CONTENTS

Preface .................................................. xxi
Acknowledgments ..................................... xxxi

CHAPTER 1  Manufacturing Planning and Control ..................... 1
The MPC System Defined .................................. 2
Typical MPC Support Activities ......................... 2
An MPC System Framework .............................. 3
MPC System Activities ................................... 4
Matching the MPC System with the Needs of the Firm ...... 7
An MPC Classification Schema ............................ 8
Evolution of the MPC System ............................ 9
The Changing Competitive World ....................... 10
Reacting to the Changes .................................. 11
Concluding Principles ................................... 11
APICS/CPIM Certification Questions ..................... 12

CHAPTER 2  Enterprise Resource Planning (ERP) ..................... 15
What Is ERP? ........................................... 16
Consistent Numbers ..................................... 16
Software Imperatives ..................................... 17
Routine Decision Making ............................... 18
Choosing ERP Software .................................. 18
How ERP Connects the Functional Units .................. 19
Finance ................................................. 20
Manufacturing and Logistics ............................ 21
Sales and Marketing ..................................... 21
Human Resources ....................................... 21
Customized Software .................................... 22
Data Integration ........................................ 22
## How Manufacturing Planning and Control (MPC) Fits within ERP

- Simplified Example ........................................ 23
- Supply Chain Planning with mySAP SCM ............... 24
- Supply Chain Execution with mySAP SCM ............ 25
- Supply Chain Collaboration with mySAP SCM ....... 26
- Supply Chain Coordination with mySAP SCM ....... 27

## Performance Metrics to Evaluate Integrated System Effectiveness

- The “Functional Silo” Approach ......................... 28
- Integrated Supply Chain Metrics ...................... 29
- Calculating the Cash-to-Cash Time .................... 32

## What Is the Experience with ERP?

- Eli Lilly and Company—Operational Standards for Manufacturing Excellence ...... 34

## Concluding Principles

- APICS/CPIM Certification Questions .................. 38

### CHAPTER 3 Demand Management ........................................ 45

- Demand Management in MPC Systems ............... 46
- Demand Management and the MPC Environment ........ 48
  - The Make-to-Stock (MTS) Environment ............... 49
  - The Assemble-to-Order (ATO) Environment .......... 50
  - The Make (Engineer)-to-Order (MTO) Environment .. 52
- Communicating with Other MPC Modules and Customers .. 53
  - Sales and Operations Planning ...................... 53
  - Master Production Scheduling ..................... 54
  - Dealing with Customers on a Day-to-Day Basis ..... 55
- Information Use in Demand Management ............... 56
  - Make-to-Knowledge .................................. 57
  - Data Capture and Monitoring ...................... 58
  - Customer Relationship Management ............... 58
  - Outbound Product Flow ............................. 59
- Managing Demand .......................................... 59
  - Organizing for Demand Management ............... 60
  - Monitoring the Demand Management Systems ..... 61
  - Balancing Supply and Demand ..................... 62
CHAPTER 4

**Forecasting** ........................................... 75

Providing Appropriate Forecast Information .................. 75
- Forecasting for Strategic Business Planning ............. 77
- Forecasting for Sales and Operations Planning .......... 77
- Forecasting for Master Production Scheduling and Control ............ 78

Regression Analysis and Cyclic Decomposition Techniques ...... 79
- Example ............................................. 80
- Decomposition of a Time Series .......................... 83
- Additive Seasonal Variation ............................... 84
- Multiplicative Seasonal Variation .......................... 84
- Seasonal Factor (or Index) ................................ 85
- Example ............................................. 85
- Example ............................................. 86
- Decomposition Using Least Squares Regression .......... 87
- Error Range .......................................... 90

Short-Term Forecasting Techniques .............................. 91
- Moving-Average Forecasting ................................. 92
- Exponential Smoothing Forecasting ......................... 94
- Evaluating Forecasts ..................................... 96

Using the Forecasts .......................................... 99
- Considerations for Aggregating Forecasts ................. 99
- Pyramid Forecasting ..................................... 101
- Incorporating External Information ......................... 103

Concluding Principles ........................................ 104
APICS/CPIM Certification Questions .......................... 105

Case Study: Forecasting at Ross Products .................... 111

CHAPTER 5

**Sales and Operations Planning** ........................... 115

Sales and Operations Planning in the Firm .................. 115
- Sales and Operations Planning Fundamentals ........... 116
- Sales and Operations Planning and Management .......... 117
Contents

Operations Planning and MPC Systems ........................................ 119
Payoffs ............................................................................. 121
The Sales and Operations Planning Process ............................. 122
The Monthly Sales and Operations Planning Process ......... 122
Sales and Operations Planning Displays ................................. 125
The Basic Trade-Offs .......................................................... 129
Economic Evaluation of Alternative Plans ............................... 133
The New Management Obligations ......................................... 136
Top Management Role .......................................................... 136
Functional Roles ................................................................. 137
Integrating Strategic Planning ............................................... 141
Controlling the Operations Plan .............................................. 142
Concluding Principles .......................................................... 142
References ......................................................................... 143
APICS/CPIM Certification Questions ..................................... 143
Case Study: Delta Manufacturing Company’s Integrated Sales
and Operations Planning Process ............................................ 148

CHAPTER 6 Advanced Sales and Operations Planning ................. 161
Mathematical Programming Approaches ................................. 161
Linear Programming (LP) ....................................................... 162
Mixed Integer Programming .................................................. 163
Company Example: Lawn King Inc ........................................ 166
Company Background .......................................................... 166
Deciding on a Planning Model ............................................... 167
The Linear Programming Model ............................................. 168
Developing the Planning Parameters ...................................... 169
Solving the Linear Programming Model and Understanding
the Results ............................................................................. 173
Sales and Operations Planning Issues ..................................... 175
Using Microsoft Excel Solver ............................................... 176
Concluding Principles .......................................................... 179
APICS/CPIM Certification Questions ..................................... 180

CHAPTER 7 Master Production Scheduling .............................. 183
The Master Production Scheduling (MPS) Activity ................... 183
The MPS Is a Statement of Future Output .............................. 184
The Business Environment for the MPS ................................. 185
| Linkages to Other Company Activities | 187 |
| Master Production Scheduling Techniques | 189 |
| The Time-Phased Record | 189 |
| Rolling through Time | 190 |
| Order Promising and Available-to-Promise (ATP) | 192 |
| Planning in an Assemble-to-Order Environment | 196 |
| Managing Using a Two-Level MPS | 199 |
| Master Production Schedule Stability | 202 |
| Freezing and Time Fencing | 203 |
| Managing the MPS | 204 |
| The Overstated MPS | 204 |
| Concluding Principles | 205 |
| APICS/CPIM Certification Questions | 205 |
| Case Study: Customer Order Promising at Kirk Motors Ltd. | 209 |
| Case Study: Hill-Rom's Use of Planning Bills of Materials. | 211 |

**CHAPTER 8 Material Requirements Planning** | 215 |

Material Requirements Planning in Manufacturing
- Planning and Control | 215 |
- Record Processing | 217 |
| The Basic MRP Record | 217 |
| Linking the MRP Records | 227 |
- Technical Issues | 229 |
| Processing Frequency | 230 |
| Bucketless Systems | 231 |
| Lot Sizing | 231 |
| Safety Stock and Safety Lead Time | 232 |
| Low-Level Coding | 233 |
| Pegging | 234 |
| Firm Planned Orders | 234 |
| Service Parts | 235 |
| Planning Horizon | 235 |
| Scheduled Receipts versus Planned Order Releases | 235 |
- Using the MRP System | 236 |
| The MRP Planner | 236 |
| Exception Codes | 238 |
| Bottom-up Replanning | 239 |
| An MRP System Output | 241 |
CHAPTER 11 Production Activity Control ............................................. 317

A Framework for Production Activity Control ................................ 317

MPC System Linkages ..................................................................... 318
The Linkages between MRP and PAC .......................................... 319
Just-in-Time Effect on PAC ................................................................. 319
The Company Environment .............................................................. 320

Production Activity Control Techniques ........................................ 321

Basic Shop-Floor Control Concepts ............................................. 321
Lead-Time Management ............................................................... 324
Gantt Charts ................................................................................ 325
Priority Sequencing Rules .............................................................. 325
Theory of Constraints (TOC) Systems .......................................... 327
Vendor Scheduling and Follow-up ................................................. 339
The Internet and Vendor Scheduling ............................................. 340

Concluding Principles ................................................................. 341

APICS/CPIM Certification Questions ............................................. 341
Case Study: Theory of Constraints (TOC) Scheduling
at TOSOH .................................................................................... 344

CHAPTER 12 Advanced Scheduling ..................................................... 349

Basic Scheduling Research .............................................................. 349
The One-Machine Case ................................................................. 350
The Two-Machine Case ................................................................. 351
Contents

Dispatching Approaches ........................................... 352
Sequencing Rules ............................................... 352
Advanced Procedures ............................................. 355
Due Date-Setting Procedures ................................. 355
Dynamic Due Dates ............................................. 358
Labor-Limited Systems ......................................... 360
Group Scheduling and Transfer Batches .................. 362
Concluding Principles ........................................... 364
APICS/CPIM Certification Questions ....................... 365

CHAPTER 13 Just-in-Time .................................................. 367
JIT in Manufacturing Planning and Control ............. 367
Major Elements of Just-in-Time ............................... 368
JIT’s Impact on Manufacturing Planning and Control ... 370
The Hidden Factory ............................................. 371
JIT Building Blocks in MPC ..................................... 372
A JIT Example ..................................................... 374
Leveling the Production ......................................... 376
Pull System Introduction ....................................... 379
Product Design .................................................. 380
Process Design .................................................. 382
Bill of Materials Implications ................................. 384
JIT Applications .................................................. 385
Single-Card Kanban ............................................. 385
Toyota ............................................................. 386
Nonrepetitive JIT ................................................ 389
A Service-Enhanced View of Manufacturing ............ 389
Flexible Systems ............................................... 390
Simplified Systems and Routine Execution ............... 390
Joint-Firm JIT .................................................... 391
The Basics ...................................................... 391
Tightly Coupled JIT Supply .................................... 392
Less Tightly Coupled JIT Supply ............................ 393
JIT Coordination through Hubs .............................. 393
Lessons .......................................................... 394
JIT Software .................................................... 394
The MRP-JIT Separation ....................................... 395
JIT Planning and Execution ................................... 395

**CHAPTER 16 Order Point Inventory Control Methods** | 469

| Basic Concepts | 470 |
| Independent- versus Dependent-Demand Items | 470 |
| Functions of Inventory | 471 |
| Management Issues | 472 |
| Routine Inventory Decisions | 472 |
| Determining Inventory System Performance | 473 |
| Implementing Changes in Managing Inventory | 474 |
| Inventory-Related Costs | 474 |
| Order Preparation Costs | 475 |
| Inventory Carrying Costs | 475 |
| Shortage and Customer Service Costs | 476 |
| Incremental Inventory Costs | 476 |
| An Example Cost Trade-Off | 477 |
| Economic Order Quantity Model | 478 |
| Determining the EOQ | 479 |
| Order Timing Decisions | 481 |
| Using Safety Stock for Uncertainty | 481 |
| The Introduction of Safety Stock | 482 |
| Continuous Distributions | 485 |
