Interest-Rate Rules in a New Keynesian Framework with Investment
# Table of Contents

List of Figures and Tables 11
List of Symbols 13

I. Introduction 17

II. Monetary policy design and criteria for assessing monetary policy rules 21

1. Monetary policy issues 21
   1.1. The case for rules rather than discretion 23
      1.1.1. Analytical distinction between rules and discretion 23
      1.1.2. The problem of dynamic inconsistency 24
      1.1.3. Advantages of central bank commitment to a monetary policy rule 25
   1.2. Design of monetary policy rules 26
      1.2.1. Rules, instruments and targets 28
      1.2.2. Choice of instruments 30
      1.2.3. Choice of target variables 31

2. Criteria for assessing monetary policy rules 37
   2.1. Operationality/Simplicity 38
   2.2. Local determinacy of rational-expectations equilibrium and monetary policy analysis 41
      2.2.1. An overview 41
      2.2.2. Presenting the criterion 42
      2.2.3. Determinacy and reactions to shocks 43
   2.3. The Taylor principle 45

3. Preliminary summary 49

III. A New Keynesian model with endogenous capital with adjustment costs 51

1. New Keynesian framework: an overview 52
2. Modelling capital and investment 55
3. The model with endogenous capital and adjustment costs 60
3.1. Household utility function and optimality conditions 60
3.2. The "IS sector" 63
3.3. Capital accumulation adjustment costs 64
3.4. Inflation and real wage equations under sticky prices and wages 66
3.5. Interest-rate rule specifications 67
4. Determinacy analysis 68
4.1. Calibration 69
4.2. Determinacy and the Taylor principle: some numerical examples 72
  4.2.1. Active rule 74
  4.2.2. Passive rule 75
  4.2.3. Interest-rate rule response coefficient values and determinacy: a global perspective 77
5. Preliminary summary of results 79

IV. Shock impulse responses 81
1. Some preliminary remarks on the adjustment mechanisms in the system 81
  1.1. Monetary policy unit shock 82
  1.2. Technology unit shock 84
  1.3. Consumption preference unit shock 86
2. Active rule 87
  2.1. The case of inflation-targeting only 87
    2.1.1. Monetary policy unit shock 88
    2.1.2. Technology unit shock 92
    2.1.3. Consumption preference unit shock 95
  2.2. The case of inflation- and output-targeting 98
    2.2.1. Monetary policy unit shock 98
    2.2.2. Technology unit shock 101
    2.2.3. Consumption preference unit shock 104
2.3. The case of inflation- and output-targeting with interest-rate smoothing 107

2.3.1. Monetary policy unit shock 107

2.3.2. Technology unit shock 110

2.3.3. Consumption preference unit shock 113

3. Passive rule 116

3.1. The case of inflation-targeting only 116

3.2. The case of inflation- and output-targeting 116

3.2.1. Monetary policy unit shock 117

3.2.2. Technology unit shock 120

3.2.3. Consumption preference unit shock 123

3.3. The case of inflation- and output-targeting with interest-rate smoothing 126

3.3.1. Monetary policy unit shock 126

3.3.2. Technology unit shock 129

3.3.3. Consumption preference unit shock 132

4. Preliminary summary of results 135

V. Discussion and conclusion

Appendix: Optimising IS-LM model with endogenous investment and capital adjustment costs
