KNOWLEDGE INTEGRATION DYNAMICS
Developing Strategic Innovation Capability

Mitsuru Kodama
Nihon University, Japan

Preface vii
About the Author xvii

Chapter 1 The Knowledge Integration Model 1
1 Background Theory and New Frameworks 1
2 The Four Core Frameworks of the Knowledge 4
Integration Process
  2.1 Strategy and management drivers 4
      2.1.1 The creativity view 6
      2.1.2 The dialectic view 7
  2.2 Dynamic human networks 8
  2.3 Knowledge architectural thinking 13
      2.3.1 Vertically integrated architecture 14
      2.3.2 Horizontally integrated architecture 22
      2.3.3 Linkage relationship architecture 29
  2.4 Leadership model 32
3 Implications and Conclusion 37
Chapter 2 A Theoretical Framework for Strategic Innovation Capability

1 Radical Innovation and Strategic Change
2 Strategic Innovation Capability
   2.1 What is strategic innovation?
   2.2 The capability map and the knowledge integration map
   2.3 The strategic innovation loop and strategic innovation capability
3 Conclusion and Topics

Chapter 3 Strategic Innovation in Big Traditional Companies: A Case Study of Broadband Business

1 Introduction
2 Case Study of the NTT Broadband Revolution
   2.1 The ISDN revolution: from phones to multimedia
      2.1.1 Building new organizations from top management members
      2.1.2 Features of MBD strategy and organizational structure
      2.1.3 Strategy integration through the MBD and traditional organizations
      2.1.4 Linking the continuous and incremental change loops
   2.2 The challenge of fiber-optic broadband: more innovation in the strategy innovation loop
      2.2.1 Strategic transformation from ISDN to fiber-optic communication
      2.2.2 Broadband business after the division of NTT
      2.2.3 The strategic innovation loop of fiber-optic business
2.2.4 Inter-domain shift among group companies 91

2.3 Knowledge integration dynamics 94

3 Overview 105

Chapter 4 Knowledge Integration and Innovation in the Consumer Electronics, Communications Device, and Semiconductor Fields 107

1 Digital Consumer Electronics and Communications Device Sectors 107
   1.1 Horizontal specialization model through Western management 109
   1.2 Japanese manufacturers' "knowledge integration model" 110
   1.3 Basic differences between Japanese and Western management 116

2 Semiconductor Business Sector 117
   2.1 The semiconductor industry as a model for horizontal specialization 117
   2.2 Japanese companies' semiconductor business model 119
   2.3 The new phenomenon of the semiconductor business in the 21st century 120

3 Consideration and Discussion 122
   3.1 Boundary conception: The distinctive management drivers of Japanese companies 122
   3.2 Conceptual framework of the creativity view: The theoretical background of the relationship between vertical integration and creativity 125
   3.3 Organizational form 128
       3.3.1 Consumer electronics, communications devices, and semiconductor business sectors 128
4 The Strategic Innovation Capability of Japanese Companies in the Consumer Electronics, Communications Device, and Semiconductor Fields

Chapter 5 The Strategic Innovation Capabilities of Machine Tool Manufacturers: A Case Study of Mitsubishi Heavy Industries Plastic Technology Co., Ltd.

1 The Importance of Manufacturing and New Organizational Strategies

2 A Case Study
   2.1 Injection molding machines
   2.2 Mitsubishi Plastic's product innovation
   2.3 The product architecture of injection molding machines
      2.3.1 Basic structure of injection molding machines
      2.3.2 The product architecture of injection molding machines
   2.4 Future product development and business process strategies: MC & MD
   2.5 The structure of Mitsubishi Plastic's product development
   2.6 Mitsubishi Plastic's new innovation project
   2.7 Mitsubishi Plastic's knowledge integration process
   2.8 Mitsubishi Plastic's strategic innovation capability

3 Summary

Chapter 6 A Co-Evolution Model of the Mobile Phone Business: The Case of Study of NTT DoCoMo

1 Combining Strategic and Incremental Innovation

Chapter 7 Strategic Innovation through a Discontinuous Road Map: The Case Study of Nintendo

1 | Sense of Crisis in the Game Industry and Nintendo’s Surge Forward | 209 |
2 | The Booby Trap of the Semiconductor Scaling Rule | 212 |
3 | Realization of Destructive Architecture — Lateral Thinking in Dead Technology | 214 |
   | 3.1 | Challenge to reduce power consumption | 216 |
   | 3.2 | The idea of reverse product architecture — technology orientation from a market perspective | 218 |
4 | Innovation Based on Nintendo’s Unique Development Framework | 222 |
<p>| 4.1 | Nintendo’s strategic innovation loop | 222 |</p>

5.2 Open innovation versus closed innovation; vertical integration versus horizontal specialization

6 Elements that Asian Companies Have Learned from Japanese Management
   6.1 The creativity view, vertical integration, teamwork, and collaboration
   6.2 The dialectic view, co-creation, and co-evolution

7 Implications and Conclusions
