Nanotechnology and Sustainable Development

Claire Auplat
## Contents

List of Figures ix  
Acknowledgments xi  
Introduction xiii

### PART I
Nano, the Next Dimension of Sustainable Development

1 Background and Road Map 3  
2 General Philosophy of the Book 12

### PART II
Indicators of Nanotechnology Entrepreneurship

3 Context and Definitions 21  
4 R&D Architecture 23  
5 Research Centers and Infrastructure 34  
6 Nanorelated Patent Activities 37  
7 Nanoproducts Reaching the Market 44  
8 Summary 49

### PART III
Nanodevelopment and Regulatory Practices

9 Areas of Development 53
Contents

10 Initial Positive Regulation 58
11 Initial Restrictive Regulation 65
12 Regulatory Frameworks and Exogenous Factors 67
13 Sustainable Development and Nanobased Business Activities 70

PART IV
Innovative Practices and Nanotechnology Institutional Emergence

14 Introducing the Case of the ETC Group 75
15 Theoretical Background 78
16 Methodology 81
17 Circumstances and Practices 83
18 Findings 97

PART V
New Institutionalization Processes: Risk Management and Public Engagement

19 A Chronology of Nanotechnology Institutional Emergence 103
20 Risk Management and Institutional Emergence 109
21 A Case Study of Public Engagement 112
22 Interpretation and Findings 117

PART VI
Towards A New Form of Technological Democracy

23 Sustainable Development and New Governance Options for New Technologies 125
24 Governance and Norm 131
Contents

25 Interpreting Change 141
26 Conclusion 144

APPENDICES

Nanotechnology and Sustainable Development Milestones 149

Chronology of Nanotechnology Involvement by the ETC Group: 2001–2007 153
