Glossary ................................................... xxi  

1 An Introduction ................................. 1  
   Jonathan Mitchell, Andrew Shepherd and Jodie Keane  
   Origins of this book .............................. 1  
   Trends in rural poverty .......................... 2  
   The programme .................................. 8  
   Why value chains? ................................. 10  
   Structural transformation of the agricultural sector ........ 14  
   Summary .......................................... 15  

2 A Methodology for Integrating Developmental Concerns  
   into Value Chain Analysis and Interventions . 21  
   Simon Bolwig, Stefano Ponte, Lone Riisgaard,  
   Andries du Toit and Niels Halberg  
   Introduction ...................................... 21  
   Background to value chain analysis ............. 21  
   The vertical elements of value chain analysis .. 22  
   Expanding the horizontal elements of value chain analysis ... 24  
   A conceptual framework for integrating vertical and  
   horizontal aspects .............................. 29  
   A strategic framework and practical guide for value  
   chain upgrading .................................. 31  
   Summary .......................................... 40  

3 Summaries of the Seven Action Research Projects ........ 47  
   Introduction ...................................... 47
‘Increasing the economic benefits derived by poor rural women producers from the incense sticks (agarbatti) value chain’
(or ‘the incense stick project’) 47
Bhargavi Motukuri, Selim Reza, Suneel Pandey and Kate Schreckenberg

‘Enriching collective action – the fonio value chain in Mali’
(or ‘the fonio project’) 63
Bougouna Sogoba, Alpha Kergna, Jodie Keane and Jonathan Mitchell

‘Upgrading, downgrading and out-grading smallholders in the Vietnamese pangasius catfish value chain’
(or ‘the pangasius project’) 77
Nguyen Tri Khiem, Simon R. Bush and Christopher Coles

‘Unlocking market opportunities for small scale cassava farmers in Tanzania’ (or ‘the cassava project’) 90
Ntengua Mdoe, Khamaldin Mutabazi and Benadette Ndabikunze and Christopher Coles

‘Developing entrepreneurship in value chains of cinnamomum tamala bay leaf: Linking poor producers to markets of essential oils and spices’ (or ‘the bay leaf project’) 102
Dyutiman Choudhary, Brigitte Hoermann, Michael Kollmair and Jonathan Mitchell

‘Analysing the octopus value chain and the implications of certification schemes in the area of Mbour: A case study of Nianing and Pointe Sarene’ (or ‘the octopus project’) 117
Papa Gora Ndiaye, Moustapha Kebe and Jonathan Mitchell

‘Enhancing participation of small-scale producers and labourers in high-value kalamansi chain’ (or ‘the kalamansi project’) 128
Larry Digal, Pedro Tuason and Christopher Coles

4 Working Together – Horizontal Coordination as an Upgrading Strategy 143
Christopher Coles and Jonathan Mitchell

The nature and benefits of horizontal coordination 143
The effectiveness of horizontal coordination in value chain development 149
Barriers to entry into horizontally coordinated organizations (and their implications) 152
Evidence for improvements in poverty, environment and gender outcomes from horizontal coordination 153
Summary 159
5 Going for Win-Win – Upgrading through Vertical Coordination 163
Christopher Coles
The nature and value-chain level impacts of vertical coordination 163
Barriers to entry to vertical coordination (and their implications) 171
Evidence for improvements in poverty, environment and gender outcomes from vertical coordination 173
Summary 175

6 Doing Different Things – Functional Upgrading 179
Christopher Coles and Jonathan Mitchell
Types of functional upgrading and value chain-level impacts 179
Barriers to entry to functional upgrading 184
Evidence for improvements in poverty, environment and gender outcomes from functional upgrading 186
Summary 188

7 Better Quality and Working Smarter – Product and Process Upgrading 191
Christopher Coles and Jonathan Mitchell
Nature of product and process upgrading 192
Outcomes on poverty, environment and gender of product and process upgrading 200
Summary 205

8 Skills Transfer – Inter-chain Upgrading 209
Christopher Coles
The nature and value chain-level impacts of inter-chain upgrading 209
Barriers to entry to inter-chain upgrading (and their implications) 210
Evidence for improvements in poverty, environment and gender outcomes from inter-chain upgrading 212
Choosing chains to meet objectives – Development begins at the planning stage 213
Shifting chains – Is high-value export really the panacea for poor producers? 214
Summary 215

9 Who Runs This Place? The External Enabling Environment for Value Chain Development 217
Kate Schrekenberg and Jonathan Mitchell
Legislative governance (the rules of the game) 217
Judicial governance (implementing the rules) 224
Executive (enabling others to follow the rules) 226
Evidence for improvements in poverty, environment and gender outcomes from changes in the enabling environment 228
Summary 231

10 Conclusions 235

Christopher Coles, Jonathan Mitchell, Marwan Owaygen and Andrew Shepherd

Key findings 236
Synthesis – Incorporating poverty, environment and gender concerns into value chain analysis and development:
Evidence and practice 244
Evaluation of action research projects 256
Implications 257
