Technological, Managerial and Organizational Core Competencies: Dynamic Innovation and Sustainable Development

Farley Simon Nobre  
*Federal University of Parana, Brazil*

David Walker  
*The University of Birmingham Business School, UK*

Robert Harris  
*The University of Wolverhampton Business School, UK*
Table of Contents

Foreword by Alan D. Meyer and William H. Starbuck ................................................................. xii
Foreword by Colette Henry ............................................................................................................. xv
Preface ............................................................................................................................................ xvii
Acknowledgment .......................................................................................................................... xxxvii

Section 1
Sustainability and Innovation

Chapter 1
Environmental Rationality: Innovation in Thinking for Sustainability ........................................ 1
  Enrique Leff, Universidad Nacional Autónoma de México, Mexico

Chapter 2
A Model for Improving the Adoption of Sustainability in the Context of Globalization and Innovation ................................................................................................................................. 18
  David L. Rainey, Rensselaer Polytechnic Institute, USA

Chapter 3
Product-Service Systems as Enabler for Sustainability-Oriented Innovation: The Case of Osram’s Off-Grid Lighting .................................................................................................................... 40
  Friedrich Grosse-Dunker, Dark Horse GmbH, Germany
  Erik G. Hansen, Leupana University Lüneburg, Germany

Chapter 4
Innovation for Sustainability in Aviation: World Challenges and Visions .................................... 55
  Hiroko Nakamura, The University of Tokyo, Japan
  Yuya Kajikawa, The University of Tokyo, Japan
  Shinji Suzuki, The University of Tokyo, Japan

Chapter 5
Diffusion and Adoption of Innovations for Sustainability ........................................................... 73
  Helen E. Muga, University of Mount Union, USA
  Ken D. Thomas, Auburn University, USA
Chapter 6
Social Innovation, Environmental Innovation, and Their Effect on Competitive Advantage and Firm Performance
Javier Amores Salvado, Universidad Complutense de Madrid, Spain
José Emilio Navas López, Universidad Complutense de Madrid, Spain
Gregorio Martín de Castro, Universidad Complutense de Madrid, Spain

Chapter 7
Observe, Conceive, Design, Implement and Operate: Innovation for Sustainability
Javier Alejandro Carvajal Díaz, Universidad de los Andes, Colombia
María Catalina Ramírez Cajiao, Universidad de los Andes, Colombia
José Tiberio Hernández Peñaloza, Universidad de los Andes, Colombia

Section 2
Organizational Networks and Innovation

Chapter 8
The Integration of Independent Inventors in Open Innovation
Gavin Smeilus, University of Wolverhampton, UK & Caparo Innovation Centre, UK
Robert Harris, University of Wolverhampton, UK
Andrew Pollard, University of Wolverhampton, UK & Caparo Innovation Centre, UK

Chapter 9
An Examination of Independent Inventor Integration in Open Innovation
Gavin Smeilus, University of Wolverhampton, UK & Caparo Innovation Centre, UK
Robert Harris, University of Wolverhampton, UK
Andrew Pollard, University of Wolverhampton, UK & Caparo Innovation Centre, UK

Chapter 10
Firm-Specific Factors and the Degree of Innovation Openness
Valentina Lazzarotti, Carlo Cattaneo University, Italy
Raffaella Manzini, Carlo Cattaneo University, Italy
Luísa Pellegrini, University of Pisa, Italy

Chapter 11
Effects of Product Development Phases on Innovation Network Relationships
Christina Öberg, Lund University, Sweden

Chapter 12
Maturity in Innovation Network Management
Caspar Van Rijnbach, TerraForum Consulting, Brazil
Gustavo de Boer Endo, TerraForum Consulting, Brazil
Suzana Monteiro Leonardi, TerraForum Consulting, Brazil
Chapter 13
Science Parks and their Role in the Innovation Process: A Literature Review for the Analysis of Science Parks as Catalysts of Organizational Networks ................................................................. 230
Renata Lèbre La Rovere, Federal University of Rio de Janeiro, Brazil Leonardo de Jesus Melo, Federal University of Rio de Janeiro, Brazil

Section 3
Entrepreneurship and Innovation

Chapter 14
Entrepreneurial Learning and Innovation: Building Entrepreneurial Knowledge from Career Experience for the Creation of New Ventures ............................................................................ 245 Jonas Gabrielsson, Lund University, Sweden Diamanto Politis, Halmstad University, Sweden

Chapter 15
Innovation and Corporate Reputation: Britain’s Most Admired Company Surveys 1990-2009 ...... 264 Michael Brown, Birmingham City University, UK Paul Turner, Anglia Ruskin University, UK

Chapter 16
Natural Resource Dependency and Innovation in the GCC Countries............................................. 278 Thomas Andersson, Jönköping University, Sweden, & The Research Council, Sultanate of Oman

Chapter 17
Innovation in Scenario Building: Methodological Advancements and a Foresight Study of the Automotive Industry in Brazil ................................................................. 302 Ariane Hinça Schneider, Industry Federation of Parana, Brazil Laila Del Bem Seleme, Industry Federation of Parana, Brazil Felipe Fontes Rodrigues, Federal University of Parana, Brazil Marilia de Souza, Industry Federation of Paraná, Brazil Helio Gomes de Carvalho, Federal Technological University of Parana, Brazil

Section 4
Knowledge Management and Innovation

Chapter 18
Toward a More Pragmatic Knowledge Management: Toyota’s Experiences in Advancing Innovation ................................................................. 327 Steven Cavaleri, Central Connecticut State University, USA

Chapter 19
Knowledge and the Politics of Innovation: Insights from a R&D Company ........................................... 347 Theodora Asimakou, London Metropolitan University, UK
Chapter 20
Innovation and Knowledge Management for Sustainability: Theoretical Perspectives .......... 365
René J. Jorna, Frisian Academy (KNAW), The Netherlands & University of Groningen,
The Netherlands
Niels R. Faber, Frisian Academy (KNAW), The Netherlands & University of Groningen,
The Netherlands

Chapter 21
Dynamic Capabilities and Innovation Radicalness: Review and Analysis.......................... 384
Jorge Cruz-González, Universidad Complutense de Madrid, Spain
José Emilio Navas-López, Universidad Complutense de Madrid, Spain
Pedro López-Sáez, Universidad Complutense de Madrid, Spain
Miriam Delgado-Verde, Universidad Complutense de Madrid, Spain

Section 5
R&D&T Management and Innovation

Chapter 22
Research Profiles: Prolegomena to a New Perspective on Innovation Management .......... 408
Gretchen Jordan, Sandia National Laboratories, USA
Jonathon Mote, Southern Illinois University, USA
Jerald Hage, University of Maryland, USA

Chapter 23
Determinants and Consequences of R&D Strategy Selection ........................................... 428
Diana A. Filipescu, Autonomos University of Barcelona, Spain
Claudio Cruz Cázares, Autonomos University of Barcelona, Spain

Chapter 24
Institutional Innovation Practices in Technopoles: An Example in France ....................... 450
Anne Berthier-Poncet, Université de Savoie, France
Rachel Bocquet, Université de Savoie, France
Sébastien Brion, Université de Savoie, France
Caroline Mothe, Université de Savoie, France

Chapter 25
Choosing Locations for Technology and Innovation Support Centers:
Methodological Proposal and Brazilian Studies .............................................................. 474
Mário Otávio Batalha, Federal University of São Carlos, Brazil
Daniela Tatiane dos Santos, Federal University of São Carlos, Brazil
Nelson Guedes de Alcântara, Federal University of São Carlos, Brazil
Sérgio Ronaldo Granemann, University of Brasilia, Brazil
Section 6
Marketing and Innovation

Chapter 26
Taxonomy of Marketing Core Competencies for Innovation ................................................. 491
Eric Viardot, EADA Business School, Spain

Chapter 27
Self Regulation on Innovative Products Choice ................................................................. 508
Paulo Henrique Muller Prado, Federal University of Parana, Brazil
Danielle Mantovani Lucena da Silva, Federal University of Parana, Brazil
Jose Carlos Korelo, Federal University of Parana, Brazil

Chapter 28
The New Product Development Process as a Communication Web Part I:
Introduction, Concepts and Spanish Context ........................................................................ 526
Pilar Fernández Ferrin, Universidad del País Vasco, Spain
José Antonio Varela González, University of Santiago de Compostela, Spain
Belén Bande Vilela, University of Santiago de Compostela, Spain
Oihana Valmaseda Andia, Universidad del País Vasco, Spain

Chapter 29
The New Product Development Process as a Communication Web Part II:
Analysis of Spanish Firms ..................................................................................................... 540
Pilar Fernández Ferrin, Universidad del País Vasco, Spain
José Antonio Varela González, University of Santiago de Compostela, Spain
Belén Bande Vilela, University of Santiago de Compostela, Spain
Oihana Valmaseda Andia, Universidad del País Vasco, Spain

Section 7
Finance and Innovation

Chapter 30
Innovations and Financing of SMEs Part I: SME Financing and Credit Rationing:
The Availability of Funds ....................................................................................................... 555
David S. Walker, The University of Birmingham, UK
Horst-Hendrik Scholz, The University of Birmingham, UK

Chapter 31
Innovations and Financing of SMEs Part II: Case Study of German SMEs in 2010 ................. 574
David S. Walker, The University of Birmingham, UK
Horst-Hendrik Scholz, The University of Birmingham, UK
Section 8
Internationalization and Innovation

Chapter 32
The Recent Internationalization of Brazilian Companies .......................................................... 590
  Glauco Arbix, University of Sao Paulo, Brazil
  Luiz Caseiro, University of Sao Paulo, Brazil

Chapter 33
R&D Internationalization as Mechanism of Innovation in Global Enterprises:
A Brazilian Case Study .................................................................................................................. 619
  Simone Vasconcelos Ribeiro Galina, University of Sao Paulo, Brazil

Section 9
Information Systems and Innovation

Chapter 34
Tools That Drive Innovation: The Role of Information Systems in Innovative Organizations .......... 640
  Jason G. Caudill, Carson-Newman College, USA

Chapter 35
The Roles of Cognitive Machines in Customer-Centric Organizations: Towards Innovations in
Computational Organizational Management Networks .................................................................. 653
  Farley Simon Nobre, Federal University of Parana, Brazil

About the Contributors .................................................................................................................. 675
