## 1. Introduction

1. Problem Statement ................................................................................. 1
1.2 Overview of Food Transfers Programme and Database ................. 2
1.3 Research Objectives ........................................................................... 3
1.4 Health and Welfare Effects of Integrating AIDS Treatment with Food Assistance in Resource Constrained Settings: Review of Theory and Evidence ........................................................................... 4
1.5 Description of Data and Research Methodology ............................... 4
1.6 Food Assistance and its effect on the Weight and Antiretroviral Therapy Adherence of HIV Infected Adults: Evidence from Zambia .......... 5
1.7 Consumption Responses to Integrating AIDS Treatment with Food Transfers: Evidence from Zambia .................................................. 6
1.8 Labour Supply Responses to Integrating AIDS Treatment with In-Kind Transfers: Evidence from Zambia .............................................. 7
1.8 Outline .............................................................................................. 8

2.1 Introduction ...................................................................................... 9
2.2 Theory ............................................................................................ 11
2.3 Methods .......................................................................................... 14
  2.3.1 Search strategy ........................................................................... 14
  2.3.2 Outcome measures and framework for analysis ......................... 15
  2.3.3 Methodology appraisal ................................................................. 15
2.4 Description of Empirical Studies ....................................................... 15
  2.4.1 Characteristics of studies.............................................................. 15
  2.4.2 Methodological quality of the studies ....................................... 16
2.5 Findings ........................................................................................... 21
  2.5.1 Clinical effects of integrating AIDS treatment with food assistance .......................................................................................... 21
  2.5.2 Welfare effects of integrating AIDS treatment with food assistance .................................................................................. 22
2.6 Discussion ....................................................................................... 23
  2.6.1 Policy implications .................................................................. 23
  2.6.2 Research implications ................................................................. 25
2.7 Conclusion ..................................................................................... 26

## 3. Description of the Data and Research Methodology
