1 Partial and general equilibrium: Development of the field	3
1.2 The role of mathematics	7
1.3 History of general equilibrium theory	8
1.4 Bibliographic note	10
2 An elementary general equilibrium model: The Robinson Crusoe economy	12
2.1 Centralized allocation	14
2.2 Decentralized allocation	16
2.3 Pareto efficiency of the competitive equilibrium allocation: First fundamental Theorem of Welfare Economics	23
2.4 Bibliographic note	24
Exercises	24
3 The Edgeworth box	31
3.1 Geometry of the Edgeworth box	32
3.2 Calculating an efficient allocation	35
3.3 A competitive market solution in the Edgeworth box	37
3.4 Bibliographic note	40
Exercises	40

4	Integrating production and multiple consumption decisions:	
	A $2 \times 2 \times 2$ model	44
4.1	A $2 \times 2 \times 2$ model	46
4.2	Technical efficiency	46
4.3	Pareto efficiency	48
4.4	First Fundamental Theorem of Welfare Economics:	
	Competitive equilibrium is Pareto efficient	50
	Exercises	52
5	Existence of general equilibrium in an economy with an excess demand function	58
5.1	Bibliographic note	64
	Exercises	64
B	Mathematics	67
6	Logic and set theory	69
6.1	Quasi-orderings	71
6.2	Functions	73
6.3	Bibliographic note	73
	Exercises	73
7	\mathbf{R}^N : Real N -dimensional Euclidean space	75
7.1	Continuous functions	82
7.2	Bibliographic note	85
	Exercises	85
8	Convex sets, separation theorems, and nonconvex sets in \mathbf{R}^N	91
8.1	Separation theorems	92
8.2	The Shapley-Folkman Theorem	95
8.3	Bibliographic note	97
	Exercises	98
9	The Brouwer Fixed-Point Theorem	99
9.1	Bibliographic note	106
	Exercises	106
C	An economy with bounded production technology and supply and demand functions	109
10	Markets, prices, commodities, and mathematical economic theory	112
10.1	Commodities and prices	112
10.2	The formal structure of pure economic theory	112
10.3	Markets, commodities, and prices	113
10.4	Bibliographic note	114
	Exercise	114

11	Production with bounded-firm technology	115
11.1	Firms and production technology	115
11.2	The form of production technology	116
11.3	Strictly convex production technology	117
11.4	Aggregate supply	120
11.5	Attainable production plans	120
11.6	Bibliographic note	121
	Exercises	121
12	Households	124
12.1	The structure of household consumption sets and preferences	124
12.2	Consumption sets	124
12.3	Representation of \succeq_i : Existence of a continuous utility function	129
12.4	Choice and boundedness of budget sets, $\tilde{B}^i(p)$	131
12.5	Demand behavior under strict convexity	134
12.6	Bibliographic note	137
	Exercises	137
13	A market economy	142
13.1	Firms, profits, and household income	142
13.2	Excess demand and Walras's Law	143
13.3	Bibliographic note	145
	Exercises	145
14	General equilibrium of the market economy with an excess demand function	147
14.1	Existence of equilibrium	147
14.2	Bibliographic note	152
	Exercises	152
	D An economy with unbounded production technology and supply and demand functions	161
15	Theory of production: The unbounded technology case	164
15.1	Unbounded production technology	164
15.2	Boundedness of the attainable set	165
15.3	An artificially bounded supply function	169
15.4	Bibliographic note	172
	Exercises	172
16	Households: The unbounded technology case	174
16.1	Households	174
16.2	Choice in an unbounded budget set	174
16.3	Demand behavior under strict convexity	177
16.4	Bibliographic note	179
	Exercise	179

17	A market economy: The unbounded technology case	180
17.1	Firms and households	180
17.2	Profits	180
17.3	Household income	181
17.4	Excess demand and Walras's Law	181
17.5	Bibliographic note	184
	Exercises	184
18	General equilibrium of the market economy: The unbounded technology case	185
18.1	General equilibrium	185
18.2	An artificially restricted economy	186
18.3	General equilibrium of the unrestricted economy	187
18.4	The Uzawa Equivalence Theorem	190
18.5	Bibliographic note	193
	Exercises	193
E	Welfare economics and the scope of markets	203
19	Pareto efficiency and competitive equilibrium	205
19.1	Pareto efficiency	205
19.2	First Fundamental Theorem of Welfare Economics	206
19.3	Second Fundamental Theorem of Welfare Economics	209
19.4	Corner solutions	214
19.5	Bibliographic note	214
	Exercises	214
20	Time and uncertainty: Futures markets	225
20.1	Introduction	225
20.2	Time: Futures markets	227
20.3	Uncertainty: Arrow-Debreu contingent commodity markets	233
20.4	Uncertainty: Arrow securities markets	238
20.5	Conclusion: The missing markets	241
20.6	Bibliographic note	242
	Exercises	243
F	Bargaining and equilibrium: The core	249
21	The core of a market economy	251
21.1	Bargaining and competition	251
21.2	The core of a pure exchange economy	252
21.3	The competitive equilibrium allocation is in the core	254
21.4	Bibliographic note	255
	Exercise	255

22	Convergence of the core of a large economy	256
22.1	Replication: A large economy	256
22.2	Equal treatment	257
22.3	Core convergence in a large economy	259
22.4	A large economy without replication	263
22.5	Interpreting the core convergence result	267
22.6	Bibliographic note	268
	Exercises	269
G	An economy with supply and demand correspondences	275
23	Mathematics: Analysis of point-to-set mappings	279
23.1	Correspondences	279
23.2	Upper hemicontinuity (also known as upper semicontinuity)	279
23.3	Lower hemicontinuity (also known as lower semicontinuity)	282
23.4	Continuous correspondence	284
23.5	Cartesian product of correspondences	285
23.6	Optimization subject to constraint: Composition of correspondences; the Maximum Theorem	285
23.7	Kakutani Fixed-Point Theorem	287
23.8	Bibliographic note	291
	Exercises	291
24	General equilibrium of the market economy with an excess demand correspondence	293
24.1	General equilibrium with set-valued supply and demand	293
24.2	Production with a (weakly) convex production technology	294
24.3	Households	298
24.4	The market economy	304
24.5	The artificially restricted economy	307
24.6	Existence of competitive equilibrium	308
24.7	Bibliographic note	310
	Exercises	310
25	U-shaped cost curves and concentrated preferences	312
25.1	U-shaped cost curves and concentrated preferences	312
25.2	The nonconvex economy	313
25.3	Artificial convex counterpart to the nonconvex economy	314
25.4	Approximate equilibrium	317
25.5	Bibliographic note	319
	Exercises	320

H	Standing on the shoulders of giants	323
26	Next steps	325
	26.1 Large economies	325
	26.2 Anything goes!	327
	26.3 Regular economies and the determinacy of equilibrium	328
	26.4 General equilibrium with incomplete markets	329
	26.5 Computing general equilibrium	330
	26.6 Bibliographic note	331
27	Summary and conclusion	332
	27.1 Overview and summary	332
	27.2 Bibliographic note	333
	Exercises	334
	<i>Bibliography</i>	335
	<i>Index</i>	341
