Introduction: Economics between Science and 'Non-Science' in the Current Crisis of
the Capitalist System ......................................................................................... 1

PART ONE

TOWARDS A CRITIQUE OF BASIC ECONOMIC CATEGORIES

1 Economic Theory from Utopian Socialism to Marx ...................... 25
   Before Marx ................................................................................................. 25
   The Contributions of the Socialist School ............................... 27
   The Mystifications of Political Economy according to Marx .... 28

2 The Production Process ................................................................. 31
   Capitalist Production and the Marxian Theory of Value .......................... 31
   Surplus Labour / Surplus Value ......................................................... 37
   Social Classes .................................................................................. 44
   The Usefulness of the Marxian Analysis in the Current
   Context ............................................................................................. 46

PART TWO

CATEGORIES AND DYNAMICS OF THE CAPITALIST SYSTEM AND ITS CRISIS

3 The Basics of National Accounting ........................................... 53
   Marxian Categories and their Statistical Translations ............. 53
   Limits of Conventional Neoclassical Economic Concepts...... 55
   The Centrality of the Debate on Productive and
   Unproductive Labour ........................................................................... 56
   National Income Accounting ............................................................ 59
   Economic Operators ............................................................................. 60
   GNP and GDP .................................................................................... 61
   Investment as a Central Category of the Capitalist System ....... 63
   Productive and Unproductive Investment ...................................... 65
4 A Critique of National Accounting
Some Problems Posed by National Accounting 67
Marxism and the System of National Accounting 70

PART THREE

A CRITIQUE OF ECONOMICS AS APPLIED TO THE
STRUCTURE OF MANAGEMENT: THE ENTERPRISE
SYSTEM AND THE PUBLIC ADMINISTRATION SYSTEM

5 A Critical Theory of the Enterprise
Business Models and the System of Development 75
Individual Aspects and Economic Determination
  of Self-Financing 81
Entrepreneurial Dynamics, Values and Valuations 81
Privatizing to Tackle the Depreciation of Capital 83
Enterprise Value 85
The Theory of Value Creation 86
The Evaluation of the Enterprise 87

6 The Enterprise and the Microeconomics of
Socialism
The Basic Rules of Operation 89
The Double Character of the Process of Socialist
Enterprise Governance 92
An Analysis of the Behaviour of the Socialist Enterprise 92
The Process of Public Management 93
The Impact of Changes on State Participation 94

7 Socialist Public Administration
The Evolution of the Conceptual Foundations of Public
Administration 95
Reform Processes in Public Management for Socialist
Construction 96
The Necessity of Establishing Monitoring Systems
and Indicators 101
The Means and Mechanisms for the Relations between
the State and Economic Policy 102
CONTENTS

PART FOUR
A CRITIQUE OF ECONOMICS AS APPLIED TO ECONOMIC SYSTEMS: REGULATION AND PLANNING

8 A Critique of the Theory of Hegemonic Liberalism
   and the Paradigms of Financialization .......................... 109
   Which Liberalism? Which Market Economy? Which
   Globalization? ................................................................ 109
   The Financialization of Economics .................................. 112

9 The Objectives of the Socialist Economic Model ............... 115
   The Transition to Socialism: Different Approaches ............ 115
   Changes in Socialist Economic Models ............................ 116
   Special Features of Some Economic Planning Models ....... 118
   The Socialist Economy and the Capitalist Economy ......... 118
   The Model of Centralized and Decentralized Planning ....... 124
   The Reformed Model .................................................. 125
   The Flexible Dual Model .............................................. 126

PART FIVE
A CRITIQUE OF ECONOMICS AS APPLIED TO THE WORLD SYSTEM: OPEN ECONOMY AND IMPERIALISM

10 International Trade and Imperialism ............................... 129
   Long Cycles and the Internationalization of Markets .......... 129
   The Role of International Trade .................................... 134
   A Critique of the Theory of International Specialization
   through Trade ............................................................ 137

11 International Economic Relations from the
   Point of View of the Theory of Imperialism ..................... 139
   Marx's Approach ....................................................... 139
   Formation of Financial Capital 'Kf' .............................. 140
   Lenin's Theory of Imperialism ....................................... 141
   The U.S. as an Imperialist Economy .............................. 145
   Economic Imperialism ................................................ 146
Strategies of Economic Imperialism ............................................. 149
Productive Chains ................................................................. 149
International Zones ............................................................... 150
Patents ...................................................................................... 151
Not Only the US; the Europole in Global Competition ............. 153

12 Imperialism and International Trade in Action ..................... 159
The North-South, but also the East-West Conflict ................. 159
Unequal and Combined Development .................................... 162
Neoliberalism and Unequal Development, even in
Mature Capitalist Countries ..................................................... 168
Imperialism and Financialization in the Current
Systemic Crisis ........................................................................ 169
The Productive Fall-Out of Global Competition .................. 169
Systemic Crisis and the Use of Keynesian Variants .............. 172
U.S. Military Imperialism and the Economy:
the Military-Industrial Complex .......................................... 176
The Role of the War Economy ................................................. 176
The Transnational Factors of the Military Economy ............. 180

PART SIX

SCENARIOS FROM THE SYSTEMIC CRISIS AND
THE VALIDITY OF MARX’S SCIENTIFIC ANALYSIS
FOR THE CRITIQUE OF APPLIED ECONOMICS

13 The Post-Fordist Paradigm and the New
Industrial Revolution .............................................................. 185
On Class Power ........................................................................ 185
How does the Industrial Revolution continue? ...................... 187
The Information Revolution or Third Industrial
Revolution .................................................................................. 190
Fordist Enterprises and the Knowledge Economy ............... 193

14 Socio-Productive Configuration of the
Knowledge Economy .............................................................. 197
The Knowledge Economy in a Society that Manages
Communications ...................................................................... 197
Society and Immaterial Processes in Knowledge
Economies: A Marxist Approach .......................................... 201
CONTENTS

The Value of Knowledge or Value Originated by Knowledge ........................................... 205

15 The Dynamics and Implementation of Economic Policies in the Global Competition ........................................... 209
     The System of International Political-Economic Dominance ........................................... 209
     The Market of Global Financial Capital ................................................................. 213
     Tools for 'Economic Interdependence', i.e., Strategies to Enforce Dependency in Global Competition ........................................... 214
     Structural Adjustment Programs (SAPs) as Political Strategies of Neoliberal Globalization ........................................... 223
     Goals, Measures and Interventions through the SAP ........................................... 223
     Monetary Policy ................................................................. 225
     Consequences of the Application of Neoliberal Policies ........................................... 227

16 The New Composition of the World of Labour and the Construction of an Anti-capitalist Social Bloc ........................................... 235
     The Modern Proletariat in the New Capital-Labour Contradiction ........................................... 235
     Structural Unemployment and Precariousness as a Characteristic of the Post-Fordist System ........................................... 239
     Inside the Crisis of the System: Pulling Together the Threads of the Capital-Labour Conflict at the International Dimension ........................................... 243

PART SEVEN

CAPITAL AGAINST NATURE

17 How Capital Destroys Humanity ........................................... 251
     An 'Unnatural' Globalization of Capital ................................................................. 251
     The Consumer Society and Quantitative Development ........................................... 254

18 Market 'Sustainable Development' in the Dynamics of the Quantitative Development of Capital ........................................... 259
     What is Sustainable Development? How, Why and for Whom? ........................................... 259
     The Limits of a Growth Without Progress, Without Self-Determined Sustainable Development ........................................... 261
19 Capital Destroys and then Measures ........................................... 265
   The Cursed GDP .................................................................. 265
   The So-Called Alternative Indicators and Environmental
   Laws. But What “Green Perspective”? .................................. 267
   Non-Alternative Macroeconomic Indicators ......................... 267
   Statistical Indicators for Measuring Environmental Impact.. 269
   Environmental Laws, Monitoring Tools for Management
   Analyses............................................................................. 272

20 ‘Clean’ Energies of Capitalism: Agro-Fuels
   and Planned Crimes Against Humanity............................... 279
   Producing Energy from Food: The Monstrosity of Growth .. 279
   Examples of Leadership and Anti-Leadership.................... 282

21 Brief Conclusions: The Struggles of Grassroots
   Movements and an Economic Socio-Ecological Political
   Theory for a Development Outside the Market................... 285

PART EIGHT
CURRENT TRENDS: FROM QUANTITATIVE GROWTH
TO THE STRUCTURAL AND SYSTEMIC CRISIS
OF CAPITALIST PRODUCTION

22 Capitalist Accumulation and its Crises............................... 291
   The Concept of Crisis...................................................... 291
   Schools of Thought on the Theory of Crisis....................... 292
   The Counteroffensive of Capital....................................... 294

23 The Economies’ Cyclical Behavior After WWII ................. 297
   How Do Crises of Underconsumption and
   Overproduction Arise?...................................................... 297
   Cycles and Economic Crises ............................................. 297
   The International Character of the Capitalist Cycle during
   the 1970s and Early 1980s............................................... 301
   The Role of Foreign Trade in the Transmission
   of the Cycles.................................................................. 302
   Dependence on Raw Materials, Monetary-Financial
   Relationship and the Transmission of the Cycle.............. 303
   The Economic Cycle of the 1980s, Macroeconomic Policy
   and New Technological Paradigms................................. 306
24 An Attempt to Overcome the Structural and Systemic Crisis: The Solution is a Radical Alternative........ 309
Some Considerations and Interpretations of Neoliberal Globalization .............................................. 309
Globalization as an Objective Process .................................................. 312
Globalization as a Subjective Phenomenon: The Political Project of Neoliberal Globalization turns into Global Competition............................................................... 314
The Proof that Global Competition is the Current Stage of Imperialism .......................................... 316
Aspects of the Current World Economic and Financial Scenario in the Face of the Globalization Myth:
The Example of Pension Funds ........................................ 322
The Relevance of Structural and Systemic Crises ................. 324
The Radical Alternative Derives from Those Who Do Not and Cannot Pay for the Crisis ............... 334

Bibliography .............................................................................................................. 339
Index .......................................................................................................................... 369
