Introduction xv

1 A Prototype Model of the Producer-Consumer Household 1
   1.1 A model of family firm or the firm sector of a producer-consumer household 2
   1.2 A model of worker-consumer household or the household sector of a producer-consumer household 5
   1.3 A prototype model of producer-consumer household with consumable output 12
Supplement 1: The Equivalence of the Elasticity of the Real Supply Wage Rate with Respect to the Consumption of Goods to the Reciprocal of the Robinsonian Elasticity of Substitution 26
Supplement 2: A Change in the Marginal Level of Family Welfare Is Related to the Change in Its Level Itself 28

2 The Behavioral Transformation of Producer-Consumer Households through the Development of Competitive Markets 30
   2.1 Autarky 31
   2.2 The emergence of competitive markets for output and capital service 46
   2.3 Consequences of the competitive market for labor 75
   2.4 The inevitable production of household goods 85
Supplement: Effects of Subsistence Consumption on the Behavior of a Worker-Consumer Household 102

3 Effects of the Internal Wage Rate on Output Supply: A Structural Estimation for Japanese Rice Farmers 112
   3.1 The model 114
   3.2 Comparative statics relative to the commodity supply and the internal wage rate 118
3.3 The data 122
3.4 Estimation of the model 124
3.5 Concluding remarks 132

4 The Economic Differentiation of Producer-Consumer Households 134
4.1 A producer-consumer household or a capitalist producer household which employs hired labor 136
4.2 A producer-consumer household or a capitalist producer household which employs hired labor but leases out a part of its capital endowment 140
4.3 A non-operating capitalist household or an idle asset holder household 142
4.4 A worker-consumer household with some asset 144
4.5 A producer-consumer household or a capitalist producer household which employs hired labor and supplies out some output of household goods 147

5 The Structure of Labor Supply 149
5.1 The supply of labor by a worker-consumer household 150
5.2 The supply of labor by a producer-consumer household 153
5.3 The supply of labor by a producer-consumer household with limited external supply of capital service 159
5.4 The supply of labor by a producer-consumer household with inevitable production of household goods 165

6 Demand for Capital Service (Consumption Good in the Production of Household Goods) 173
6.1 Demand for capital service by a family firm of the producer-consumer household 175
6.2 Demand for capital service by a family firm of the producer-consumer household with limited external employment of labor 176
6.3 Demand for capital service by a family firm of the producer-consumer household with the limited external employment of labor and binding subsistence consumption 182
6.4 Demand for consumption good in the production of household goods 187
7 A Dual Economy of the New Keynesian Type with Self-Employment Included

7.1 A New Keynesian model of the economy, including self-employment 193
7.2 The autonomous behavior of producer-consumer households with limited wage employment of labor 196
7.3 The behavior of the economy with wage differential over aggregate economic fluctuations 199
7.4 Concluding remarks 210

Supplement 1: The Jacobian $A$ 212
Supplement 2: Response of the Employment of Labor by a Capitalist Firm 213
Supplement 3: Response of the Employment of Labor by a Family Firm 214
Supplement 4: The Compound Responses of Producer-Consumer Households to the Combined Changes in the Wage Employment of Labor and the Prices of Output 216

8 The Sectoral Productivity and the Behavior of the Economy in which the Home Production of Household Goods Is Inevitable

8.1 A model of the economy in which the home production of household goods is inevitable 221
8.2 The improved productivity of capitalist firms and responses of the economy with "hidden wage differentials" 223
8.3 The improved productivity of family firms and responses of the economy with "hidden wage differentials" 230
8.4 Concluding remarks 237

Supplement 1: The Jacobian $A^*$ 238
Supplement 2: Response of the Employment of Labor by a Capitalist Firm 239
Supplement 3: Response of the Employment of Labor by a Family Firm 240

9 The Positive Aggregate-Demand Externalities of Producer-Consumer Households to Stabilize Aggregate Economic Fluctuations: A Comparison between Japan and the United States

9.1 Secular trends and the quarterly fluctuations in the GDP sectors 243
