<i>List of Tables and Figures</i>	x
<i>Preface</i>	xi
PART I FINANCIAL RISKS WHICH KEPT PILING UP	
1 The World's New Normal Economic System	3
Five forces promoting the next economic landscape	3
Cause and effect	6
The <i>new normal</i> defined	9
A historical precedent: the <i>new normal</i> at the end of World War I	12
Living at the edge of chaos	14
The importance of knowing the 'normal' conditions	17
2 The Newly Poor	22
Poor people's recipe: falling deeper into debt	22
Property-owning democracies versus debt-laden democracies	24
Debt operates like a tax	27
'I will be gone/you will be gone'	29
Runaway public liabilities and the day of reckoning	32
Nobody is in charge of debt policy	35
Wealth in western nations dropped like a bribed boxer	38
3 The Salient Problem is Rights Without Responsibilities	41
The many heads of a debt hydra	41
What is meant by rights without responsibilities?	44
Entitlements	46
Pensions and the <i>new normal</i>	50
The middle classes' broken dreams	53
What may follow the debt hydra?	56
PART II LOOSE MONETARY AND FISCAL POLICIES LEAD TO THE DESTRUCTION OF WEALTH	
4 Japanification	61
Japanification defined	61
Japanification's after-effect: precarious public finances	64
Money thrown at the problem brings nearer the next big crisis	67
Financial discipline requires more than leadership	70
Governments, central banks and the 2010 Jackson Hole Symposium	72
Correlation risk: Greece/Bear Stearns and X/Lehman	75

5	Conventional and Unconventional Weapons in a Central Bank's Arsenal	79
	<i>Souk</i> means both market and chaos	79
	Black swans and the need for a new economic theory	82
	Price stability and the central bank	84
	The wall of liquidity	87
	Quantitative easing	90
	QE and competitive currency devaluations	92
	'Bad banks', the Volcker rule and living wills	94
6	Fiscal Policies, Spending Policies and Conflicting Aims	99
	The government takes its money out of its citizens' pockets	99
	The best solution is fiscal consolidation	102
	Impact of fiscal policies on the financial system	105
	Current account deficits	108
	Sovereign debt and its consequences for the banking industry	111
	Financial stability is one of democracy's pillars	114
7	Restructuring Sovereign Balance Sheets	117
	Deleveraging	117
	Deflationary or inflationary risk?	120
	Putting the carriage before the horses	122
	Austerity is not that bad, after all	125
	Budget cuts and B/S restructuring	128
	'Long-haired' 'solutions' and monetary illusions	131
PART III EUROLAND'S FINANCIAL INTEGRATION AND SOVEREIGN RISK		
8	Woes of Euroland's Financial Integration	137
	Strong core and a weak periphery	137
	Financial stability and economic integration	139
	One-size-fits-all monetary policies are a dangerous game	142
	The aftermath of asymmetries on the euro	145
	Is a weak euro or a strong euro the better choice?	148
	The message by credit default swaps should not be ignored	151
9	Sovereign Risk: Case Study on Greece	154
	The Greek crisis is just the first episode	154
	Wall Street helped the big spenders to hide debt	157
	Textbook economics have no prescription for the current crisis	160
	Events which led to the rescue	162
	Going on strike against one's own interest	165
	As with swallows, EU money alone will not bring spring	168
10	Germany, France, Britain, Ireland and 'Club Med'	171
	The German economy	171
	The French economy	175

The British economy	177
The Irish economy	180
Ireland, Iceland, Portugal and the uncle of Dubai	183
Down the Club Med way: Italy and Spain	187
PART IV THE NEW NORMAL'S EFFECT ON THE WESTERN ECONOMY	
11 The North Atlantic Similarities are Greater than you Think	193
Tales of the unexpected	193
Big deficits resemble a classic tragedy	196
QE2: poison or cure?	199
What went wrong with monetary policy and the bank rescues?	201
American middle class and missing employment opportunities	205
The Dodd-Frank Wall Street Reform and Consumer Protection Act	208
12 The EU's Banking Industry and its Stress Testing	212
Profile of large and complex banking groups	212
Ultimately economies advance because their institutions are strong	214
Banks do not know the risks they take with derivatives and their IT is unhelpful	217
Stress tests permit crossing the river while feeling the stones	221
How different experts evaluated the stress tests by the Committee of European Banking Supervisors	225
November 2010: four months after the test results have been released	228
13 The Global Systemic Risk has been Programmed for 2014	232
Not only the economy, but also democracy is at a crossroads	232
The way to global financial stability is uncharted	234
Sovereign risks and contagion effects	237
European banks, American banks and the fight for long-term funding	241
The former 'poor' are better off than the former 'rich'	245
Financial seismology and the slow-motion train wreck	248
<i>Epilog</i>	252
<i>Notes</i>	255
<i>Index</i>	269
