

The Microeconomics of Risk and Information

Richard Watt

palgrave
macmillan

Contents

List of figures	viii
Preface	xi
1 Introduction	1
1.1 Focus of the book	3
1.2 Basic objectives	4
1.3 Content and structure	5
1.4 Some advice	9
Part I Individual decision making under risk	
2 Risk and preferences	15
2.1 Historical antecedents	17
2.2 Expected utility theory	20
2.3 Alternative decision criteria	24
3 Risk aversion	33
3.1 Marschak-Machina triangle	33
3.2 Contingent claims	40
3.3 Measures of risk aversion	49
3.4 Slope of risk aversion	63
4 Applications	69
4.1 Portfolio choice	69
4.2 The demand for insurance	74
4.3 Precautionary savings	87
4.4 Theory of production under risk	96
Part II Risk sharing environments	

5	Perfect information	115
5.1	The contract curve	116
5.2	Constant proportional risk sharing	123
5.3	Increases in aggregate wealth	131
6	Adverse selection	138
6.1	Preliminary comments	138
6.2	Adverse selection without risk	142
6.3	Principal-agent setting	148
7	Moral hazard	173
7.1	Perfect competition	180
7.2	A monopolistic principal	184
Part III Appendices		
A	Mathematical toolkit	191
A.1	The implicit function theorem	192
A.2	Concavity and convexity	195
A.3	Kuhn-Tucker optimisation	201
A.4	Probability and lotteries	206
B	A primer on consumer theory	209
B.1	The basic microeconomic problem	209
B.2	Utility maximisation under certainty	210
	Index	219
