Contents

List of tables	XII
List of figures	XVII
List of abbreviations.....	XXI
1 Introduction	1
2 Methodology and data basis	4
2.1 Concepts for measuring implicit pension debt.....	4
2.2 Assessing pension liabilities: The methodology of generational accounting.....	10
2.2.1 Generational accounting of public pension schemes.....	11
2.2.2 Measuring accrued-to-date liabilities – the Freiburg model	16
2.2.2.1 The methodology of the Freiburg model	16
2.2.2.2 Measurement concepts of accrued-to-date liabilities	17
2.3 Data and general assumptions	22
2.3.1 Necessary data	23
2.3.1.1 Population	23
2.3.1.2 Age-sex-specific pension benefits	24
2.3.1.3 Budget data	24
2.3.1.4 Characteristics of the pension scheme	24
2.3.2 General assumptions	25
2.3.2.1 Growth and discount rate.....	25
2.3.2.2 Fertility, mortality and migration	26
2.3.3 Case study for calculating age-sex-specific pension profiles	26
2.4 Limitations and possible extensions of the Freiburg model	32
2.5 The rationale of the supplementary table.....	39
3 Accrued-to-date liabilities of 19 EU countries	43
3.1 AT – Austria	44
3.1.1 The demographic development in Austria	44
3.1.2 The Austrian pension system.....	46
3.1.2.1 The principles of the Austrian pension system	46
3.1.2.2 Recent reforms of the Austrian pension system.....	47
3.1.3 Measuring the Austrian accrued-to-date pension liabilities.....	49
3.2 BG – Bulgaria.....	53
3.2.1 The demographic development in Bulgaria.....	53
3.2.2 The Bulgarian pension system.....	55
3.2.2.1 The principles of the Bulgarian pension system.....	55
3.2.2.2 Recent reforms of the Bulgarian pension system.....	55
3.2.3 Measuring the Bulgarian accrued-to-date pension liabilities	56

Contents

3.3	CZ – Czech Republic.....	60
3.3.1	The demographic development in the Czech Republic.....	60
3.3.2	The Czech pension system.....	62
3.3.2.1	The principles of the Czech pension system.....	62
3.3.2.2	Recent reforms of the Czech pension system.....	63
3.3.3	Measuring the Czech accrued-to-date pension liabilities	63
3.4	DE – Germany.....	67
3.4.1	The demographic development in Germany.....	67
3.4.2	The German pension system.....	71
3.4.2.1	The principles of the German pension system.....	71
3.4.2.2	Recent reforms of the German pension system.....	72
3.4.2.3	Measuring the German accrued-to-date pension liabilities.....	73
3.5	ES – Spain.....	77
3.5.1	The demographic development in Spain.....	77
3.5.2	The Spanish pension system.....	79
3.5.2.1	The principles of the Spanish pension system	79
3.5.2.2	Recent reforms of the Spanish pension system.....	80
3.5.3	Measuring the Spanish accrued-to-date pension liabilities.....	80
3.6	FI – Finland	83
3.6.1	The demographic development in Finland	83
3.6.2	The Finnish pension system	85
3.6.2.1	The principles of the Finnish pension system	85
3.6.2.2	Recent reforms of the Finnish pension system	87
3.6.3	Measuring the Finnish accrued-to-date pension liabilities.....	88
3.7	FR – France	92
3.7.1	The demographic development in France.....	92
3.7.2	The French pension system.....	94
3.7.2.1	The principles of the French pension system	94
3.7.2.2	Recent reforms of the French pension system.....	95
3.7.3	Measuring the French accrued-to-date pension liabilities.....	96
3.8	GR – Greece.....	100
3.8.1	The demographic development in Greece.....	100
3.8.2	The Greek pension system.....	102
3.8.2.1	The principles of the Greek pension system	102
3.8.2.2	Recent reforms of the Greek pension system.....	102
3.8.3	Measuring the Greek accrued-to-date pension liabilities.....	103

3.9	HU – Hungary	106
3.9.1	The demographic development in Hungary	106
3.9.2	The Hungarian pension system.....	108
3.9.2.1	The principles of the Hungarian pension system.....	108
3.9.2.2	Recent reforms of the Hungarian pension system	109
3.9.3	Measuring the Hungarian accrued-to-date pension liabilities	109
3.10	IT – Italy	113
3.10.1	The demographic development in Italy.....	113
3.10.2	The Italian pension system	115
3.10.2.1	The principles of the Italian pension system.....	115
3.10.2.2	Recent reforms of the Italian pension system	116
3.10.3	Measuring the Italian accrued-to-date pension liabilities	117
3.11	LT – Lithuania	121
3.11.1	The demographic development in Lithuania	121
3.11.2	The Lithuanian pension system	123
3.11.2.1	The principles of the Lithuanian pension system.....	123
3.11.2.2	Recent reforms of the Lithuanian pension system	124
3.11.3	Measuring the Lithuanian accrued-to-date pension liabilities	125
3.12	LV – Latvia	128
3.12.1	The demographic development in Latvia	128
3.12.2	The Latvian pension system	130
3.12.2.1	The principles of the Latvian pension system	130
3.12.2.2	Recent reforms of the Latvian pension system	131
3.12.3	Measuring the Latvian accrued-to-date pension liabilities.....	131
3.13	MT – Malta	135
3.13.1	The demographic development in Malta	135
3.13.2	The Maltese pension system	137
3.13.2.1	The principles of the Maltese pension system	137
3.13.2.2	Recent reforms of the Maltese pension system	138
3.13.3	Measuring the Maltese accrued-to-date pension liabilities	139
3.14	NL – Netherlands	143
3.14.1	The demographic development in the Netherlands	143
3.14.2	The Dutch pension system	145
3.14.2.1	The principles of the Dutch pension system.....	145
3.14.2.2	Recent reforms of the Dutch pension system	146
3.14.3	Measuring the Dutch accrued-to-date pension liabilities	146

Contents

3.15	PL – Poland	150
3.15.1	The demographic development in Poland	150
3.15.2	The Polish pension system	152
3.15.2.1	The principles of the Polish pension system	152
3.15.2.2	Recent reforms of the Polish pension system	153
3.15.3	Measuring the Polish accrued-to-date pension liabilities	154
3.16	PT – Portugal	159
3.16.1	The demographic development in Portugal	159
3.16.2	The Portuguese pension system	161
3.16.2.1	The principles of the Portuguese pension system	161
3.16.2.2	Recent reforms of the Portuguese pension system	162
3.16.3	Measuring the Portuguese accrued-to-date pension liabilities	164
3.17	SE – Sweden	168
3.17.1	The demographic development in Sweden	168
3.17.2	The Swedish pension system	170
3.17.2.1	The principles of the Swedish pension system	170
3.17.2.2	Recent reforms of the Swedish pension system	171
3.17.3	Measuring the Swedish accrued-to-date pension liabilities	172
3.18	SK – Slovakia	175
3.18.1	The demographic development in Slovakia	175
3.18.2	The Slovakian pension system	177
3.18.2.1	The principles of the Slovakian pension system	177
3.18.2.2	Recent reforms of the Slovakian pension system	178
3.18.3	Measuring the Slovakian accrued-to-date pension liabilities	180
3.19	UK – United Kingdom	183
3.19.1	The demographic development in the UK	183
3.19.2	The UK pension system	185
3.19.2.1	The principles of the UK pension system	185
3.19.2.2	Recent reforms of the UK pension system	186
3.19.3	Measuring the UK accrued-to-date pension liabilities	186
3.20	Cross-country comparison	188
4	Open-system net liabilities of four selected countries	200
4.1	DE – Germany	202
4.1.1	Future demographic development	202
4.1.2	Results	206
4.2	LT – Lithuania	211
4.2.1	Future demographic development	211
4.2.2	Results	214

4.3	NL – Netherlands	218
4.3.1	Future demographic development	218
4.3.2	Results	221
4.4	SE – Sweden	224
4.4.1	Future demographic development	224
4.4.2	Results	227
4.5	Cross-country comparison of open-system net liabilities	231
4.5.1	Comparison of future demographic developments.....	231
4.5.2	Sustainability of social security pension schemes.....	235
4.6	Cross-country comparison of accrued-to-date and open-system net liabilities.....	239
5	Conclusion and outlook.....	243
